Technology In The Garden Research Parks And Regional Economic Development:

Technology in the Garden Michael Ian Luger, 1991 Research Triangle Park North Carolina Stanford Research Park California University of Utah Research Park public policy *Technology and Industrial Parks in Emerging Countries* Andrés Rodríguez-Pose, Daniel Hardy, 2014-06-16 Industrial and technology parks are commonly regarded as a policy panacea They tend to be considered as the ideal instrument to alleviate an assortment of institutional political economic social and ultimately technological weaknesses and often form the centrepiece of development strategies Yet the real impact of industrial and technology parks especially in emerging countries is still poorly understood Focusing on examples from Latin America Asia Africa and the Middle East the book represents a first approach to understand the potential and reality of industrial and technology parks in emerging countries It is argued that although some parks have been successful in addressing a range of key problems including underdevelopment unemployment and a lack of investment the majority have failed to deliver rendering the promise of many parks little more than a pipedream Understanding Research, Science and Technology Parks National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Comparative Innovation Policy: Best Practice for the 21st Century, 2009-09-08 Many nations are currently adopting a variety of directed strategies to launch and support research parks often with significant financial commitments and policy support By better understanding how research parks of other nations operate we can seek to improve the scale and contributions of parks in the U S To that end the National Academies convened an international conference on global best practices in research parks This volume a report of the conference includes discussion of the diverse roles that research parks in both universities and laboratories play in national innovation systems The presentations identify common challenges and demonstrate substantial differences in research park programs around the world A Review of the New Initiatives at the NASA Ames Research Center National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, 2001-06-23 NASA Ames Research Center in the heart of Silicon Valley is embarking on a program to develop a science and technology park bringing together leading companies and universities to capitalize on Ames exceptional mission and location Other initiatives under consideration include the integration of SBIR grants with a planned on site incubator virtual collaboration and possibly a new public venture capital program The STEP Board was asked by the NASA Administrator to hold a one day symposium to review these initiatives This report includes commissioned research papers and a summary of the proceedings of the symposium organized in response to the NASA request Technological Change and Regional Development in Europe Ludwig Schätzl, Javier Revilla Diez, 2012-12-06 This book presents the findings of the extensive research programme funded by the Deutsche Forschungsgemeinschaft German Research Council and entitled Technological Change and Regional Development in Europe The goal of this programme was to carry out research by means of empirical surveys into the relationship between technological change and regional

development Over a period of six years a total of 50 research projects have been undertaken in three phases each lasting two years This research programme has succeeded in actively involving leading German regional scientists from many universities as well as non university research institutions In addition numerous research projects were carried out in close co operation with internationally renowned partners We should like to express our gratitude for the support provided by the Deutsche Forschungsgemeinschaft Without their financial backing of the research programme it would not have been possible to undertake such an ambitious project Thanks also go to the contributors of this volume for their willingness to participate in our joint project We wish in addition to acknowledge the contribution of Prof Dr Philip Cooke whose refereeing of the chapters has enhanced the quality of the work presented here Finally our thanks go to Angela Spence for her expert editorial assistance linguistic editing and the preparation of the Index and also Franco Vaio for taking care of the technical aspects and production of the final copy Their combined efforts have been crucial for successfully bringing together contributions from so many different authors in a single volume

Local Heroes in the Global Village David B.

Audretsch, Heike Grimm, Charles W. Wessner, 2006-06-03 Entrepreneurship and growth are central concerns of policy makers around the world *Local Heroes in the Global Village* introduces public policies for the promotion of entrepreneurship on a comparative primarily German American level The book contributes to the debate what role public policies play in stimulating national and regional economic growth With a better understanding of the complexity and variety of existent entrepreneurship policies in the U S and Germany the reader of this volume will be able to formulate best practice hands on strategies which aim to promote nations as well as regions in an entrepreneurial economy

The ^AEntrepreneurial Society David B. Audretsch, 2007-07-02 In this book award winning economist David B Audretsch identifies the positive proactive response to globalization the entrepreneurial society where change is the cutting edge and routine work is inevitably outsourced The author documents the fundamental policy revolution underway shifting the focus to technology and knowledge based entrepreneurship where start ups and small businesses have emerged as the driving force of innovation jobs competitiveness and growth By understanding the shift from the managed economy and the emergence of the entrepreneurial society individuals businesses and communities can learn how to proactively harness the opportunities afforded by globalization in this new entrepreneurial society

