knowledge transfers      *A Macro Perspective on Technology Transfer* Allan Reddy, 1996-08-30 Dr Reddy points out that the key to economic success particularly for the less developed countries of the world is technology but only when properly applied. Despite years of help through technology transfer, however, many LDCs are still impoverished. This leads him to conclude that either the wrong technologies were transferred or the right ones were not transferred. His book thus focuses on ways in which LDCs can improve their economic growth through technology transfer, arguing that it is the assimilation of technology into their socioeconomic and cultural structures that is critical to their economic development, not the indiscriminate borrowing from advanced nations. In doing so, Dr Reddy presents a behavioral model which proves that technology absorption is just as if not more important than a simple transfer process. A challenging research-based discussion for academics in economics, business, sociology, marketing, and management, and for business and government policymakers worldwide, Dr Reddy introduces the concepts related to technology transfer and discusses the major participants in the worldwide transfer enterprise. He presents barriers and ways to overcome them. In technology transferral, he explores the ethical dimensions and then lays out his technology transfer assimilation model. He applies the model to a specific and representative developing country, India, and ends with a discussion of conclusions that can be drawn from it. His three appendixes elaborate on the need for and methods to transfer technology to LDCs, provide ways to analyze the costs, and present a model of reciprocal distribution that may benefit both the donor and the recipient country in the transfer process.      *University Technology Transfer* Tom Hockaday, 2020-04-07 Demystifying technology transfer, an increasingly important but little understood aspect of research universities' mission. How do we transfer the brilliance of university research results into new products, services, and medicines to benefit society? University research is creating the technologies of tomorrow in the fields of medicine, engineering, information technology, robotics, and artificial intelligence. These early stage technologies need investment from existing and new businesses to benefit society. But how do we connect university research outputs with business and investors? This process, Tom Hockaday explains, is what university technology transfer is all about: identifying, protecting, and marketing university research outputs in order to shift opportunities from the university into business. In this detailed introductory book, a comprehensive overview of and guide to the subject, Hockaday, an internationally recognized technology transfer expert, offers up his insider observations, opinions, and suggestions about university technology transfer. He also explains how to develop, strategically operate, and fund university technology transfer offices while behaving in accordance with the central mission of the university. Aimed at people who work in or with university technology transfer offices, as well as anyone who wants to learn the basics of what is involved, *University Technology Transfer* speaks to a global audience. Tackling a complex topic in clear language, the book reveals the impressive scale of patenting, licensing, and spin-out company creation while also demonstrating that university technology transfer is a commercial activity with benefits that go well beyond the opportunity to make money.      **Technology Transfer, Innovation, and International Competitiveness**
