Technology and Agricultural Development in Pre-war Japan Penelope Francks, 1984 **Japanese Studies from Pre-History to 1990** Richard Perren, 1992 **Agricultural Development and Tenancy Disputes in Japan, 1870-1940** Richard J. Smethurst, 2014-07-14 Richard Smethurst shows that the growth of a rural market economy did not impoverish the Japanese farmer. Instead it led to a general increase in rural prosperity. Farmers and Village Life in Twentieth-century Japan Ann Waswo, Yoshiaki Nishida, 2003 Rural Japan during the twentieth century has been portrayed as a vast reservoir of conservatism in much of the literature on Japan's modern development and Japanese agriculture since the 1960s has been treated as an artificial creation sustained only by protectionism of the worst sort. This book presents a range of original in-depth work including work by Japanese scholars that seeks to move beyond such stereotypes to reveal the diversity and complexities of rural life in Japan from 1900 to the present.

the 1930s the textile industry was Japan's largest manufacturing industry and the country's major source of export earnings. It had a predominantly female labour force drawn mainly from the agricultural population. This book examines the institutions of the labour market of this critical industry during this important period for Japanese economic development. Based on extensive original research, the book provides a wealth of detail showing amongst other things the complexity of the labour market, the interdependence of the agricultural and manufacturing sectors and the importance of gender. It argues that the labour market institutions which developed in this period had a profound effect on the labour market and labour relations in the postwar years.

New Perspectives on the History of Life Sciences and Agriculture Denise Phillips, Sharon

Kingsland, 2015-02-12 This volume explores problems in the history of science at the intersection of life sciences and agriculture from the mid eighteenth to the mid twentieth century. Taking a comparative national perspective, the book examines agricultural practices in a broad sense including the practices and disciplines devoted to land management, forestry, soil science and the improvement and management of crops and livestock. The life sciences considered include genetics, microbiology, ecology, entomology, forestry and deal with US, European, Russian, Japanese, Indonesian, Chinese contexts. The book shows that the investigation of the border zone of life sciences and agriculture raises many interesting questions about how science develops. In particular, it challenges one to re-examine and take seriously the intimate connection between scientific development and the practical goals of managing and improving perhaps even recreating the living world to serve human ends. Without close attention to this zone, it is not possible to understand the emergence of new disciplines and transformation of old disciplines, to evaluate the role and impact of such major figures of science as Humboldt and Mendel or to appreciate how much of the history of modern biology has been driven by national ambitions and imperialist expansion in competition with rival nations.

The Making of Urban Japan André Sorensen, 2005-08-19

During the twentieth century, Japan was transformed from a poor, primarily rural country into one of the world's largest industrial powers and most highly urbanised countries. Interestingly, while Japanese governments and planners borrowed carefully from the planning ideas and methods of many other countries, Japanese urban planning, urban governance and cities developed very differently from those of other developed countries. Japan's distinctive patterns of urbanisation are partly a product of the highly developed urban system, urban traditions and material culture of the pre-modern period which remained influential until well after the Pacific War. A second key influence has been the dominance of central government in urban affairs and its consistent prioritisation of economic growth over the public welfare or urban quality of life. André Sorensen examines Japan's urban trajectory from the mid nineteenth century to the present, paying particular attention to the weak development of Japanese civil society, local governments and land development and planning regulations.

Technology in World Civilization, revised and expanded edition Arnold Pacey, Francesca Bray, 2021-08-03

The new edition of a milestone work on the global history of technology. This milestone history of technology, first published in 1990 and now revised and expanded in light of recent

research broke new ground by taking a global view avoiding the conventional Eurocentric perspective and placing the development of technology squarely in the context of a world civilization Case studies include technological dialogues between China and West Asia in the eleventh century medieval African states and the Islamic world and the United States and Japan post 1950 It examines railway empires through the examples of Russia and Japan and explores current synergies of innovation in energy supply and smartphone technology through African cases The book uses the term technological dialogue to challenges the top down concept of technology transfer showing instead that technologies are typically modified to fit local needs and conditions often triggering further innovation The authors trace these encounters and exchanges over a thousand years examining changes in such technologies as agriculture firearms printing electricity and railroads A new chapter brings the narrative into the twenty first century discussing technological developments including petrochemicals aerospace and digitalization from often unexpected global viewpoints and asking what new kind of industrial revolution is needed to meet the challenges of the Anthropocene

The Rise of Asia Frank B. Tipton, 1998-05-01 For many years Japan was seen as the peculiar exception in Asia a highly dynamic economy isolated in an otherwise moribund continent With the rise of the Southeast Asian and Chinese economies however it has now become clear that Asia as a whole is experiencing an extraordinary revolution which will result within a very few years in living standards for some countries being on a par with those in the West The results of this transformation can only be guessed at but The Rise of Asia adds a far greater sophistication to our understanding of how this process came about treating the key areas of Asian life economics society and politics as an integrated whole and avoiding the trap of most commentators who see the phenomenon as an exclusively postwar economic issue Balancing the uniquely Asian aspects with global developmental factors Dr Tipton creates a convincing picture of how this amazing change has occurred

Rice Francesca Bray, Peter A. Coclanis, Edda L. Fields-Black, Dagmar Schäfer, 2015-02-19 Rice today is food to half the world s population Its history is inextricably entangled with the emergence of colonialism the global networks of industrial capitalism and the modern world economy The history of rice is currently a vital and innovative field of research attracting serious attention but no attempt has yet been made to write a history of rice and its place in the rise of capitalism from a global and comparative perspective Rice is a first step toward such a history The fifteen chapters written by specialists on Africa the Americas and Asia are premised on the utility of a truly international approach to history Each brings a new approach that unsettles prevailing narratives and suggests new connections Together they cast new light on the significant roles of rice as crop food and commodity and shape historical trajectories and interregional linkages in Africa the Americas Europe and Asia

A Time of Crisis Kerry Smith, 2020-05-11 This study of Japan s transformation by the economic crises of the 1930s focuses on efforts to overcome the effects of the Great Depression in rural areas particularly the activities of local activists and policymakers in Tokyo The reactions of inhabitants of rural areas to the depression shed new light on how average Japanese responded to the problems of

modernization and how they re created the countryside