Boulevard of Broken Dreams Josh Lerner, 2009-09-28 How

governments can do a better job of supporting entrepreneurship and venture capital Silicon Valley Singapore Tel Aviv the global hubs of entrepreneurial activity all bear the marks of government investment Yet for every public intervention that spurs entrepreneurial activity there are many failed efforts that waste untold billions in taxpayer dollars When has governmental sponsorship succeeded in boosting growth and when has it fallen terribly short Should the government be involved in such undertakings at all *Boulevard of Broken Dreams* is the first extensive look at the ways governments have supported entrepreneurs and venture capitalists across decades and continents Josh Lerner one of the foremost experts in

the field provides valuable insights into why some public initiatives work while others are hobbled by pitfalls and he offers suggestions for how public ventures should be implemented in the future Discussing the complex history of Silicon Valley and other pioneering centers of venture capital Lerner uncovers the extent of government influence in prompting growth He examines the public strategies used to advance new ventures points to the challenges of these endeavors and reveals the common flaws undermining far too many programs poor design a lack of understanding for the entrepreneurial process and implementation problems Lerner explains why governments cannot dictate how venture markets evolve and why they must balance their positions as catalysts with an awareness of their limited ability to stimulate the entrepreneurial sector As governments worldwide seek to spur economic growth in ever more aggressive ways Boulevard of Broken Dreams offers an important caution The book argues for a careful approach to government support of entrepreneurial activities so that the mistakes of earlier efforts are not repeated University, Inc. Jennifer Washburn, 2008-08-01 Our federal and state tax dollars are going to fund higher education If corporations kick in a little more should they be able to dictate the research or own the discoveries During the past two decades commercial forces have quietly transformed virtually every aspect of academic life Corporate funding of universities is growing and the money comes with strings attached In return for this funding universities and professors are acting more and more like for profit patent factories university funds are shifting from the humanities and the less profitable science departments into research labs and the skill of teaching is valued less and less Slowly but surely universities are abandoning their traditional role as disinterested sources of education alternative perspectives and wisdom This growing influence of corporations over universities affects more than just today's college students and their parents it compromises the future of all those whose careers depend on a university education and all those who will be employed governed or taught by the products of American universities

Infrastructure and the Complexity of Economic Development David F. Batten, Charlie Karlsson, 2012-12-06 The book examines the complex relationships between infrastructure and the rest of the economy In particular it focuses on the contentious issue of whether infrastructure investments stimulate productivity growth issues of pricing and ownership and also development problems such as environmental damage Methods range from traditional production function models and compensating variation approaches to nonlinear methods of dynamic analysis There is a unique emphasis on the ability of these different methods to allow for the complex interdependencies involved Six of the fifteen papers deal with these methodological aspects whereas the remainder addresses specific cases or examples in a variety of countries Europe USA and developing countries *Fred Terman at Stanford* C. Stewart Gillmor, 2004 Terman was widely hailed as the magnet that drew talent together into what became known as Silicon Valley

BOOK JACKET Brain Magnet Alex Sayf Cummings, 2020-04-28 Beginning in the 1950s a group of academics businesspeople and politicians set out on an ambitious project to remake North Carolina's low wage economy They pitched the universities of Raleigh Durham and Chapel Hill as the kernel of a tech hub Research Triangle Park

which would lure a new class of highly educated workers In the process they created a blueprint for what would become known as the knowledge economy a future built on intellectual labor and the production of intellectual property In Brain Magnet Alex Sayf Cummings reveals the significance of Research Triangle Park to the emergence of the high tech economy in a postindustrial United States She analyzes the use of ideas of culture and creativity to fuel economic development how workers experienced life in the Triangle and the role of the federal government in bringing the modern technology industry into being As Raleigh Durham and Chapel Hill were transformed by high tech development the old South gave way to a distinctly new one which welded the intellectual power of universities to a vision of the suburban good life Cummings pinpoints how the story of the Research Triangle sheds new light on the origins of today's urban landscape in which innovation as exemplified by the tech industry is lauded as the engine of economic growth against a backdrop of gentrification and inequality Placing the knowledge economy in a broader cultural and intellectual context Brain Magnet offers vital insight into how tech driven development occurs and the people and places left in its wake

Planning Local Economic Development Edward J. Blakely, Nancey Green Leigh, 2013-04-17 Now thoroughly updated for the challenges of the 21st century and with new coverage of sustainability the Fifth Edition explores the theories of local economic development while addressing the issues and opportunities faced by cities towns and local entities to craft their economic destinies within the global economy Jacket

