Teleologies In Huberlian Phenomenology:

The Teleologies in Husserlian Phenomenology Anna-Teresa Tymieniecka, 2012-12-06 The following bibliography arranged chronologically permits the reader to follow the development of phenomenological studies in Italy in parallel with other contemporary cultural currents From this list it can be seen that knowledge of Husserl's work begins in 1923 with the studies of A Banfi Phenomenology however did not immediately receive a warm welcome It contrasted with the then dominant neo idealism as has been made clear by G De Ruggiero but for this very reason it also found adherents among the opponents of idealism These were either distant heirs of positivism who accepted Husserl on account of his scientific approach and rigor or Christian oriented thinkers who following an initial period of diffidence toward the antimetaphysical attitude of phenomenological analysis gradually began to use this method as an antiidealist instrument even though the problem remained of Husserl's own transcendental idealism and the value to be attributed to it Despite the difficulties encountered on the way the numerous studies carried out in Italy prior to World War II make it clear that the better known philosophers who have left a mark on Italian culture already had begun to take a discreet interest in phenomenology *The Teleologies in Husserlian Phenomenology* Anna-Teresa Tymieniecka, 1979 *The Teleologies in Husserlian Phenomenology* A-T. Tymieniecka, 1971 **The Teleologies in Husserlian Phenomenology** Anna-Teresa Tymieniecka (Philosopher, Poland, United States), International Husserl and Phenomenological Research Society, 1979 **The Teleologies in Husserlian Phenomenology** Anna-Teresa Tymieniecka, 1979 **The Universe as Communion** Alexei Nesteruk, 2011-11-03 In this book a new and distinctive approach to the science religion debate emerges from a synthesis of the Eastern Orthodox Christian tradition with phenomenological thought Developing ideas of Greek Patristics the author treats faith with its sense of the Divine presence and knowledge of the universe as two modes of communion which constitute the human condition The modern opposition between science and theology which is historically paralleled with the Church's split between East and West and monasticism and Christianity in the world is treated as the split between two intentionalities of the overall human subjectivity The human person as a centre of their reconciliation becomes the major theme of the dialogue between science and theology It is argued that the reconciliation of science and theology is not simply an academic exercise it requires an existential change a change of mind metanoia which cannot be effected without ecclesial involvement Then the person who effectuates the mediation between science and theology is raised to the level of cosmic priesthood while the mediation acquires the features of a cosmic Eucharist in which all divisions and tensions in creation and humanity are removed It is through this existential change accompanied by phenomenological analysis that scientific theories can be subjected to a certain vision through which the hidden ultimate goal telos of scientific research as the explication of the human condition shows its kinship to the saving telos advocated by Christian faith The opposition between theology and science is thus being para eucharistically overcome *The Problem of the Contingency of the World in Husserl's*

Phenomenology Sang-Ki Kim,1976 **The New Husserl** Donn Welton,2003-08-21 The recent first time publication of works from Edmund Husserl's later years especially his Freiburg period combined with new studies of his method and theories has stimulated a remarkable shift in perceptions of the scope and significance of Husserl's transcendental phenomenology. Informed by a deep reading of not just the works published during Husserl's lifetime but also the countless lectures and manuscripts he wrote in his later years the essays in *The New Husserl* provide an alternative approach to Husserl by examining his work and his method as a whole and by probing issues old and new that occupied him during this exceptionally productive period. The noted Husserl specialist Klaus Held opens the book with two essays published here in English for the first time that provide an insightful and lucid introduction to Husserl's central texts. Other prominent Husserl scholars treat his most important and lasting contributions to philosophy such as the concept of intentionality the theory of types time consciousness consciousness and subjectivity the phenomenological method and the problem of generativity. By inviting readers to discover this new Husserl the present collection is likely to shape scholarly discussions of Husserl's thought for some time to come.

The Radical Choice and Moral Theory Zhenming Zhai,2012-12-06 In a crisp original style the author approaches the crucial question of moral theory the is-ought problem via communicative argumentation. Moving to the end of Habermas's conception of the communicative action he introduces the concept of radical choice as the key to the transition from the descriptive to the normative. Phenomenological subjectivity of the intersubjective life world is being vindicated as the arch value of all derivative values or the first principle for all normative precepts. With exceptional acumen and mastery of the philosophical argument the author a young native Chinese lately trained in a Western university delineates a fascinating route along which the philosophical question of justification raised in the analytic tradition can be answered on the basis of phenomenology. A noteworthy contribution to the interplay between the Anglo American and Continental schools of philosophy.

The Husserlian Mind Hanne Jacobs,2021-07-20 Edmund Husserl 1859-1938 is widely regarded as the principal founder of phenomenology one of the most important movements in twentieth century philosophy. His work inspired subsequent figures such as Martin Heidegger his most renowned pupil as well as Jean Paul Sartre and Maurice Merleau-Ponty all of whom engaged with and developed his insights in significant ways. His work on fundamental problems such as intentionality consciousness and subjectivity continues to animate philosophical research and argument. *The Husserlian Mind* is an outstanding reference source to the full range of Husserl's philosophy. Forty chapters by a team of international contributors are divided into seven clear parts covering the following areas: major works phenomenological method phenomenology of consciousness epistemology ethics and social and political philosophy philosophy of science metaphysics. Contained in these sections are chapters on many of the key aspects of Husserl's thought including intentionality transcendental philosophy reduction perception time self and subjectivity personhood logic psychology ontology and idealism. Offering an unparalleled guide to the enormous range of his thought *The Husserlian Mind* is essential reading for students.

