Stop Teaching Isabel Rimanoczy, 2016-06-17 What do we need to change in order to develop a new generation of business leaders who connect profits with purpose who see in social entrepreneurship and innovation the key opportunity for addressing our planetary challenges The answer lies in the contents we select to teach in the values we invite to explore and develop and in the methods we use In the era of 24 7 global access to information from our mobile gadgets many institutions of higher education are still sitting students in rows or amphitheaters measuring success via tests and evaluations with instructors lecturing what students should learn And instructors feel the challenge of competing with sleepy audiences that divide their attention between their cell phones and the speaker Stop teaching the author says inviting instructors in management schools and higher education to adopt some

Storytelling and Visual Design for Persuasive Presentations Michael Gose,2023-12-06 Just over 100 years ago Columbia s John Erskine started a General Honors program that was the precursor of the Great Books programs popularized by his student Mortimer Adler As a set term Great Books has elicited more than some controversy especially because most relatively short lists of such works mostly features dead white men However most any group in America has made the Great Ideas their own This book explores the benefits of reading Great Books and is virtually unique in detailing what a series of Great Books classes has looked like over the past decades

Value Management Roger H. Davies,2016-02-17 Change programmes in both private and public sectors have a poor record of delivering their intended value The reasons given most often for their failure include lack of executive support or buy in from key users loose requirements definition weak programme management and plain wishful thinking They rarely include technical limitations Value Management puts forward the view that the true problem lies in failing to understand the causal links between the intended stakeholder outcomes and the actual programme outputs Repeating the pattern of failure can be avoided by asking two questions Before implementation what capabilities must a change programme deliver when and in what order so as to cause intended value against a defined purpose with speed and certainty During and after implementation what minor adjustments and or major shifts are needed to be certain that the programme remains on purpose and on value and two answers to be given Target time and align change programmes to deliver maximum intended value to stakeholders the baseline business case track and respond to changes during and beyond implementation to ensure that the programme actually delivers or exceeds intended value value realisation The authors show how by asking and answering these questions direction and delivery of any programme can be clarified and greater economic value achieved

The Sustainability Mindset Principles Isabel Rimanoczy,2020-11-29 As we increase our awareness of the planetary challenges and how they

intersect with the discipline or profession we choose to focus on we have put our attention on the external forces and impacts. What remains untouched however is the set of beliefs, values, assumptions, mental processes, and paradigms that we hold and share: our mindset. But how do we change a mindset? This book is the first to introduce the 12 Principles for a Sustainability Mindset, presenting educators with a framework that makes it easy to include them into teaching plans and lessons of any discipline. Written in a very clear and practical way, the book provides examples, checklists, tips, and tools for professionals and educators. It transforms the development of a much-needed mindset for sustainability into an accessible, fun, and intuitive task. The book is written with educators from a variety of disciplines in mind, including but not limited to management educators, coaches, and trainers. No other book comes close to providing such a well-organized and solid way of starting to shift our mindsets in the direction of sustainability.
