Encountering Urban Places Lars Frers,2016-04-29 The aesthetics of urban life offer a curious quality one that is both highly visible and hidden both openly influencing and subtly imprinting These aesthetics participate in the production of places to the way they are built to their resisting materiality to their image in people s minds to advertising and to the way people respond to the place Exploring the encounter with the aesthetics images and material design of urban life this book offers analytic insights into contemporary cities It shows how photography maps and videos play a crucial role in bringing aesthetic dimensions into urban studies This transdisciplinary approach draws on the full spectrum of the visual representation to tie the encounter with the realm of the visual directly and explicitly into the exploration of urban space

The Routledge Handbook on Spaces of Urban Politics Kevin Ward,Andrew E. G. Jonas,Byron Miller,David Wilson,2018-04-17 The Routledge Handbook on Spaces of Urban Politics provides a comprehensive statement and reference point for urban politics The scope of this handbook s coverage and contributions engages with and reflects upon the most important innovative and recent critical developments to the interdisciplinary field of urban politics drawing upon a range of examples from within and across the Global North and Global South This handbook is organized into nine interrelated sections with an introductory chapter setting out the rationale aims and structure of the Handbook and short introductory

commentaries at the beginning of each part It questions the eliding of urban politics into the politics of the city reconsidering the usefulness of the distinction between old and new urban politics considering issues of class gender race and the ways in which they intersect appear and reappear in matters of urban politics how best to theorize the roles of capital the state and other actors such as social movements in the production of the city and finally issues of doing urban political research The various chapters explore the issues of urban politics of economic development environment and nature in the city governance and planning the politics of labour as well as living spaces The concluding sections of the Handbook examine the politics over alternative visions of cities of the future and provide concluding discussions and reflections particularly on the futures for urban politics in an increasingly global and multidisciplinary context With over forty five contributions from leading international scholars in the field this handbook provides critical reviews and appraisals of current conceptual and theoretical approaches and future developments in urban politics It is a key reference to all researchers and policy makers with an interest in urban politics

Information, Place, and Cyberspace Donald G. Janelle, David C. Hodge, 2013-06-29 This book explores how new communication and information technologies combine with transportation to modify human spatial and temporal relationships in everyday life It targets the need to differentiate accessibility levels among a broad range of social groupings the need to study disparities in electronic accessibility and the need to investigate new measures and means of representing the geography of opportunity in the information age It explores how models based on physical notions of distance and connectivity are insufficient for understanding the new structures and behaviors that characterize current regional realities with examples drawn from Europe New Zealand and North America While traditional notions of accessibility and spatial interaction remain important information technologies are dramatically modifying and expanding the scope of these core geographical concepts

Shaping Smart for Better Cities Alessandro Aurigi, Nancy Odendaal, 2020-11-14 *Shaping Smart for Better Cities* powerfully demonstrates the range of theoretical and practical challenges opportunities and success factors involved in successfully deploying digital technologies in cities focusing on the importance of recognizing local context and multi layered urban relationships in designing successful urban interventions The first section Rethinking Smart in Places interrogates the smart city from a theoretical vantage point The second part Shaping Smart Places examines various case studies critically Hence the volume offers an intellectual resource that expands on the current literature but also provides a pedagogical resource to universities as well as a reflective opportunity for practitioners The cases allow for an examination of the practical implications of smart interventions in space whilst the theoretical reflections enable expansion of the literature Students are encouraged to learn from case studies and apply that learning in design Academics will gain from the learning embedded in the documentation of the case studies in different geographic contexts while practitioners can apply their learning to the conceptualisation of new forms of technology use Demonstrates how to adapt smart urban interventions for hyper local context in geographic parameters spatial relationships

and socio political characteristics Provides a problem solving approach based on specific smart place examples applicable to real life urban management Offers insights from numerous case studies of smart cities interventions in real civic spaces

Technocities John Downey, Jim McGuigan, 1999-06-22 Information and communication technologies are said to be transforming urban life dramatically and bringing about rapid economic and cultural globalization This book explores the many fascinating and urgent issues involved by relating advanced theoretical debates to practical matters of communication with cultural policy It maps out a range of optimistic and pessimistic scenarios with special regard to various forms of inequality particularly class gender and geopolitical Topics discussed include urban planning virtual cities and actual cities economic and political policy and critical social analysis of current trends that are of momentous consequence The book concludes that it is necessary to bring together a number of diffe

The City: The city in global context Michael

Pacione, 2002 **From Smart City to Smart Region** Corinna Morandi, Andrea Rolando, Stefano Di Vita, 2015-08-14 This book offers a fascinating exploration of the relationship between information and communication technologies ICTs and spatial planning expanding the concept of urban smartness from the usual scale of buildings or urban projects to the regional dimension In particular it presents the outcomes of research undertaken at Politecnico di Milano in collaboration with Telecom Italia that had three principal goals to investigate the use of ICTs for the representation promotion management and dissemination of an integrated system of services to explore the spatial impacts of digital services at different scales regional urban local and to understand how a system of mobile services can encourage new spatial uses and new collective behavior in the quest for better spatial quality of places Useful critical analysis of international case studies is also included with the aim of verifying the opportunities afforded by new digital services not only to improve the urban efficiency but also to foster the evolution of urban communities through enhancement of the public realm The book will be a source of valuable insights for both scholars and local administrators and operators involved in smart city projects

City Competitiveness and Improving Urban Subsystems: Technologies and Applications Bulu, Melih, 2011-10-31 Cities are becoming the wealth producing centers of national economies Increasing the operational efficiency of the city will bring a competitive edge to the whole system Yet many city subsystems cannot work together creating significant problems and inefficiencies City Competitiveness and Improving Urban Subsystems Technologies and Applications uses information science perspectives to improve working subsystems in transportation sewage electricity water communication education health governance and infrastructure since their efficient and synchronized operation is vital for a competitive city This pioneering approach will interest researchers professionals and policymakers in urban economy regional planning and information science disciplines who wish to improve the competitiveness of their cities

Urban Theory and the Urban Experience Simon

Parker, 2015-04-24 Urban Theory and the Urban Experience brings together classic and contemporary approaches to urban research in order to reveal the intellectual origins of urban studies and the often unacknowledged debt that empirical and

theoretical perspectives on the city owe one another From the foundations of modern urban theory in the work of Weber Simmel Benjamin and Lefebvre to the writings of contemporary urban theorists such as David Harvey and Manuel Castells and the Los Angeles school of urbanism Urban Theory and the Urban Experience traces the key developments in the idea of the city over more than a century Individual chapters explore investigative studies of the great metropolis from Charles Booth to the contemporary urban research of William J Wilson along with alternative approaches to the industrial city ranging from the Garden City Movement to the new urbanism The volume also considers the impact of new information and communication technologies and the growing trend towards disaggregated urban networks all of which raise important questions about viability and physical and social identity of the conventional townscape Urban Theory and the Urban Experience concludes with a rallying cry for a more holistic and integrated approach to the urban question in theory and in practice if the rich potent For the benefit of students and tutors frequent question points encourage exploration of key themes and annotated further readings provide follow up sources for the issues raised in each chapter The book will be of interest to students scholars practitioners and all those who wish to learn more about why the urban has become the dominant social economic and cultural form of the twenty first century
