Technology In Comecon:

Technology in Comecon J. Wilczynski, 1974-06-18 Technology in Comecon Jozef Wilczynski, 1974 **Multinationals from the Second World** Carl H. McMillan, 1987-06-18 **Khrushchev in the Kremlin** Jeremy Smith, Melanie Ilic, 2011-01-25 This book presents a new picture of the politics economics and process of government in the Soviet Union under the leadership of Nikita Khrushchev Based in large part on original research in recently declassified archive collections the book examines the full complexity of government including formal and informal political relationships economic reforms and nationality relations in the national republics of the USSR the treatment of political dissent economic progress through technological innovation relations with the Eastern bloc corruption and deceit in the economy and the reform of the railways and construction sectors The book re evaluates the Khrushchev era as one which represented a significant departure from the Stalin years introducing a number of policy changes that only came to fruition later whilst still suffering from many of the limitations imposed by the Stalinist system Unlike many other studies which consider the subject from the perspective of the Cold War and superpower relations this book provides an overview of the internal development of the Soviet Union in this period locating it in the broader context of Soviet history This is the companion volume to the Jeremy Smith and Melanie Ilic s previous edited collection *Soviet State and Society under Nikita Khrushchev* Routledge 2009

Development of Computer Technology in COMECON Countries B. Silhan, FOREIGN TECHNOLOGY DIV WRIGHT-PATTERSON AFB OHIO., 1975 In recent years the development of computer technology in the COMECON countries has accelerated This development is demonstrated in the application of computers in classical areas of their application but also in the use of computers in new areas New information and control systems of increasing complexity are now in use and the use of these systems are discussed *Technology Export From The Socialist Countries* Jan Monkiewicz, Jan Maciejewicz, 2019-07-11 Only since the 1970s have the East European Socialist countries known collectively as Comecon participated in the international exchange of technology as exporters In this book Drs Monkiewicz and Maciejewicz analyze the technology export performance of the Comecon countries They begin by defining the nature of technology as a commodity analyzing the structural characteristics of the international market and outlining both the cost and benefits of technology export Later chapters provide an overview of Comecon technological policies in the 1970s with particular attention to the export import factor and Comecon regional technological cooperation In depth analysis is presented through case studies of the experiences of Poland and Czechoslovakia The book concludes with a discussion of the implications of technology export by socialist countries particularly its potential impact on existing global patterns of technological dependence and domination **Technological Innovation, Globalization and the Cold War** Wolfgang Mueller, Peter Svik, 2022-11-24 This volume focuses on the interconnections between the Cold War technological innovation and globalization Although the consequences of globalization have received ample attention in both academia and the public

discourse only limited attention has so far been given to the factors that instigated various waves of this process This holds particularly true for the period following World War II during which a struggle between the two global blocs fanned not only technological innovations but also their transfer This volume is dedicated to examining the links between the Cold War and this phase in the history of globalization a phase that gradually made the world despite high levels of international tension more and more inter related More specifically it anchors a very contemporary phenomenon to its historical context and pinpoints how the varied and multi layered East West interactions helped to induce and foster the globalization processes Emphasizing technology and its cross bloc flows as well as several levels of actors including states private companies and individuals this volume reflects an important shift towards transnationalism which has occurred in the historiography in the recent years This book will be of interest to students of Cold War Studies science and technology studies and International Relations

Diffusion of New Technologies in the Post-Communist World Y.M. Rabkin, 2013-03-11 The end of this century has witnessed dramatic changes in morality history and geography These changes were felt throughout the world and also across the entire gamut of professional concerns Even relatively remote and seemingly insulated activities such as science and technology have experienced and up to a point contributed to these dramatic changes This volume presents a series of views on the effect of these changes on science and technology and more specifically on the international diffusion of new technologies These views come from a variety of fields among them history and sociology of science political science information sciences marketing Yet most authors share an interest in science policy studies which permeates this collection It would be fair to say that this volume belongs to the intellectual domain known as STS i e studies in Science Technology and Society The authors come from nine countries and their contributions are expected to reflect this diversity It is well known that the dominant lingua franca in the end of the 20th century is Broken English with the possible exception of a minority of native English speakers some of whom fail to learn this new language An attempt was therefore made throughout this volume to conform to a certain standard of English usage and at the same time to preserve the local flavour of expression and the stylistic and cultural dimensions of each chapter

