Televising Democracies:

Televising Democracies Bob Franklin, 2013-06-19 Published in 1992 this was the first book to assess the impact of television broadcasting on the House of Commons and its Members' behaviour. It looks at the implications for political journalism as well as broader questions concerning the role of media in a democracy. Bringing together contributions from senior broadcasters, politicians from various parties and academics and researchers, the book approaches the issues from a range of different perspectives. The first section of the book focuses on broadcasters' accounts of the difficulties involved in establishing the structure and organisation of Parliamentary broadcasting while the second section gives politicians' own assessments of the consequences of the admission of cameras to the House. The third section looks at the findings of research studies assessing the type of materials broadcast, the impact on political journalism and audience responses. The fourth section draws comparison with the American, German and European experience of televising democracy. **Mass Media,**

Politics and Democracy John Street, 2010-12-09 This widely used and popular text provides a broad ranging analysis of the relationship between the media and politics. Revised and updated throughout, this second edition includes coverage of the mediatization of politics, EU politics and governance, the impact of reality TV and of issues raised by the reporting of war in Iraq.

Electrified Democracy Andrew Blick, 2021-07-01 The story of how the UK Parliament came to use the Internet from the 1960s onwards has never been told. Electrified Democracy places the impact of technology on parliamentary workings in its longer term historical context. The author identifies repeating patterns of perception and analysis and cultural tendencies in the perception of inventions dating back over centuries that have reasserted themselves in connection with the parliamentary response to networked computers. He uncovers evidence and makes new connections while situating all this within the wider global debates on connections between communication and democracy in the age of the Internet, constitutional law and history and law and technology. This book will be of interest to a wide readership including policy makers, researchers and all those interested in contemporary controversies about the role of the Internet in modern societies.

Media, Politics and Democracy John Street, 2021-05-14 The third edition of Media, Politics and Democracy examines the fraught debate over media influence, who wields it and what effect social and traditional media has on what we think, how we behave and how we vote. Charting the media conglomerates of old, the alarming rise of the Tech Giants in recent decades, concerns over fake news and the use of social media by political candidates, this book places contemporary anxieties into historical context and compares the response to such issues across different states and societies. Using examples from around the world, Street tackles the changing nature of political communications and brings under scrutiny the question of how a democratic society can function alongside a democratic media. Suitable for students studying politics and the media, political communications and other related fields. New to this Edition: Completely revised and updated version of Mass Media, Politics and Democracy. Includes a new chapter on the power of the Tech Giants. Contains detailed accounts of the significance of

figures such as Donald Trump Rupert Murdoch and Mark Zuckerberg Student questions and issues for debate interspersed throughout the book *Television and Politics in Evolving European Democracies* Lynda Lee Kaid,1999 Throughout the world television has become an important part of the way in which political candidates and parties present their messages to voters during election campaigns This is particularly true in campaigns at the national level where voters have little personal contact with candidates and must rely on experiencing candidates through the media Despite the importance of the media for voter government interaction however many new reform governments in the post communist era in Eastern European countries failed to appreciate the demands of creating workable new media systems British Television Policy Bob Franklin,2001 British Television Policy A Reader provides a forum for the significant policy debates which have informed and shaped television broadcasting since the publication in 1986 of the Peacock Committee Report on the financing of the BBC The Reader presents key documents and critically analyses their impact on the organisation financial resources programme content editorial philosophy and the regulatory environment of television broadcasting Recognising that policy making is not wholly a prerogative of government British Television Policy provides readers with access to a wide range of statutory and non governmental documents which have affected British broadcasting legislation Acts of Parliament Private Members Bills Select Committee Reports Official statements by Ministers Parliamentary inquiries such as the Davies Report Policy documents prepared by interest groups such as the Campaign for Quality Television and the Voice of the Listener and Viewer Strategic announcements from the ITC Statements from the BBC and ITV Public lectures by media owners and executives such as Rupert Murdoch and Richard Eyre Commentaries from media academics and media analysts Beginning with a comprehensive editorial introduction which details television policy since 1945 the Reader is arranged in thematic sections which explore the purpose of television broadcasting the financing of television broadcasting policy and quality regulation and the relationship of broadcasting and politics Each section is accompanied by an editor s introduction and commentary and the Reader is supported by a glossary and a guide to further reading **Post-Broadcast Democracy** Markus Prior,2007-04-02 This 2007 book studies the impact of the media on politics in the United States during the last half century

