## **Technological Conscience:**

*The Technological Conscience* Manfred Stanley, 1978      **Bulletin of the Atomic Scientists**, 1979-12 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world

**Technique, Discourse, and Consciousness** David Lovekin, 2022-05-19 This study examines the French thinker Jacques Ellul 1912 1994 and his historical biblical and social analyses of how technology manipulates and impoverishes modern thought culture and language In the spirit of Georg Hegel and Ernst Cassirer Ellul explores how technology begins in myths stories and religion advances to tools and then develops into data algorithms and abstract systems which are detached from human bodies and communities Efficiency then becomes an absolute in all areas of human life and the mentality of technique becomes lost in its creations These modern symbols posing as ultimate human goods and values are denigrated by technique leaving humanity awash in clichés in groundless social media and in blathering slogans that sustain the illusion that politics and culture have now become

**Technology and Contemporary Life** P.T. Durbin, 2012-12-06 Nearly everyone agrees that life has changed in our technological society whether the contrast is with earlier stages in Western culture or with non Western cultures Modernization is just one of various terms that have been applied to the process by which we have arrived at the peculiar lifestyle typical of our age whatever the term for the process almost all analysts agree in finding technology to be one of its key ingredients This is the judgment of critics of all sorts anthropologists historians literary figures sociologists theologians Volume 4 in the Philosophy and Technology series brings the perspectives of philosophers to bear on the issue of characterizing contemporary life mainly in high technology societies Some of the philosophers look at the issue directly Others focus on work life or on the living arrangements that surround or condition or offer refuge from work life in technological society Still others reflect on particular technologies especially biotechnology and computer technology that are increasingly affecting both work and family life There is also a paper on the nature of thinking in technological praxis along with two papers on whether it is appropriate to export this sort of thinking to Third World countries and another paper on the issue of responsibility in technology which would have fit better in volume 3 of the series entitled Technology and Responsibility 1987 Finally volume 4 closes with a broad ranging bibliography that takes work and technology as its focus

**Structure, Consciousness, and History** Richard Harvey Brown, Stanford M. Lyman, 1978-08-31 First published in 1978 this volume is addressed to the crisis prevailing in the social and cultural sciences The authors explore the conflict between positivism and romanticism between hard and soft sociological research methods and between objectivity and subjectivity conflicts that were particularly acute in sociology at the time of publication All of the essays adopt the approach of symbolic realism or cognitive aesthetics to overcome the dualism in conventional sociological theory This strategy of symbolic realism is a philosophical amalgam forged from findings in existential phenomenology ordinary language philosophy and pragmatism

It establishes a legitimate basis for the application of aesthetic criteria to truth seeking in the social sciences The synthesis emergent from these essays suggests a paradigm with broad implications for all the human studies Students of culture will find this volume a provocative point of departure for their own investigations *The Good Life in a Technological Age* Philip Brey,Adam Briggie,Edward Spence,2012-05-04 Modern technology has changed the way we live work play communicate fight love and die Yet few works have systematically explored these changes in light of their implications for individual and social welfare How can we conceptualize and evaluate the influence of technology on human well being Bringing together scholars from a cross section of disciplines this volume combines an empirical investigation of technology and its social psychological and political effects and a philosophical analysis and evaluation of the implications of such effects