Energy Abstracts for Policy Analysis , 1986 **The ^ADigital Flood** Dr. James W. Cortada, 2013-02-01 In this book historian James W Cortada provides the first world wise history of how computers appeared and spread to over twenty nations in less than six decades It explores economic political social and technological reasons and consequences It is based on extensive research into primary and secondary sources and concludes with a

discussion of implications for key players in the globalized economy *World Economy and Its Main Development Tendencies* J. Nyilas, 2013-06-29 A great many socio economic events of the utmost importance have taken place in rapid succession in the historically short period of hardly more than three decades After the Second World War the pace of socio economic progress has experienced an unprecedented acceleration This is nothing new in itself Social formations and the corresponding productive forces prior w socialism had also followed each other at a rapidly increasing rate Acceleration can also be witnessed in the accumulation of human knowledge in the fields of science and technology Parallel with the development of the productive forces the growth of population has been exponential More than one and a half thousand years were needed for the world population to double since the beginning of our era whereas it takes now less than 40 years The emergence of capitalism the appearance of mechanized mass production brought about a radical change in the general progress of human civilization It opened up the machine age The classics of Marxism highly appreciated the new power and labour machines and the resulting growth in production and stated that the productive forces created under capitalism had far surpassed those brought about by all earlier societies taken together This is true even though the technology of that time looked upon in hindsight had produced hardly more than primitive steam engines and simple labour machines which have by now become for the most part relics of technical history *A History of Eastern Europe* Robert Bideleux, Ian Jeffries, 2007-09-12 This welcome second edition of *A History of Eastern Europe* provides a thematic historical survey of the formative processes of political social and economic change which have played paramount roles in shaping the evolution and development of the region Subjects covered include Eastern Europe in ancient medieval and early modern times the legacies of Byzantium the Ottoman Empire and the Habsburg Empire the impact of the region's powerful Russian and Germanic neighbours rival concepts of Central and Eastern Europe the experience and consequences of the two World Wars varieties of fascism in Eastern Europe the impact of Communism from the 1940s to the 1980s post Communist democratization and marketization the eastward enlargement of the EU *A History of Eastern Europe* now includes two new chronologies one for the Balkans and one for East Central Europe and a glossary of key terms and concepts providing comprehensive coverage of a complex past from antiquity to the present day *International Political Economy and Socialism* Marie Lavigne, 1991-03-14 This book first published in 1991 is a revised and updated version of Professor Marie Lavigne's best seller *Economie Internationale des Pays Socialistes* *NATO Review*, 1977 *New Energies* Stephen G. Gross, Andrew Needham, 2023-02-28 Over the past 250 years energy transitions have occurred repeatedly the rise of coal in the nineteenth century the explosion of oil in the twentieth century the nuclear utopianism of the 1950s and 1960s These transitions have been as revolutionary as any political or economic upheaval and they required changes in infrastructure and behavior Yet new energies never wholly replace old ones This volume historicizes energy production and consumption while demonstrating how energy use has reshaped everything from social life and economic organization to political governance It

foregrounds the importance of energy for big historical questions about capitalism democracy inequality the environment and identity and it argues that energy systems themselves merit attention as key agents of historical change Given the urgency of climate change and the central position that energy plays in causing and potentially solving global warming this volume engages history as a discipline in the debate over what may be most monumental energy transition of all time the shift away from fossil fuels Technology Transfer in the Developing Countries Manas Chatterji,2016-07-27 The objective of this book is to present the problems and possibilities of transferring technology from the developed countries to the developing countries to raise their standard of living It develops the conceptual issues legal ramifications empirical testing of mathematical models and case studies of different industries in many countries It contains articles by distinguished scholars in the field practitioners and government officials It is an important supplement to the hands on approach used by many private industries and national and international organizations The unique feature of this book is that it is multidisciplinary and that it has a balanced combination of abstract theoretical approaches and practical considerations Fossil Energy Update ,1982 *COMECON's Mineral Development Potential and Its Implications for Canada* N. M. Switucha,Canada. Minerals,1979
