

## Banding

- Effective in controlling bleeding because of varices seen in chronic liver disease
- Outpatient procedure - needs one or two times to completely treat varices

## Foreign body

- Foreign body impaction in esophagus, tumor by denture but unusual soft fish bone
- If not presenting early, this can lead to abscess formation at the site of impaction
- Flexible endoscopy is effective in retrieving such impacted foreign bodies

## Esophageal Stricture

- To confuse with endoscopy and biopsy to rule malignancy
- Removable self-expanding metal stenting indicated for recurrent benign stricture, resistant to repeated balloon dilatation
- Effectless for 30-60% of benign strictures of esophagus

## Esophageal leak

- Commonly seen after surgical procedure like esophagectomy and oesophagecomy
- If detected early, DGD to assess the leak and deploying removable self-expanding metal stent will seal the leak, stent can be removed after 3-4 months
