**Technology and the African-American Experience** Bruce Sinclair, 2004 The intersection of race and technology black creativity and the economic and social functions of the myth of disingenuity *Creating Value with Science and Technology* Eliezer Geisler, 2001-08-30 Do science and technology create value for society and the economy and how might one go about measuring it How do we evaluate its benefits Can we even be certain that there are benefits Geisler argues that there are benefits and that they outweigh in value the negative impacts that inevitably accompany them His revolutionary new book goes on to show that they can also be measured and evaluated and in one volume all of the existing knowledge on how to do it is compiled then Geisler's own methods are offered The result is a compelling argument that the value of science and technology in our lives has indeed been positive and that the economic well being of all individuals organizations and nations rests upon them Geisler starts off by describing his conceptual framework for the evaluation of science and technology and the impact and benefits that proceed from them He discusses the nature of evaluation in general terms and then in the specific context of science technology and innovation together He reviews the state of our present knowledge and assesses the nature of value creation itself Throughout Geisler remains fixed on his driving thesis Although there are certainly some negative impacts from science and technology on the whole the results of its outputs are positive He shows how they have contributed to a range of activities and institutions particularly to the improvement of health and human welfare worldwide Finally after discussing the theories of evaluation he gets down to the

practice providing readers with a way to assess science and technological innovations for themselves      **Ace The Interview! - Tips on landing your Dream Tech Job** Lyron Foster, 2023-03-28 Navigating the competitive landscape of tech interviews can be a daunting task but with Ace The Interview by your side you ll be well equipped to face the challenges and secure your dream job in the technology industry This all encompassing guide provides invaluable insights practical advice and proven strategies to help you excel in every aspect of the tech interview process From understanding the various types of interviews and their formats to mastering advanced techniques for standing out from the competition this book has you covered Designed for recent graduates experienced professionals career changers and even hiring managers Ace The Interview covers a wide range of topics including Behavioral and technical interviews Whiteboard and virtual interviews Researching the company and role Preparing for common interview questions Demonstrating your soft and technical skills Effective communication during interviews Handling difficult questions and scenarios Post interview follow up and thank you notes Advanced interview techniques and strategies Salary negotiations and more With real world examples actionable tips and expert advice Ace The Interview is your ultimate resource for navigating the complex world of tech interviews and landing your dream job in the technology industry      **Landing Your Tech Dream Job** Dianna J Cardin, As remote work expands so do the attack surfaces for cyber threats This essential guide equips IT professionals and individuals alike with the knowledge and tools to secure their remote work environments It covers topics like secure network configurations endpoint security data privacy phishing awareness incident response for remote incidents and compliance considerations when working outside a traditional office      *Civil Wars, Civil Beings, and Civil Rights in Alabama's Black Belt* Bertis D. English, 2020-10-06 Reconstruction politics and race relations between freed blacks and the white establishment in Perry County Alabama In his fascinating in depth study Bertis D English analyzes why Perry County situated in the heart of a violence prone subregion of Alabama enjoyed more peaceful race relations and less bloodshed than several neighboring counties Choosing an atypical locality as central to his study English raises questions about factors affecting ethnic disturbances in the Black Belt and elsewhere in Alabama He also uses Perry County which he deems an anomalous county to caution against the tendency of some scholars to make sweeping generalizations about entire regions and subregions English contends Perry County was a relatively tranquil place with a set of extremely influential African American businessmen clergy politicians and other leaders during Reconstruction Together with egalitarian or opportunistic white citizens they headed a successful campaign for black agency and biracial cooperation that few counties in Alabama matched English also illustrates how a significant number of educational institutions a high density of African American residents and an unusually organized and informed African American population were essential factors in forming Perry County s character He likewise traces the development of religion in Perry the nineteenth century Baptist capital of Alabama and the emergence of civil rights in Perry an underemphasized center of activism during the twentieth century This well researched and comprehensive

