## **Technology And Place Sustainable Architecture And The Blueprint Farm:**

*Technology and Place* Steven A. Moore, 2001-07-15 Developing sustainable architectural and agricultural technologies was the intent behind Blueprint Farm In this book Steven Moore demonstrates how the various stakeholders competing definitions of sustainability technology and place ultimately doomed Blueprint Farm

*Technology and Place* Steven A. Moore, 2011-01-20 Developing sustainable architectural and agricultural technologies was the intent behind Blueprint Farm an experimental agricultural project designed to benefit farm workers displaced by the industrialization of agriculture in the Rio Grande Valley of Texas Yet despite its promise the very institutions that created Blueprint Farm terminated the project after just four years 1987 1991 In this book Steven Moore demonstrates how the various stakeholders competing definitions of sustainability technology and place ultimately doomed Blueprint Farm He reconstructs the conflicting interests and goals of the founders including Jim Hightower and the Texas Department of Agriculture Laredo Junior College and the Center for Maximum Potential Building Systems and shows how ironically they unwittingly suppressed the self determination of the very farm workers the project sought to benefit From the instructive failure of Blueprint Farm Moore extracts eight principles for a regenerative architecture which he calls his nonmodern manifesto

**Home Ground and Foreign Territory** Janice Fiamengo, 2014-04-03 Home Ground and Foreign Territory is an original collection of essays on early Canadian literature in English Aiming to be both provocative and scholarly it encompasses a variety of sometimes opposing perspectives subjects and methods with the aim of reassessing the field unearthing neglected texts and proposing new approaches to canonical authors Renowned experts in early Canadian literary studies including D M R Bentley Mary Jane Edwards and Carole Gerson join emerging scholars in a collection distinguished by its clarity of argument and breadth of reference Together the essays offer bold and informative contributions to the study of this dynamic literature Home Ground and Foreign Territory reaches out far beyond the scope of early Canadian literature Its multi disciplinary approach innovates literary studies and appeals to literature specialists and general readership alike

*Urban Assemblages* Ignacio Fariás, Thomas Bender, 2012-08-21 This book takes it as a given that the city is made of multiple partially localized assemblages built of heterogeneous networks spaces and practices The past century of urban studies has focused on various aspects space culture politics economy but these too often address each domain and the city itself as a bounded and cohesive entity The multiple and overlapping enactments that constitute urban life require a commensurate method of analysis that encompasses the human and non human aspects of cities from nature to socio technical networks to hybrid collectivities physical artefacts and historical legacies and the virtual or imagined city This book proposes and its various chapters offer demonstrations importing into urban studies a body of theories concepts and perspectives developed in the field of science and technology studies STS and more specifically Actor Network Theory ANT The essays examine artefacts technical systems architectures place and eventful spaces the persistence of history imaginary and virtual elements of city life and the politics and ethical challenges of

a mode of analysis that incorporates multiple actors as hybrid chains of causation The chapters are attentive to the multiple scales of both the object of analysis and the analysis itself The aim is more ambitious than the mere transfer of a fashionable template The authors embrace ANT critically as much as a metaphor as a method of analysis deploying it to think with to ask new questions to find the language to achieve more compelling descriptions of city life and of urban transformations By greatly extending the chain or network of causation proliferating heterogeneous agents non human as well as human without limit as to their enrolment in urban assemblages Actor Network Theory offers a way of addressing the particular complexity and openness characteristic of cities By enabling an escape from the reification of the city so common in social theory ANT's notion of hybrid assemblages offers richer framing of the reality of the city of urban experience that is responsive to contingency and complexity Therefore Urban Assemblages is a pertinent book for students practitioners and scholars as it aims to shift the parameters of urban studies and contribute a meaningful argument for the urban arena which will dominate the coming decades in government policies **Technonatures** Damian F. White,Chris Wilbert,2010-04-05

Environmentalism and social sciences appear to be in a period of disorientation and perhaps transition In this innovative collection leading international thinkers explore the notion that one explanation for the current malaise of the politics of ecology is that we increasingly find ourselves negotiating technonatural space times International contributors map the political ecologies of our technonatural present and indicate possible paths for technonatural futures The term technonatures is in debt to a long line of environmental cultural theory from Raymond Williams onwards problematizing the idea that a politics of the environment can be usefully grounded in terms of the rhetoric of defending the pure the authentic or an idealized past solely in terms of the ecological or the natural In using the term technonatures as an organizing myth and metaphor for thinking about the politics of nature in contemporary times this collection seeks to explore one increasingly pronounced dimension of the social natures discussion Technonatures highlights a growing range of voices considering the claim that we are not only inhabiting diverse social natures but that within such natures our knowledge of our worlds is ever more technologically mediated produced enacted and contested Public Interest Design Practice Guidebook Lisa M. Abendroth,Bryan Bell,2015-04-24 Public Interest Design Practice Guidebook Seed Methodology Case Studies and Critical Issues is the first book to demonstrate that public interest design has emerged as a distinct profession It provides clear professional standards of practice following SEED Social Economic Environmental Design methodology the first step by step process supporting public interest designers The book features an Issues Index composed of ninety critical social economic and environmental issues illustrated with thirty case study projects representing eighteen countries and four continents all cross referenced to show you how every human issue is a design issue Contributions from Thomas Fisher Heather Fleming and David Kaisel Michael Cohen Michael P Murphy Jr and Alan Ricks and over twenty others cover topics such as professional responsibility public interest design business development design evaluation and capacity building through

