Learning Disorders Across the Lifespan Amy E. Margolis, Jessica Broitman, 2023-01-17 This book addresses the need to view specific learning disorders (SLDs) within a mental health framework as supported by their placement alongside autism spectrum disorder (ASD) and attention deficit hyperactivity disorder (ADHD) in the Diagnostic and Statistical Manual of Mental Disorders Fifth Edition (DSM 5). It describes how policy and practice point to a different perspective specifically that SLDs are often treated as educational rather than psychological problems and examines the implications of this dichotomy. The book reviews empirical research that suggests children need access to treatment for clinical components of SLDs that may respond to psychological intervention separately from and in addition to educational interventions. It provides a theoretical framework for organizing research findings and clinical perspectives that support understanding the clinical components of SLDs and addresses the need for a mental health framework within which to approach theory, treatment and assessment of SLDs. Key areas of coverage include: Examining different theoretical orientations to learning disorders e.g. cognitive behavioral, neuropsychological, psychoanalytic; Adapting evidence based therapeutic techniques for use with children and adolescents who have learning disorders; The need for accurate and well characterized assessment of SLDs; How incorporating a cognitive neuroscience perspective into assessment can move LD treatment and research forward. *Learning Disorders Across the Lifespan* is an essential reference for clinicians, therapists and other professionals as well as researchers, professors and graduate students in school and clinical child psychology, special education, speech language therapy, developmental psychology, pediatrics, social work as well as all interrelated disciplines. The Elementary School Library Collection. Lauren K. Lee, Linda L. Homa, 1994. Cited in Sheehy and Walford this comprehensive reference recommends print and audiovisual materials as well as microcomputer software and CD ROM products for preschool through sixth grade children. The present edition includes 12,294 recommended titles, 3,070 being new listings. Each entry notes the format(s) available and provides cataloging and ordering information, a critically descriptive annotation, interest and reading level estimates and priority for acquisition. For school, public and academic librarians and preservice and inservice faculty.