Television And The Crisis Of Democracy Douglas Kellner,2018-02-02 This is one of the best books I ve read on the changing relationship of television to society It provides a very good analysis of theoretical perspectives on television and makes excellent use of critical theory An accessible book that at the same time challenges the reader to think more deeply about the role of television in a formally democratic society Vincent Mosco Carleton University In this pathbreaking study Douglas Kellner offers the most systematic critically informed political and institutional study of television yet published in the United States Focusing on the relationships among television the state and business he traces the history of television broadcasting emphasizing its socioeconomic impact and its growing political power Throughout Kellner evaluates the contradictory influence of television a medium that has clearly served the interests of the powerful but has also dramatized

conflicts within society and has on occasion led to valuable social criticism *Television, Democracy and Elections in Russia* Sarah Oates,2006-08-21 Sarah Oates gives a detailed examination on a central theme in political science the relationship between democracy and the mass media This significant book contains a wealth of information and data including public opinion surveys content analysis of television news focus groups and in depth interviews to examine why political parties and the mass media failed so spectacularly to aid in the construction of a democratic system in Russia The analysis presents compelling evidence that television helped to tune out democracy as it served as a tool for leaders rather than a conduit of information in the service of the electorate or parties In addition focus groups and surveys show that the Russian audience are often more comfortable with authority rather than truth in television coverage Within this framework this fascinating work presents the colourful history of parties elections and television during one of the most critical eras in Russian history and captures a particularly significant epoch in contemporary Russian politics **Explaining Euro-Paralysis** J.

Zielonka,2015-12-22 This book is about Europe s apparent inability to cope with the complex international environment Why does the Union fail to create a workable sound Common Foreign and Security Policy Five distinct explanations for Euro paralysis are considered focusing on power politics the assertion of national interests misguided institutional designs a crisis of modern democracy and the post Cold War conceptual confusion **Terrestrial TV News in Britain** Jackie

Wedell,B. Luckham,2001-06-11 Television had until recently a social and cultural purpose The BBC and to a lesser extent ITV and Channel 4 were committed by the legal instruments establishing them to develop and maintain these purposes With the enlargement of the range of choices for viewers by digital television and the provision of access to cable and satellite TV and the Internet the role of the terrestrial television channels is being diluted The authors examine the effects of this and consider whether anything can be done to maintain the standards and quality of television at a time of unlimited competition

Television Producers Jeremy Tunstall,2003-09-02 This book is a result of over 250 interviews with producers which will not only provide academic interest but invaluable information to job applicants in the area Includes a discussion of the position of women as producers and the Birt revolution which will make it newsworthy and controversial Author has good media contacts he has already had work published by the Independent and Guardian Author is well known in media studies

Television, Democracy, and the Mediatization of Chilean Politics Harry L. Simón Salazar,2017-12-26 After seventeen years as dictator of Chile in 1990 Augusto Pinochet ceremoniously handed the presidential sash to the leader of his legal

opposition to formalize the peaceful transition to civilian rule in that country Among the many idiosyncrasies of this extraordinary transfer of political power the most memorable is the month long nationally televised campaign of uncensored political advertising known as the Franja de Propaganda Electoral the Official Space for Electoral Propaganda Produced by Pinochet s supporters and the legal opposition the 1988 Franja campaign set out to encourage voters to participate in a plebiscite that would define the democratic future of Chile Harry L Sim n Salazar presents a valuable historical account new empirical research and a unique theoretical analysis of the televised Franja campaign to examine how it helped the Chilean people reconcile the irreconcilable and stabilize a contradictory relationship between what was politically implausible and what was represented as true and viable in a space of mediated political culture This contribution to the field of political communication research will be useful for scholars students and a general public interested in Latin American history and democracy as well as researchers of media communication theory and cultural studies Television Democracy and the Mediatization of Chilean Politics also helps inform a more critical understanding of contemporary hyper mediated political movements such as the Arab Spring Occupy Wall Street Black Lives Matter and the particularly germane phenomenon of Trumpism