scaling along with many more Themes including public participation issue based design and assessment are referenced throughout the book and provide benchmarks toward an informed practice This comprehensive manual also contains a glossary an appendix of engagement methods a case study locator atlas and a reading list Whether you are working in the field of architecture urban planning industrial design landscape architecture or communication design this book empowers you to create community centered environments products and systems Unbuilding Cities Anique Hommels, 2008-08-29 City planning initiatives and redesign of urban structures often become mired in debate and delay Despite the fact that cities are considered to be dynamic and flexible spaces never finished but always under construction it is very difficult to change existing urban structures they become fixed obdurate securely anchored in their own histories as well as in the histories of their surroundings In Unbuilding Cities Anique Hommels looks at the tension between the malleability of urban space and its obduracy focusing on sites and structures that have been subjected to unbuilding redesign or reconfiguration She brings the concepts of science and technology studies STS to bear on the study of cities Viewing the city as a large sociotechnological artifact she demonstrates the usefulness of STS tools that were developed to analyze other technological artifacts and explores in detail the role of obduracy in sociotechnical change Her analysis distinguishes three concepts of obduracy interactionist in which actors with diverging views are constrained by fixed ways of thinking and interacting relational in which change is difficult because of technology's embeddedness in sociotechnical networks and enduring in which persistent traditions influence the development of technology over time Hommels examines the tensions between obduracy and change in three urban redesign projects in the Netherlands a renovated city center that fell into drabness and disrepair a highway system that runs through a densely populated urban area and a high rise housing project designed according to modernist precepts and built for middle class families that became a haven for unemployment and crime Unbuilding Cities contributes to a productive fusion of STS and urban studies Sustainable Architectures Simon Guy, Steven A. Moore, 2005 As buildings are responsible for fifty per cent of CO2 emissions their design has become the focus of intense technical scrutiny Knowing how to build more technically efficient or ecologically responsible buildings and being able to assemble the social resources to do so requires different forms of knowledge and practice There is wide contestation over the optimal pathways to greener buildings design and great diversity in practices of sustainable architecture This volume brings together leading researchers from across the European Union and North America both to illustrate the diversity of practice and to provide a critical commentary on this key debate The reader is provided with an introduction to competing perspectives on the sustainable architecture debate international exemplars of differing practice and an overview of new theoretical and methodological resources for understanding and meeting the conceptual social and technical challenges of sustainable architecture

**Planning Forum**, 2003 *Architecture & Sustainable Development (vol.1)* Magali Bodart, Arnaud Evrard, 2011-07 This book of Proceedings presents the latest thinking and research in the rapidly evolving world of architecture and sustainable

development through 255 selected papers by authors coming from over 60 countries      Questioning Architectural Judgment Steven A. Moore, Barbara B. Wilson, 2013-07-24 The book shines light on the problem of judgment particularly in the realm of architectural technics and the codes that regulate it The struggle to define sustainability and thus judge architecture through such lenses is but one dimension of the contemporary problem of judgment By providing the reader with an inherently interdisciplinary study of a particular discipline architecture it brings to the topic lenses that challenge the too frequently unexamined assumptions of the discipline By situating architecture within a broader cultural field and using case studies to dissect the issues discussed the book emphasizes that it is not simply a matter of designing better more efficient or more stringent codes to guide place making but a matter of reconstructing the boundaries of the systems to be coded The authors are winners of the EDRA Place Research Award 2014 for their work on the Green Alley Demonstration Project used in the book      **Technology and Values** Craig Hanks, 2009-05-04 This anthology features essays and book excerpts on technology and values written by preeminent figures in the field from the early 20th century to the present It offers an in depth range of readings on important applied issues in technology as well Useful in addressing questions on philosophy sociology and theory of technology Includes wide ranging coverage on metaphysics ethics and politics as well as issues relating to gender biotechnology everyday artifacts and architecture A good supplemental text for courses on moral or political problems in which contemporary technology is a unit of focus An accessible and thought provoking book for beginning and advanced undergraduates yet also a helpful resource for graduate students and academics      **Cite**, 2002      **Architectural Regionalism** Vincent B. Canizaro, 2012-03-20 In this rapidly globalizing world any investigation of architecture inevitably leads to considerations of regionalism But despite its omnipresence in contemporary practice and theory architectural regionalism remains a fluid concept its historical development and current influence largely undocumented This comprehensive reader brings together over 40 key essays illustrating the full range of ideas embodied by the term Authored by important critics historians and architects such as Kenneth Frampton Lewis Mumford Sigfried Giedion and Alan Colquhoun Architectural Regionalism represents the history of regionalist thinking in architecture from the early twentieth century to today      Routledge Handbook of Global Environmental Politics Paul G. Harris, 2013-10-15 This handbook provides a comprehensive and authoritative survey of Global Environmental Politics It brings together leading international academic experts and features 40 chapters that Describe the history of global environmental politics as a discipline and explain the various theories and perspectives used by scholars and students to understand it Examine the key actors and institutions in global environmental politics explaining the role of states international organizations regimes international law foreign policy institutions domestic politics corporations and transnational actors Address the ideas and themes shaping the practice and study of global environmental politics including sustainability consumption expertise uncertainty security diplomacy North South relations globalisation justice ethics participation and citizenship Assess the key issues and policies within global
