## Teilhard De Chardin:

**Teilhard de Chardin** David Grumett, 2005 Pierre Teilhard de Chardin 1881 1955 has been regarded for too long as an esoteric thinker who evacuates theology by subjecting it to scientific theory There is an urgent need to reclaim him as a French catholic theologian with intellectual roots in the early twentieth century Teilhard's imaginative and inspiring work is grounded in the constructive use of biblical and patristic motifs and in his own life experiences of war exile and scientific endeavour From these he develops a distinctive philosophical theology which combines elements frequently assigned to the separate domains of philosophy of religion systematic theology and mysticism Teilhard provides a detailed theology of human embodiment and natural substances whilst his theories of human action passion vision and virtue offer suggestive resources to pastoral theology His evolutionary cosmology and social democratic politics are discussed in their historical context and the significance of his work for the ongoing dialogue between science and religion is assessed **The Heart of Matter**

Pierre Teilhard de Chardin, 1978 *Teilhard de Chardin, The Divine Milieu Explained* Louis M. Savary, 2007 During the twentieth century Jesuit priest scientist Pierre Teilhard de Chardin developed a truly innovative spirituality By integrating both a comprehensive evolutionary perspective and the discoveries of science into Christian spirituality Teilhard presented a new way to understand the Word of God and the immensity of the Universal Christ While many books have explored and explained Teilhard's theology there has never been a spiritual guide for everyday use of his principles until now Savary transforms these challenging and difficult to understand concepts into a more accessible spirituality *The Divine Milieu Explained* also offers a series of spiritual practices and exercises that integrate science and faith according to Teilhard's evolutionary spirituality His purpose was to see spiritual reality today in the world contemporary men and women live in thoroughly informed and transformed by science and technology Book jacket [Science and Faith in Teilhard de Chardin](#)

Claude Cuénot, 1967 The first two parts of the book are lectures given by Dr Cuénot at the first annual conference in October 1966 of the Pierre Teilhard de Chardin Association of Great Britain and Ireland Then follows a comment made by Professor Garaudy at the conference The text concludes with an original essay by Dr Cuénot which examines Teilhard's influence on contemporary thinkers *Spirit of Fire* King, Ursula, 2015-06-30 In the years since his death in 1955 the influence of Pierre

theologian and evolutionary theorist Pierre Teilhard de Chardin applied his whole life his tremendous intellect and his great spiritual faith to building a philosophy that would reconcile religion with the scientific theory of evolution In this timeless book which contains the quintessence of his thought Teilhard argues that just as living organisms sprung from inorganic matter and evolved into ever more complex thinking beings humans are evolving toward an omega point defined by Teilhard as a convergence with the Divine

**The Future of Man** Teilhard de Chardin,2004-04-20 The Future of Man is a magnificent introduction to the thoughts and writings of Pierre Teilhard de Chardin one of the few figures in the history of the Catholic Church to achieve renown as both a scientist and a theologian Trained as a paleontologist and ordained as a Jesuit priest Teilhard de Chardin devoted himself to establishing the intimate interdependent connection between science particularly the theory of evolution and the basic tenets of the Christian faith At the center of his philosophy was the belief that the human species is evolving spiritually progressing from a simple faith to higher and higher forms of consciousness including a consciousness of God and culminating in the ultimate understanding of humankind s place and purpose in the universe The Church which would not condone his philosophical writings refused to allow their publication during his lifetime Written over a period of thirty years and presented here in chronological order the essays cover the wide ranging interests and inquiries that engaged Teilhard de Chardin throughout his life intellectual and social evolution the coming of ultra humanity the integral place of faith in God in the advancement of science and the impact of scientific discoveries on traditional religious dogma Less formal than The Phenomenon of Man and The Divine Milieu Teilhard de Chardin s most renowned works The Future of Man offers a complete fully accessible look at the genesis of ideas that continue to reverberate in both the scientific and the religious communities

*Pierre Teilhard de Chardin. Some Aspects of His Thought* ,1964      **Teilhard de Chardin on Love and Suffering** Paul Chauchard,1966 A careful analysis of Teilhard de Chardin s views as a scientist and as a Christian on two important problems in the world today the problem of love and the problem of suffering Does science objectively encounter love In a Teilhardian critique of the true meaning of matter the author answers in the affirmative and demonstrates how science arrives at love in the world a love that logically leads to the Christian faith Is the Christianity of Teilhard a Christianity without the cross The author shows the entire work of Teilhard de Chardin illuminated by the shadow of the cross Teilhard s every thought as a scientist living within the mystery of the cross is marked by that mystery which he urges us to look for within the Church in order better to understand it For Teilhard the problem of evil is in reality an expression of love and a principle of union between God and mankind
