Teilhard De Chardin A Biographical Study:

Teilhard De Chardin Claude Cuenot,1958 *Teilhard de Chardin. A Biographical Study. (Translation by Vincent Colimore. Edited by René Hague.) [With a Bibliography. With Plates, Including Portraits.]*. Claude Cuénot,Vincent COLIMORE,René Hague,Pierre Teilhard de Chardin,1965 **Teilhard de Chardin** Claude Cuénot,1965 Teilhard de Chardin David Grumett,2005 Pierre Teilhard de Chardin 1881 1955 has been regarded for too long as an esoteric thinker who evacuates theology by subjecting it to scientific theory There is an urgent need to reclaim him as a French catholic theologian with intellectual roots in the early twentieth century Teilhard s imaginative and inspiring work is grounded in the constructive use of biblical and patristic motifs and in his own life experiences of war exile and scientific endeavour From these he develops a distinctive philosophical theology which combines elements frequently assigned to the seperate domains of philosophy of religion systematic theology and mysticism Teilhard provides a detailed theology of human embodiment and natural substances whilst his theories of human action passion vision and virtue offer suggestive resources to pastoral theology His evolutionary cosmology and social democratic politics are discussed in their historical context and the significance of his work for the ongoing dialogue between science and religion is assessed **Teilhard de Chardin and Eastern Religions** Ursula King,2011 Teilhard de Chardin and Eastern Religions is in part an update of the 1980 classic *Toward a New Mysticism* Author Ursula King has extensively revised this work adding new material as she traces Teilhard s encounter with Eastern thought It includes an extensive bibliography and annotated study guide Book jacket **Teilhard De Chardin and Eastern Religions** U. M. King,1977 The Biography Book Daniel S. Burt,2001-02-28 From Marilyn to Mussolini people captivate people A E s Biography best selling autobiographies and biographical novels testify to the popularity of the genre But where does one begin Collected here are descriptions and evaluations of over 10 000 biographical works including books of fact and fiction biographies for young readers and documentaries and movies all based on the lives of over 500 historical figures from scientists and writers to political and military leaders to artists and musicians Each entry includes a brief profile autobiographical and primary sources and recommended works Short reviews describe the pertinent biographical works and offer insight into the qualities and special features of each title helping readers to find the best biographical material available on hundreds of fascinating individuals **A History of Philosophy: Maine de Biran to Sartre** Frederick Charles Copleston,1946 Prominent French philosophical thinkers of the nineteenth and twentieth centuries *Spirituality of Creation, Evolution, and Work* Roger Haight,Alfred Pach,Amanda Avila Kaminski,2023-04-04 Two developments that occurred over the course of the nineteenth century had a strong impact on Christian theology The first was a deepening of the implications of historical consciousness and the second was the impact of science on Christian self understanding Marx s sociology of knowl edge symbolizes the first Darwin s analysis of evolution symbolizes the second These intellectual developments gave rise to various forms of process philosophy and theology Within this context a dialogue

between Christian theology and evolution has yielded dramatically new convictions and practices in Christian spirituality especially relative to ecology For more than three decades Catherine Keller has been reflecting on the intellectual and practical effects that an internalization of the dynamic character of reality should have upon the practice of Christian life Her text illustrates the basic framework of dynamic becoming that science demands whether or not one is formally a process thinker Pierre Teilhard de Chardin was an earlier figure who was more zeroed in on the phenomenon of evolution which he encountered in a distinct way as a Christian scientist trained in geology and paleontology as distinct from biology or genetics Evolution explicitly informs his spirituality These two different Christian writers the one representing the imaginative framework of being as process and becoming the other focused on how evolution affects intentional spiritual life open new perspectives on the spiritual character of people s active lives of work and creativity in the world that science presents to us

The Philosophy of Religion in Nineteenth-century England and Beyond S. Adshead,1999-09-22 A synoptic investigation of the underlying philosophies of twelve religious thinkers from Newman to Ratzinger It argues that between the Oxford Movement and Vatican II there was a profound shift not so much in the content of religious belief as in the way it was held This shift more intellectual than theological is in the book termed the Critical Impulsion It may be described as a change from categorically affirmed authority to critically observed method

God on the Western Front Joseph F. Byrnes,2023-08-31 From 1914 to 1918 religious believers and hopeful skeptics tried to find meaning and purpose behind divinely willed destruction God on the Western Front is a history of lived religion across national boundaries religious affiliations and class during World War I utilizing an expansive record of primary sources Joseph F Byrnes takes readers on a tour of the battlefields of France listening to the words of German French and English soldiers going behind the lines to hear from the men and women who provided pastoral and medical care and reviewing the religious writings of

priests bishops ministers and rabbis as they tried to make sense of it all The story begins with citizens at home as they responded to the obligation to make war and then focuses on the God talk and nation talk that soldiers used to express their foundational religious experiences Byrnes s study attends to the words of average men who struggled to articulate their religious sentiments alongside the generals Helmuth von Moltke Ferdinand Foch and Douglas Haig and the soldier theologians Franz Rosenzweig Paul Tillich Pierre Teilhard de Chardin and Geoffrey Studdert Kennedy In doing so he shows how religious and battle experience are intertwined and showcases the wide range of spiritual responses that emerged across boundaries Going beyond the typical constraints of studies focused either on one nation or one confessional affiliation Byrnes s international and interfaith approach breaks new ground It will appeal to scholars and students of modern European history religious history and the history of war

Charles A. Lindbergh and the American Dilemma Susan M. Gray, 1988 Throughout his life Lindbergh s value structure interests and activities shifted and moved yielding a conflict between instinct and intellect Both its presence in his life and his readjustment of values in accordance with it are representative of his time and culture He moved with the twentieth century itself from a faith in technology to a disenchantment with it and finally to a balanced resolution that synthesized the seeming oppositions of technology and the human spirit This emphasis on a balance between technology and humanity and Lindbergh s belief that maintained the complementarity rather than the opposition of the two forces finally culminated in a post technological mysticism a teleological worldview of science and nature as aspects of the same physical and spiritual environment

Julian Huxley, Evolutionism and the History of Transhumanism Ingrid Dunér, 2025-03-18 The evolutionary biologist Julian Huxley 1887 1975 attempted to promote a religion for the future which he would come to refer to as Transhumanism Transhumanism was an attempt to unite a more traditional humanistic view of the human as containing some form of core essence or potential with an evolutionary point of view of humans as a work in progress Before humans natural selection had been responsible for the transformation of life Through its ordering principles and through chance it had given rise to humankind which had ushered in a new phase of evolution

Humanity stood on the threshold of yet another critical point in evolution The consciously purposive phase of evolution This open access book explores the history of transhumanism by analyzing how Julian Huxley s transhumanism develops and why it does at this particular point in time by placing it firmly within the context of his specific scientific and sociopolitical milieu starting roughly in the interwar years and stretching over the Second World War to the 1970s Continuing the study then focuses on the new transhumanists of the 1970s 1980s and 1990s and investigates continuity in mode of thinking contributing to a more coherent understanding of transhumanism its history and of modern projects of human enhancement The book captures how scientific and technological development in relation to society and social order shapes images and expectations of the future and of what future is desirable [Teilhard's Mysticism](#) Duffy, Kathleen ,2014-06-30 Pierre Teilhard de Chardin 1881 1955 a French Jesuit priest and scientist charted a new path in reconciling Christian theology with evolutionary science Here a theologian scientist examines Teilhard s mysticism showing how science can illuminate the mystical path while also demonstrating the compatibility between Teilhard s thought and current frontiers in scientific exploration
