against the development of communication systems from the telegraph to the telephone to computer networks. It was the telegraph that made communication a continual process thus freeing it from the rhythmical motion of the postal service and from physical transportation in general and provided both a model and a mechanism of control. Using the theories of both Foucault and Heidegger to provide a lens for new investigation, the author studies not the meanings of communication and its logic as such but rather the conditions and structures that allow meanings and logic to be formulated in the first place. The book offers an original combination of historical analysis with an ontological discussion of the evolution of telecommunications in the U S as a phenomenon of modern social ordering.

Most users want their Twitter feed, Facebook page and YouTube comments to be free of harassment and porn. Whether faced with fake news or livestreamed violence, content moderators who censor or promote user posted content have never been more important.
