Group Interaction in High Risk Environments Rainer Dietrich, Traci Michelle Chhildress, 2017-03-02 What governs the way in which people work together and handle technology in high risk environments The understanding of decision making communication and the other dimensions of team interaction within aircrews and other teams in highly stressful situations is based on a multitude of diverse factors each with its own literature and individual studies This book is about how teams function in just such situations providing a uniquely integrated and interdisciplinary account of the dynamics and main explanatory factors of team interaction under high workload The book stems from the interdisciplinary research project Group Interaction in High Risk Environments GIHRE a Collegium of the Gottlieb Daimler and Karl Benz Foundation The goals of the project and therefore the book are to investigate analyze and understand the behavior of professional groups working in high risk environments and to develop practical suggestions for enhancing performance A central focus of this book is how groups in these professions deal with the factors that can threaten the safety and effectiveness of their task performance whether these factors are part of the environment or part of the team itself Four representative workplaces were investigated in three broad settings in aviation the cockpit of a commercial airliner in medicine the operating room and the intensive care unit of a hospital in nuclear power the control room of a nuclear power plant The international and interdisciplinary composition of the Collegium ensures the book features a variety of different methodological and conceptual approaches which are brought to bear at both theoretical and practical levels Readers working in all related fields will find value in the case descriptions the academic synthesis of the similarities between them and ways to approach new challenges specialists in applied psychology human factors and technical management will gain new insights

Resilience Engineering David D. Woods, 2017-11-01 For Resilience Engineering failure is the result of the adaptations necessary to cope with the complexity of the real world rather than a breakdown or malfunction The performance of individuals and organizations must continually adjust to current conditions and because resources and time are finite such adjustments are always approximate This definitive new book explores this groundbreaking new development in safety and risk management where success is based on the ability of organizations groups and individuals to anticipate the changing shape of risk before failures and harm occur Featuring contributions from many of the worlds leading figures in the fields of human factors and safety Resilience Engineering provides thought provoking insights into system safety as an aggregate of its various components subsystems software organizations human behaviours and the way in which they interact The book provides an introduction to Resilience

Engineering of systems covering both the theoretical and practical aspects It is written for those responsible for system safety on managerial or operational levels alike including safety managers and engineers line and maintenance security experts risk and safety consultants human factors professionals and accident investigators *Crew Resource Management* Barbara G. Kanki, José Anca, Robert L. Helmreich, 2010-01-20 Crew Resource Management Second Edition continues to focus on CRM in the cockpit but also emphasizes that the concepts and training applications provide generic guidance and lessons learned for a wide variety of crews in the aviation system as well as in the complex and high risk operations of many non aviation settings Long considered the bible in this field much of the basic style and structure of the previous edition of Crew Resource Management is retained in the new edition Textbooks are often heavily supplemented with or replaced entirely by course packs in advanced courses in the aviation field as it is essential to provide students with cutting edge information from academic researchers government agencies FAA pilot associations and technology Boeing ALION This edited textbook offers ideal coverage with first hand information from each of these perspectives Case examples which are particularly important given the dangers inherent in real world aviation scenarios are liberally supplied An image collection and test bank make this the only text on the market with ancillary support The only CRM text on the market offering an up to date synthesis of primary source material New edition thoroughly updated and revised to include major new findings complete with discussion of the international and cultural aspects of CRM the design and implementation of LOFT Instructor website with testbank and image collection Liberal use of case examples *The Social Construction of Knowledge in Mission-Critical Environments* Theodoros Katerinakis, 2018-06-27 This volume analyzes real in flight communications to explain the dynamics of knowledge construction With the use of a grounded theory approach real life scenarios for in depth interviews with aviation informants were developed and analyzed using discourse analysis The study revealed aspects of tacit knowledge and expertise behavior that develop in mission critical environments Among the findings the author discovered Silence is an interactional element and a substantial contributing factor to both completed flights and aviation incidents accidents Hesitation is an early reaction when situational awareness is lacking The aviation sub cultures contain several distinct micro cultures which affect professional responsibility and decision making in micro environments Human errors should be acknowledged discussed and repaired by all actors of the flight model Non verbal communication in institutional settings and mediated environments is instrumental to safe and efficient operations The results suggest fruitful applications of theory to explore how knowledge is generated in highly structured high risk organizational environments such as hospitals nuclear plants battlefields and crisis and disaster locations Katerinakis explains the emergent knowledge elements in communication command with messages spoken heard understood applied from multiple stakeholders The interplay of theory and real flight examples with key interlocutors creates a valuable narrative both for the expert reader and the lay person interested in the insights of hospitals nuclear plants battlefields safety and rescue systems and crisis and disaster locations Ilias Panagopoulos