Social Media and Democracy Nathaniel Persily, Joshua A. Tucker, Joshua Aaron Tucker, 2020-09-03 A state of the art account of what we know and do not know about the effects of digital technology on democracy The Communication of Politics Ralph M. Negrine, 1996-09-24 How should those exercising power be made more accountable and what roles should the mass media play in that process Can the public monitor the exercise of power without the existence of a strong and inquisitive media The Communication of Politics examines these and other questions vital to the debate on the media s role in the democratic process Ralph Negrine explores the complexity of the links between the media the institutional political world and the public through case studies drawn from contemporary British politics and other political systems including the United States He examines some of the often overlooked problems faced by the media in its efforts to create an informed citizenry Questioning the practices that filter information and confronting the idea that information itself is unproblematic Negrine shows why the essential task of uncovering truths remains elusive *Democracy, Intermediation, and Voting on Four Continents* Richard Gunther, Hans-Jürgen Puhle, José R. Montero, 2007 This book presents the results of systematic comparative analyses of electoral behavior and support for democracy in 13 countries on four continents It is based on national election surveys held in old and new democracies in Europe Germany Britain Spain Greece Italy Portugal Bulgaria North and South America the United States Chile and Uruguay and Asia Hong Kong between 1990 and 2004 It is methodologically innovative notwithstanding the fact that its core concern with political intermediation i e the flow of political information from parties and candidates to voters through the mass communications media membership in secondary associations and direct face to face contacts within interpersonal networks was first introduced to the study of electoral behavior by Paul Lazarsfeld and his collaborators in the 1940s In addition to reviving that long neglected analytical

framework this book breaks new ground by systematically exploring the impact of socio political values on electoral behavior It also analyzes the role of political intermediation in forming basic attitudes towards democracy which are crucial for the consolidation of new democracies and in turn channeling those orientations into various forms of political behavior Some of the findings presented in this volume are dramatic and clearly reveal that these channels of information are among the most powerful factors influencing the development of political attitudes and partisan electoral behavior So too are socio political values in some countries particularly the United States This volume is the first book length product of the now 18 country Comparative National Elections Project

New Media and Politics Barrie Axford, Richard Huggins, 2000-12-05 The book makes a successful attempt to map the potentially transformative effects of new media on various aspects of political institutions and culture both at a theoretical and empirical level Barrie Axford's discussion of the changing nature of political practice and technologies of political communication in relation to wider discourse of crisis is insightful and well argued This is a genuinely thought provoking and generally very well written book The book also works well by providing a potential basis for theoretically informed future research in the field of political communication Political Theory Exploring the theme of the putative transformation of political modernity under the impact of new media this book adopts a questioning approach to the ways in which cultural and technological factors are affecting the temper of political life and reflects the variety of normative thinking about and empirical research on the changing character of politics in mediatized cultures New Media and Politics examines the extent to which commercial populism now dominates electoral and other political discourses the ways in which the functions of leadership government and political parties are modified by different forms of both old and new media the democratic or undemocratic import of such changes and the ways in which the dominant territorial paradigm of politics is challenged by the space and time devouring capacities of electronic media

Fletcher, 1991-01-01 Media Elections and Democracy examines campaign communication in selected industrial democracies Klaus Schoenbach Karen Siune Doris Graber and a host of authors around the world contribute critical overviews of the systems in their countries The studies deal with a wide range of issues in modern communication including the principles and practices of news and public affairs coverage and the impact of new technologies