Rossiter, 2012-04-02 This survey of female scientists in recent

American history offers compelling data alongside the multiple stories of individual women. Science The third volume of Margaret W. Rossiter's landmark survey of the history of American women scientists focuses on their pioneering efforts and contributions from 1972 to the present. Central to this story are the struggles and successes of women scientists in the era of affirmative action. Scores of previously isolated women scientists were suddenly energized to do things they had rarely if ever done before. Form organizations and recruit new members, start rosters and projects, put out newsletters, confront authorities and even fight and win lawsuits. Rossiter follows the major activities of these groups in several fields from engineering to the physical, biological, and social sciences and their campaigns to raise consciousness, see legislation enforced, lobby for passage of the Equal Rights Amendment and serve as watchdogs of the media. This comprehensive volume also covers the changing employment circumstances in the federal government, academia, industry, and the nonprofit sector and discusses contemporary battles to increase the number of women members of the National Academy of Science and women presidents of scientific societies. In writing this book, Rossiter mined nearly one hundred previously unexamined archival collections and more than fifty oral histories. With the thoroughness and resourcefulness that characterize the earlier volumes, she recounts the rich history of the courageous and resolute women determined to realize their scientific ambitions.

The Double Bind in Physics Education Maria Ong, 2023-05-09 An incisive study of the mechanisms reinforcing the underrepresentation of women of color in STEM fields and a call for systemic change to address the imbalance. In a detailed exploration of inclusion in physics, social scientist Maria Ong makes the case for far-reaching higher education reform, noting that despite diversity efforts to recruit more women and students of color into science and mathematics programs, many leave the STEM pipeline. The Double Bind in Physics Education takes readers inside the issue by following 10 women of color from their entrance into the undergraduate physics program at a large research university through their pursuit of various educational and career paths. Candid interviews with these women, their instructors and mentors, and their peers, conducted over 25 years, allow Ong to trace how pervasive challenges such as navigating the intersectionality of race and gender discrimination have shaped their academic opportunities and career choices. Despite the ideals of objectivity promoted in STEM disciplines, the women profiled here encounter continued patterns of systemic oppression within their departments. In their stories, Ong identifies overt behaviors and microaggressions that harass, exclude, and otherwise disadvantage women of color and members of other minoritized groups. Ong also shows how aids such as student support programs, peer groups, allies, and mentors, which are centered on the individual, can go only so far toward a sustainable solution. In order to provide equitable opportunities, she argues, greater work must be done to dismantle institutional norms and replace them with a culture of inclusion.

A Widening Sphere Philip N. Alexander, 2021-08-03 How MIT's first nine presidents helped transform the Institute from a small technical school into a major research university. MIT was founded in 1861 as a polytechnic institute in Boston's Back Bay, overshadowed by its neighbor across the Charles River, Harvard University. Harvard offered a classical education to young

men of America's ruling class the early MIT trained men and a few women from all parts of society as engineers for the nation's burgeoning industries Over the years MIT expanded its mission and ventured into other fields pure science social science the humanities and established itself in Cambridge as Harvard's enduring rival In *A Widening Sphere* Philip Alexander traces MIT's evolution from polytechnic to major research institution through the lives of its first nine presidents exploring how the ideas outlook approach and personality of each shaped the school's intellectual and social cultures Alexander describes among other things the political skill and entrepreneurial spirit of founder and first president William Rogers institutional growing pains under John Runkle Francis Walker's campaign to broaden the curriculum especially in the social sciences and to recruit first rate faculty James Crafts whose heart lay in research not administration Henry Pritchett's thwarted effort to merge with Harvard after which he decamped to the Carnegie Foundation for the Advancement of Teaching Richard Maclaurin's successful strategy to move the institute to Cambridge after considering other sites including a golfclub in Brighton the brilliant progressive Ernest Nichols who succumbed to chronic illness and barely held office Samuel Stratton's push towards a global perspective and Karl Compton's vision for a new kind of Institute a university polarized around science and technology Through these interlocking yet independent portraits Alexander reveals the inner workings of a complex and dynamic community of innovators
