Technology In Today's Schools:

Digital Schools Darrell M. West, 2013-07-15 Nearly a century ago famed educator John Dewey said that if we teach today's students as we taught yesterday's we rob them of tomorrow. That wisdom resonates more strongly than ever today and that maxim underlies this insightful look at the present and future of education in the digital age. As Darrell West makes clear, today's educational institutions must reinvent themselves to engage students successfully and provide them with the skills needed to compete in an increasingly global technological and online world. Otherwise the American education system will continue to fall woefully short in its mission to prepare the population to survive and thrive in a rapidly changing world. West examines new models of education made possible by enhanced information technology: new approaches that will make public education in the post-industrial age more relevant, efficient, and ultimately more productive. Innovative pilot programs are popping up all over the nation, experimenting with different forms of organization and delivery systems. *Digital Schools* surveys this promising new landscape, examining in particular personalized learning, real-time student assessment, ways to enhance teacher evaluation, the untapped potential of distance learning, and the ways in which technology can improve the effectiveness of special education and foreign language instruction. West illustrates the potential contributions of blogs, wikis, social media, and video games, and augmented reality in K-12 and higher education. Technology by itself will not remake education. But if today's schools combine increased digitization with needed improvements in organization, operations, and culture, we can overcome current barriers, produce better results, and improve the manner in which schools function. And we can get back to teaching for tomorrow rather than for yesterday. Technology in Schools Kevin P. Brady, 2012-08-14

Education of America's school children always has been and always will be a hot button issue. From what should be taught to how to pay for education to how to keep kids safe in schools, impassioned debates emerge and mushroom both within the scholarly community and among the general public. This volume in the point-counterpoint *Debating Issues in American Education* reference series tackles the topic of technology in schools. Fifteen to twenty chapters explore such varied issues as the digital divide, electronic textbooks, impacts on curricula, privacy on school computers, web censorship, and more. Each chapter opens with an introductory essay by the volume editor, followed by point-counterpoint articles written and signed by invited experts, and concludes with Further Readings and Resources, thus providing readers with views on multiple sides of technology issues within America's schools and pointing them toward more in-depth resources for further exploration.

Rethinking Education in the Age of Technology Allan Collins, Richard Halverson, 2018-04-13 How can schools make the most of both the technology and the learning potential of today's born-digital students? Allan Collins and Richard Halverson argue that new technologies have transformed our workplaces, our lives, and our culture, and it is time that we take the next step to transform learning in and out of schools. This book explains why and how today's educators, policymakers, and communities must adapt to provide all learners with access to the new learning tools of the 21st century. From publisher's

library's web presence through websites, blogs, and social networking as well as on various tools that you can use and apply to your curriculum. Many state standards include technology components, and this guide shows you how to meet them and stay up to date. You'll also learn what you should watch for in the future so you remain essential to your school.

Technology and the School Library Odin L. Jurkowski, 2010-05-11 For school librarians, technology has become an essential component of their work. To meet the growing need in this area, Odin Jurkowski wrote *Technology and the School Library* in 2006. To address the rapidly and continually changing advancements in technology, however, a more current text is needed. In this revised edition, Jurkowski provides an overview of the types of technologies used in school libraries, from traditional low-tech options to the latest developments, describing how the school librarian interacts with and works with the technology. Updated throughout, this edition addresses the continuously changing nature of technology, including a new chapter covering web 2.0 tools and their use in education. Major topics covered in this volume include information resources in the school library, the different varieties of educational software, available resources available via the web, and the importance of creating a school library web site. This book also addresses tools that can be used in classrooms and technology administration, everything from automation and filters to security on student computers and security systems in general.

Encyclopedia of E-Leadership, Counseling and Training Wang, Viktor, 2011-08-31 *Encyclopedia of E-Leadership, Counseling and Training* offers an in-depth description of key terms and concepts related to different themes, issues, and trends in educational leadership, counseling, and technology integration in modern universities and organizations worldwide. This three-volume work serves as an exhaustive compendium of expertise, research, skills, and experiences. Authors with a background in education, leadership, counseling, management, human resource development, or adult education have helped to encourage the education and training of potential leaders with this scholarly work.

Current Issues in School Leadership Larry W. Hughes, 2005-01-15 *Current Issues in School Leadership* examines controversies about and affecting school practices. Focusing on two essential questions: what is important to today's school leaders and what is interfering with schooling processes, it includes chapters by a broad range of authors with expertise on their specific topic. The text is organized in three sections: Social and Political Issues, Curriculum and Learning Issues, and Organization and Management Issues. The goal of this text, designed for school leadership, educational administration, and foundations of education courses, is to challenge readers to think carefully and critically about each of the issues presented, leading to positive action and leadership.

The New School Leader for the 21st Century, the Principal Edward H. Seifert, James A. Vornberg, 2002 Addressing the six standards created by the Interstate School Leaders Consortium (ISLLC), Seifert and Vornberg employ case studies to discuss those issues faced by practicing elementary and secondary principals. Each chapter concludes with student activities that address the concepts discussed in the chapter. An instructor's manual is also available as a separate purchase.