**Marxism and the Interpretation of Culture** Cary Nelson, Lawrence Grossberg, 1988 This title provides a picture of the state of Marxist thinking It aims to provoke a debate that will be of interest to those concerned with the status and development of Marxism and also to theorists in all fields of the human sciences **Encyclopedia of Postmodernism** Victor E. Taylor, Charles E. Winquist, 2003 Provides comprehensive and authoritative coverage of academic disciplines critical terms and central figures relating to the vast field of postmodern studies Publisher's description **What Should Political Theory Be Now?** John S. Nelson, 1984-06-30 Confronted with the alienation of political theory from the practice of politics prominent theorists respond in this book to the growing question What should political theory be now New and original contributions by such thinkers as Charles Anderson John Gunnell Terence Ball Paul Kress Ira Strauber and William Connolly analyze the current malaise in the field and offer remedies for it Each contribution is at once an argument about what is to be done in political theory and an exemplar of how to do it Spurred by the Shambaugh Conference on Political Theory this cross disciplinary effort addresses two major issues What is the proper stance for theorizing about politics What are the priority projects for current political theory The contributions encompass many of the major themes concerning political theorists today including criticism as a project for current political theory dangers in the latter day disengagement of political theory from politics theorists perplexity within and about history issues of reason and the relationships among science theory and politics The viewpoints presented are diverse yet the contributors to this volume are typical of political theorists generally Almost all share inklings of actual or incipient disasters reaching from politics into theory and vice versa **Industrial Cultures and Production** Lauge Rasmussen, Felix Rauner, 2012-12-06 This book contains a selection of articles on the subject of Culture and Production They are results of international conferences held in Tokyo Washington and Bremen between 1991 and 1994 The International Research Network on Culture and Production CAPIRN carried out a 5 year joint research project examining the impact of different industrial cultures on the development and implementation and above all on the international transfer of technology The machine tools sector was selected for this international comparative study because over the last 15 years this global market has undergone dramatic changes that cannot be adequately explained by

traditional economic theories of international competition The industrial culture research concept permits an analysis and understanding of hitherto unrecognised interrelationships between the dimensions of different industrial cultures and the process of technological innovation in international competition The special challenge faced by CAPIRN was to develop the theoretical concept of industrial culture further and to apply it within a large scale international study A considerable amount of work in this field has been published by CAPIRN members since 1990 This book is the first compilation of research findings in the field of industrial culture We wish to express our thanks to the national research councils in the participant countries the FORCE and FAST programmes of the European Union the Japanese Ministry for Industry MITI and the Hans Bockler Foundation to mention only some of the many bodies that have provided support *American Science and Science Policy Issues* Don Fuqua,1986 Advances in Nanotechnology and the Environmental Sciences Alexander V. Goodall, 1994-07-27 Now available for the first time in paperback and expanded by a new chapter and an afterword entitled Surrendering to the Mystery or The Sooner You Arrive the Further You Have to Go this ground breaking study by H L Goodall Jr examines what happens when a communication scholar ventures out of academia into the community workplace Using the techniques of social science and literary journalism Goodall reveals the tensions between order and creativity in the real world and how these tensions place him into a crisis of interpretation Becoming an Organizational Detective the first chapter is a brief autobiographical sketch of how Goodall moved from the role of cultural outsider to that of cultural insider within the high technology texts and contexts of Huntsville Alabama Against this backdrop he explores the lives led by people within organizations against the backdrop of his own many storied story Through the use of an interpretive field method cultural ethnography Goodall utilizes these many storied stories to provide a richer deeper sense of the experience of a researcher observing and interpreting organizational lives His stories take on the form of six detective mysteries in which the narrator figures into the plot of the intrigue and then works out its essential patterns In the first mystery Notes on a Cultural Evolution The Remaking of a Software Company Goodall looks at the transition of the Huntsville regional office of a Boston based computer software company where the lives and social dramas of the participants reflect the current state of high technology a blend of fantasy and stress stemming from that fantasy that mingle with his own In The Way the World Ends Inside Star Wars Goodall penetrates the various defenses of the Star Wars command office in Huntsville to discover its secrets and surprises Lost in Space The Layers of Illusion Called Adult Space Camp illustrates how a supposedly innocent theme park invites participation in rituals and ceremonies designed to influence a future generation of taxpayers In Articles of Faith Goodall enters a super mall in Huntsville noting how shopping centers provide consumers and narrators with far

more than places to purchase goods and services How I Spent My Summer Vacation finds Goodall back in a conference of communication scholars where he demonstrates the difficult task of translating cultural understandings from one context to another through the telling of his own tale In The Consultant as Organizational Detective Goodall works within a context of intrigue and deceit worthy of Raymond Chandler as he evaluates relationships of power and authority within a privately held company whose owner has targeted a contentious manager for removal preferably through voluntary resignation and dupes Goodall into the general deception In the final chapter Goodall shares how his study fits into or rubs against the grain of contemporary communication scholarship and offers unusual advice for others who may be considering making the interpretive turn