Husserl's Ethics and Practical Intentionality Susi Ferrarello, 2015-12-17 Husserl's 20th century phenomenological project remains the cornerstone of modern European philosophy The place of ethics is of importance to the ongoing legacy and study of phenomenology itself Husserl's Ethics and Practical Intentionality constitutes one of the major new interventions in this burgeoning field of Husserl scholarship and offers an unrivaled perspective on the question of ethics in Husserl's philosophy through a focus on volumes not yet translated into English This book offers a refreshing perspective on stagnating ethical debates that pivot around conceptions of relativism and universalism shedding light on a phenomenological ethics beyond the common dichotomy

The Sense of the Universe Alexei V. Nesteruk, 2015 The Sense of the Universe deals with existential and phenomenological reflection upon modern cosmology with the aim to reveal hidden theological commitments in cosmology related to the mystery of human existence The book proposes a new approach to the dialogue between science and theology based in a thorough philosophical analysis of acting forms of subjectivity involved in the study of the world and in religious experience The uniqueness of this book is that it uses recent advances in phenomenological philosophy and philosophical theology in order to accentuate the existential meaning of cosmology as the discourse that ultimately explicates the human condition The objective of the book is not to make a comparative analysis of the cosmological scientific narrative and that of the Bible or the Fathers of the Church in what concerns the structure of the universe but to reveal the presence of a hidden theological dimension in cosmology originating in the God given ability of humanity to discern and disclose the sense of creation The book contributes to the synthesis of appropriation and incorporation of modern philosophical ideas in Christian theology in particular its Eastern Orthodox form

Intercultural Philosophy Ram Adhar Mall, 2000-01-12 The meeting of different cultures philosophies and religions today calls for an intensive and qualified discourse on the part of all concerned Intercultural Philosophy seeks to develop such a discourse through a new orientation of thought that will allow for a discussion of all philosophical problems from an intercultural perspective In this important new work Ram Adhar Mall approaches the study of philosophy from a cross cultural point of view allowing for fundamental similarities and illuminating differences between cultures In doing so he develops a new concept of intercultural philosophy and applies it to various philosophical disciplines

Personalism and Metaphysics Juan Manuel Burgos, 2023-09-26 Personalism seeks to understand the person in its richness complexity and unity and to achieve this goal it has developed a rich and solid anthropology as well as an ethic of the person that is having repercussions in the philosophical and sociopolitical sphere But what is the value of this philosophy Does it offer a mere description of the reality of a phenomenological type or does it penetrate to the bottom of what exists offering its intelligible essence Does it offer an ultimate explanation of the person or is her vision subordinated to a deeper and more decisive one that would correspond to metaphysics To answer these questions the author an international expert in personalist philosophy first defines the various meanings in which the term metaphysics can be understood and secondly does a comparison between personalism in particular integral Personalism and the metaphysics of being The analysis concludes that personalism can be considered a first sectoral philosophy that is a philosophy that does not need other philosophical referents to establish itself as a philosophy thanks to its direct access to experience where the person is found

This conclusion is based on the epistemology of integral experience and imposes a review of the traditional role of metaphysics and its connection with anthropology in general and Personalism in particular

Historical Teleologies in the Modern World Henning Trüper, Dipesh Chakrabarty, Sanjay Subrahmanyam, 2015-09-24 Historical Teleologies in the Modern World tracks the fragmentation and proliferation of teleological understandings of history the notion that history had to be explained as a goal directed process in Europe and beyond throughout the 19th and into the 20th century Historical teleologies have profoundly informed a variety of other disciplines including modern philosophy natural history literature humanitarian and religious philanthropism the political thought and practice of revolution emancipation imperialism colonialism and anti colonialism the conceptualization of universal humankind and the understanding of modernity in general By exploring the extension and plurality of historical teleology the essays in this volume revise the history of historicity in the modern period Historical Teleologies in the Modern World casts doubt on the idea that a single if powerful conception of time could function as the unifying principle of all modern historicity instead pursuing an investigation of the plurality of modern historicities and its underlying structures By bringing together Western and non Western histories this book provides the first extended treatment of the idea of historical teleology It will be of great value to students and scholars of modern global and intellectual history

Alterity and Facticity N. Depraz, D. Zahavi, 2012-12-06 Husserl's phenomenology has often been criticized for its Cartesian fundamentalistic idealistic and solipsistic nature Today this widespread interpretation must be regarded as being outdated since it gives but a very partial and limited picture of Husserl's thinking The continuing publication of Husserl's research manuscripts has disclosed analyses which have made it necessary to revise and modify a number of standard readings This anthology documents the recent development in Husserl research It contains contributions from a number of young phenomenologists who have all defended their dissertation on Husserl in the nineties and it presents a new type of interpretation which emphasizes the dimensions of facticity passivity alterity and ethics in Husserl's thinking
