**Teaching for Wholeness** Carolyn DiPaolo,1985 *Books-in-brief: Wholeness and Holiness in Education: An Islamic Perspective* Zahra Al Zeera ,2023-10-16 Critically examining the Western secular approach to formal education the author contests the value of an education system focusing solely on the intellectual and physical aspects of human development The methodological aim and structure of this approach are compared to those of Islam which Dr Al Zeera notes gives credence to the importance of spiritual and religious factors as well as scholarly ones with the overall objective of forming whole and holy human being who instead of resisting the paradoxes of life uses their interrelatedness as a means of personal and societal development One interesting factor examined within the broader framework of the study is the area of female spirituality an element which the author argues is vastly under represented in prevalent Islamic literature This study is a holistic view of knowledge and a sociological discussion adopting an unconventional approach of using the author s own personal experiences as the basis for debate and analysis We are invited to enter the world of understanding and observation to experience for ourselves an unusual approach to dialectical thinking *Taylor's 7th Teaching and Learning Conference 2014 Proceedings* Siew Fun Tang,Loshinikarasi Logonnathan,2015-06-01 These conference proceedings showcase a rich and practical exchange of approaches and vital evidence based practices taking place around the world They clarify the complex challenges involved in bringing about a holistic educational environment in schools and institutes of higher learning that fosters greater understanding and offer valuable insights on how to avoid the pitfalls that come with rolling out holistic approaches to education To do so the proceedings focus on the subthemes Support and Development Mobility and Diversity and Networking and Collaboration in Holistic Education **Taoism, Teaching, and Learning** John P. reflect deeply upon their roles as educators Mayes also explores Jung's view of symbolism and its implications for curriculum and the Jungian idea of the shadow as the launching point for an examination of education as reclamation of the soul before concluding with the case for individuation as the proper goal of education     Rudolf Steiner's Pedagogy of Imagination

Thomas William Nielsen, 2004 This book investigates the concept and practises of imaginative teaching Since Rudolf Steiner founder of the Waldorf schools wrote extensively on the subject and is renowned for his contributions to education his work is used to develop insights into the nature of imaginative teaching Given the societal changes since Steiner's time however the topic is further developed by examining imaginative teaching in three Steiner primary classrooms using the methodological means of ethnography and phenomenology The insights gained from this undertaking are used to re theorise aspects of Steiner's writings about imagination and holistic education In this study it is argued that imaginative teaching is made up of three modes of pedagogy and seven teaching methods and that these modes and methods form a most potent means for connecting children with aesthetic intellectual and physical development