Creating the Market University Elizabeth Popp Berman, 2011-12-19 When science adopts the logic of the market American universities today serve as economic engines performing the scientific research that will create new industries drive economic growth and keep the United States globally competitive But only a few decades ago these same universities self consciously held themselves apart from the world of commerce Creating the Market University is the first book to systematically examine why academic science made such a dramatic move toward the market Drawing on extensive historical research Elizabeth Popp Berman shows how the government influenced by the argument that innovation drives the economy brought about this transformation Americans have a long tradition of making heroes out of their inventors But before the 1960s and 70s neither policymakers nor economists paid much attention to the critical economic role played by innovation However during the late 1970s a confluence of events industry concern with the perceived deterioration of innovation in the United States a growing body of economic research on innovation's importance and the stagnation of the larger economy led to a broad political interest in fostering invention The policy decisions shaped by this change were diverse influencing arenas from patents and taxes to pensions and science policy and encouraged practices that would focus specifically on the economic value of academic science By the early 1980s universities were nurturing the rapid growth of areas such as biotech entrepreneurship patenting and university industry research centers Contributing to debates about the relationship between universities government and industry Creating the Market University sheds light on how knowledge and politics intersect to structure the economy

Promoting Local Growth Daniel

Felsenstein, Michael Taylor, 2019-05-24 This title was first published in 2001 Focusing on new industries policies and new forms of governance the internationally renowned contributors to this volume examine the factors promoting the sub national economic growth that is paradoxically occurring in an era of globalization *Silicon Valley and the Environmental Inequalities of High-Tech Urbanism* Jason A. Heppler, 2024-04-23 In the half century after World War II California's Santa Clara Valley transformed from a rolling landscape of fields and orchards into the nation's most consequential high tech industrial corridor How Santa Clara Valley became Silicon Valley and came to embody both the triumphs and the failures of a new vision of the American West is the question Jason A Heppler explores in this book A revealing look at the significance of nature in social cultural and economic conceptions of place the book is also a case study on the origins of American environmentalism and debates about urban and suburban sustainability Between 1950 and 1990 business and community leaders pursued a new vision of the landscape stretching from Palo Alto to San Jose a vision that melded the bucolic naturalism of orchards pleasant weather and green spaces with the metropolitan promise of modern industry government funded research and technology Heppler describes the success of a new clean future facing economy coupled with a pleasant green environment in drawing people to Silicon Valley And in this overwhelming success he also locates the rapidly emerging faults created by competing ideas about forming these idyllic communities specifically widespread environmental degradation and increasing social stratification Cities organized around high tech industries suburban growth and urban expansion were as Heppler shows crucibles for empowering elites worsening human health and spreading pollution What do nature and place mean and who gets to define these terms Key to Heppler's work is the idea that these questions reflect and determine what and who matters in any conversation about the environment *Silicon Valley and the Environmental Inequalities of High Tech Urbanism* vividly traces that idea through the linked histories of Silicon Valley and environmentalism in the West Small Firms and Network Economies Martin Perry, 2012-12-06 Recent development experience points to the way business can be the key to a dynamic small business sector especially where those links are built on high trust co operative relations This book reviews different types of small business network illustrated by an international selection of case studies including Chinese family business networks ethnic minority business networks Japanese and South Korean business group networks Taiwan's subcontracting networks European industrial districts Network promotion initiatives in Singapore New Zealand Scandinavia and the UK are each discussed to provide a comprehensive comparative assessment of small business networks *Local Economic and Employment Development (LEED) Local Partnerships for Better Governance* OECD, 2001-10-24 This book presents the lessons learned from the most recent experiences in seven countries Austria Belgium Denmark Finland Ireland Italy and the United States This book proposes a strategy that governments can implement to improve governance through partnerships **Administrative System Innovation and Building a Public Service-Oriented Government** Marc Holzer, Wei Hu, Mengzhong

Zhang,2019-11-15 From the late 1970s until the present day the New Public Management movement flourished in the United Kingdom New Zealand Australia and a number of other countries over the globe Nowadays governments across the world are more service oriented than previously and administrative system innovations are encouraging new ways of improving public services Increasingly more and more countries are witnessing administrative innovations to provide better quicker and more efficient and effective service to the public To this end this collection of essays highlights public service theory and practices While some chapters concentrate on innovation in administrative systems others pay attention to more theoretic and practical issues A few examine municipal level public service and innovation whereas others focus on environment community policing public infrastructure partnership governance and e service and e participation as well as citizen participation The book represents an excellent updated resource for scholars students and practitioners in the broad field of public administration public policy public affairs and public management
