European Heritage, Dialogue and Digital Practices Areti Galani, Rhianon Mason, Gabi Arrigoni, 2019-07-09 European Heritage Dialogue and Digital Practices focuses on the intersection of heritage dialogue and digital culture in the context of Europe Responding to the increased emphasis on the potential for heritage and digital technologies to foster dialogue and engender communitarian identities in Europe the book explores what kind of role digital tools platforms and practices play in supporting and challenging dialogue about heritage in the region Drawing on fieldwork involving several European museums and heritage organisations the chapters in this volume critically engage with the role of digital technology in heritage work and its association with ideas of democratisation multivocality and possibilities for feedback and dialogic engagement in the emerging digital public sphere The book also provides a framework for understanding dialogue in relation to other commonly used approaches in heritage institutions such as participation engagement and intercultural exchange The authors map out the complex landscape of digitally mediated heritage practices in Europe both official and unofficial by capturing three distinct areas of practice perceptions and applications of digitally mediated dialogues around heritage within European museums and cultural policy facilitation of dialogue between European museums and communities through participatory design approaches and non official mobilisation of heritage on social media European Heritage Dialogue and Digital Practices will be of interest to both scholars and students in the fields of heritage and museum studies digital heritage media studies and communication the digital humanities sociology and memory studies

The book will also appeal to policy makers and professionals working in a variety of different fields **Technology, Culture, Family** E. Silva, 2010-07-28 This book examines connections between personal relational and material matters in everyday life in the context of broader and long standing social problems It explores the connections between mundane practices in the reproduction of our bodies and our relations with those we live with and the technological practices that inform daily life **Cultural Politics and Political Culture in Postmodern Europe**, 1997-01-01 The present volume assembles essays from a broad cultural and professional spectrum around the question of European cultural identity The heterogeneity of the contributors their differing points of departure and methods attests to a tension in intellectual communities which today is more intense than ever Europe's identity crisis is not merely an empirical matter It reflects a far deeper and far older discursive crisis The mandate of Europe's traditional intellectual institutions to preserve and police their own cultural heritage has proved incapable of evolving in a manner sufficient to account for the mutation in its object European culture It is not merely that Europe's identity like any identity in the flux of history has changed Rather the notion of identity the very basis of any questions of who we are where we are going and the appropriate political forms and social institutions for further existence all rely on a logic of identity which has at best become extremely problematic It is this problematization which provides the common thread unifying the following essays Each contributor in his/her own way and with respect to his/her own research object confronts the adequacy of the concept of cultural identity The hidden presuppositions of this concept are indeed remarkable and the logic of cultural identity prescribes that they remain undisclosed *The Material Culture of Basketry* Stephanie Bunn, Victoria Mitchell, 2020-10-29 The Material Culture of Basketry celebrates basketry as a culturally significant skilled practice and as a theoretically rich discipline which has much to offer contemporary society While sometimes understudied and underappreciated it has much in common with mathematics and engineering art craft and design and can also act as a socially beneficial source of skill and care Contributors show how local knowledge of materials plants and place are central to the craft Case studies include the skill in weaverbird nest building challenging how we perceive learning in craft and nature an engineer's perspective on twining Peruvian grass bridges and the local knowledge embodied in Pacific plaited patterns and knots Photo essays explore materials and techniques from the point of view of artists anthropologists and mathematicians revealing how the structure and skill in basketwork illustrate a significant form of textile technology Thus the book argues that the textures patterns and geometric forms that emerge through basketwork reflect an embodied knowledge which expresses mathematical and engineering comprehension The therapeutic value of the craft is recognised through a selection of case studies which consider basketry as a healing process for patients with brain injury mental health problems and as a memory aid for people living with dementia This reclaims basketry's significant role in occupational therapy as an agent of recovery and well being Finally basketry's inherently sustainable nature is also considered demonstrating the continuation of basketry in spite of handwork's

general decline and profiling new and recycled materials Above all the book envisages basketry as an intellectually rewarding means of knowing It presents the craft as embodying care for skilled making and for the social and natural environments in which it flourishes
