past eroded and the technological leaps of big data ours is truly an age of risk uncertainty and probability from Google's algorithms to the daily management of personal lifestyle risks Academic reflection and research has kept pace with these dizzying developments but remains an intellectually fragmented field shaped by professional imperatives and disciplinary boundaries from risk analysis to regulation and social research This is the first attempt to draw together and define risk studies through a definitive collection written by the leading scholars in the field It will be an indispensable resource for the many scholars students and professionals engaging with risk but lacking a resource to draw it all together

The Construction of Truth in Contemporary Media Narratives about Risk John Gaffey, 2021-04-22 The Construction of Truth in Contemporary Media Narratives about Risk provides a theoretical framework for how in a post truth era media audiences are able to understand and navigate everyday risk The book examines media risk narratives and explores forms of truth experiential knowledge and authority Using the concept of parrhesia to show how we invest trust in various types of knowledge in a changing media environment the book demonstrates how we choose between expert and non expert information when navigating a seemingly risky world It considers how news media formats have previously engaged audiences through risk narratives and examines how experiential knowledge has come to hold a valuable place for individuals navigating what we are often told is an increasingly risky and uncertain world The book also examines the increasingly precarious position of expert knowledge and examines how contemporary truth games play out between experts and non experts and considers how this extends into the world of online and social media This book will be of interest to those researching or teaching in the areas of criminology sociology media and cultural studies and of interest to readers in professional areas such as journalism and politics