PhD Command Fighter Pilot Col Ret Senior Trainer Joint Aviation Authorities JAA Training Organisation Safety Manager
NATO Airlift Management Programme In this path breaking work Theodore Katerinakis brings the study of human communication to the airplane cockpit as a knowledge environment Toward that end drawing on his own experience with the Air Force and Aviation Authorities and interviews with flight controllers and scores of pilots Katerinakis both builds on moves beyond human factors research and ecological psychology It is a work of theoretical value across disciplines and organizational settings and of practical importance as well His lively narrative adds to translational research by translating knowledge or evidence into action in mission critical systems Douglas V Porpora PhD Professor of Sociology Director Communication Culture and Media Drexel University

Crisis Management in Acute Care Settings Michael St.Pierre,Gesine Hofinger,Cornelius Buerschaper,2007-11-08 This book addresses all issues relevant to error prevention and safe practice in the acute and emergency health care setting It begins with the basic principles of human behavior and decision making and then partitions into three sections where the individual the team and the organizational influences within the health care system are discussed in greater depth Case reports and proven strategies help to ground psychological theory in daily practice This book has emerged from a long standing cooperation between clinicians and psychologists Blending the strengths of both professions into a readily accessible text has created a book which will hopefully help both physicians and non physicians to better understand the principles of human behavior and decision making in critical situations and in turn enable them to provide safer treatment Unsuspected medical crisis and emergency situations may be managed more effectively and an increased awareness of contributing factors may help to avoid errors from the outset

Aviation Mental Health Todd Hubbard,Dr Robert Bor,2012-10-01 This book provides an authoritative and practical guide to the assessment management treatment and care of pilots and other professional groups within aviation covering a range of relevant topics for health and human resources practitioners working in the airline industry Pilot mental health has hitherto been regarded as a specialist topic in aviation medicine Consequently practitioners and researchers alike have been forced to consult specialist journals or seek out a relevant chapter on this topic in a general textbook to develop or update their understanding of the relevant issues This book seeks to remedy this situation by gathering together all of the relevant insights into a single authoritative source gathered from the leading specialists in the field It aims to cover all of the main relevant issues including the assessment care management and treatment of mental health problems as well as the prevention of mental health problems among this occupational group

Human Error in Aviation R.Key Dismukes,2017-07-05 Most aviation accidents are attributed to human error pilot error especially Human error also greatly effects productivity and profitability In his overview of this collection of papers the editor points out that these facts are often misinterpreted as evidence of deficiency on the part of operators involved in accidents Human factors research reveals a more accurate and useful perspective The errors made by skilled human operators such as pilots controllers and mechanics

are not root causes but symptoms of the way industry operates The papers selected for this volume have strongly influenced modern thinking about why skilled experts make errors and how to make aviation error resilient **Cockpit Resource Management** Earl L. Wiener, Barbara G. Kanki, Robert L. Helmreich, 1995-11-17 Cockpit Resource Management CRM has gained increased attention from the airline industry in recent years due to the growing number of accidents and near misses in airline traffic This book authored by the first generation of CRM experts is the first comprehensive work on CRM Cockpit Resource Management is a far reaching discussion of crew coordination communication and resources from both within and without the cockpit A valuable resource for commercial and military airline training curriculum the book is also a valuable reference for business professionals who are interested in effective communication among interactive personnel Key Features Discusses international and cultural aspects of CRM Examines the design and implementation of Line Oriented Flight Training LOFT Explains CRM LOFT and cockpit automation Provides a case history of CRM training which improved flight safety for a major airline
