Telework And Social Change How Technology Is Reshaping The Boundaries Between Home And Work:

Telework and Social Change Nicole B. Ellison, 2004-11-30 As technology comes to permeate every aspect of work it liberates organizations and their employees from the physical boundaries of the workplace and yet amplifies many of the interpersonal and cultural challenges inherent to corporate life Drawing from an in depth study of two dynamic organizations along with extensive research on technology and organizational behavior Nicole Ellison explores the subtle and powerful ways that distance working influences management effectiveness worker productivity and such intangible elements as social cohesion and trust Featuring interviews with executives managers and employees Telework and Social Change illuminates the ways in which access to always on information and communications technologies which allow people to work from virtually anywhere influence their work styles interactions with colleagues and supervisors and the ways in which they define the boundaries between work and home Offering insights for future research and practice Telework and Social Change provides a multi dimensional perspective on the evolving relationships among technology geography and the structural and cultural aspects of work in the digital age

Samantha Schmehl Hines,Marcy Simons,2015-12-09 This latest volume contains approaches from researchers around the world The chapters explore such issues as skills building and other professional development activities changing demographic profiles of staff changing modes of resource provision succession planning remote work and planning for Linked Data Organizations in the Face of Growing Competition in the Market Anna Ujwary-Gil,Natalia R.

Potoczek,2019-01-01 The essence of the functioning of any organization whether commercial or non profit is to provide value

to groups of recipients whose expectations undoubtedly change over time Various competition mechanisms in the market apply to both business oriented organizations and organizations operating in the sphere of public utilities This monograph includes examples of the problems facing contemporary organizations and at the same time provides evidence confirmed by research results that indicates the direction of current changes The analysis of changes taking place in organizations was carried out in many dimensions The content layout adopted in the monograph presents four research perspectives where the subject of the research is the organization the modern tools used in organization management the impact of the market economy on organizations and sectoral or industry aspects of the organization s functioning In the first chapter four studies related to commercial and non commercial organizations have been collated Researchers of academic organizations who in order to meet the expectations of students increase their activity in the field of entrepreneurship and their support for the most talented students Both examples show the need to conduct research develop knowledge about own activities and focus on the needs of the environment Entrepreneurial universities are open to the implementation of joint ventures with entities in their environment which affect the development of the university its students as well as the entities Entrepreneurship which is based on the ability to take advantage of market opportunities also creates opportunities for developing the ability to flexibly shape and adapt programs methods and operating principles to the growing expectations of their environment The ability to develop your potential as well as the potential of your students plays a crucial role In the pursuit of excellence a strong focus should be placed on talented students and the development of all possible forms of support that could determine an output of graduates with particularly high development potential In the research presented in this monograph the authors compare the activity of universities in the USA the Netherlands and Poland in the area of talent development The comparative analysis becomes a valuable source of indicating imperfections but also examples of potential forms of positive activity in this area Equally important in this part of the monograph is the research on the learning organization Through a bibliometric analysis the author identified the fields of research on the learning organization In addition to research areas related to various dimensions primarily human cultural and managerial the types of organizations in which such research is most often conducted have been indicated They also include the organizations of the two sectors presented education and healthcare The same part of the monograph also presents the results of research in the hotel sector where the main research problem was the creation of customer value taking into account the conditions stimulating the dynamics of the business models of hotel enterprises Referring to business models was considered important because of the significance of decision making patterns that help to build a competitive advantage and achieve market success by creating value for customers The concept of creating value for customers is currently treated in cross sectoral or industry categories and is a universal approach to managing organizations The second chapter of the monograph presents research on the modern tools used in organization management Concepts such as work life balance shaping the innovation process within the framework of

decisions taken in the process marketing communication or the use of gamification in research and development are examples of a wide range of relationships between today's organization and its surroundings. Finding employees and retaining them is also a growing challenge in developing countries where labor supply is steadily decreasing. The expectations of employees are increasing especially in relation to respecting the personal non professional side of life. Thus it should be recognized that research on work life balance is a developing space for organization and management researchers. Modeling the innovation process in an organization is another research trend that is important today especially in terms of developing competitiveness. Decision making is one of the key components of the innovation process. This aspect in qualitative terms was presented in the next study in the second part of the monograph. Similarly marketing communication is invariably an important area of research in organizations which has evolved due to rapidly developing information technologies and at the same time the changing preferences of users of these technologies. The last study in this second part of the monograph relates to innovation and the use of computer games. The tools of gamification are used to shape the attitudes of individual energy consumers. The observations presented show that it is worth making attempts to use unconventional methods and tools in this case to develop customer knowledge and strengthen the behaviors desired in the energy market. The third chapter of the monograph is devoted to the financial aspects of the functioning of commercial and non profit organizations in a market economy. Increasing the efficiency of public entities specifically conditioned in economic policies and dependent on political decisions has been the subject of numerous studies. The research study presented in the monograph refers to the relationship between financial strategies and profit management in public industrial companies listed on the Warsaw Stock Exchange. It is worth noting that no research in this field has been conducted to date in the context of the Polish capital market. The next study refers to the French market. Its purpose was to evaluate and test long term memory in the French stock exchanges. Research results contribute significantly to explaining the lack of consensus regarding long memory in stock returns. The research covers a significant 25 year period of operation of the Euronext platform during which 6634 observations were provided. The conclusions of the study may be particularly important for regulators and risk managers. Another study presents the results of bankruptcy risk tests for Polish and Czech logistics companies using a comprehensive classification approach. As a result of the research a tool for risk assessment and forecasting was developed enabling the early prediction of bankruptcy of enterprises. At the end of the third chapter of the monograph the results of health expenditure analysis based on information provided by the Health Account System are presented. Particular attention has been focused on the programming sources of financing healthcare in new European Union countries. Socio technical and environmental aspects of the organization are the subject of interest of researchers presenting the results of their research in the fourth chapter of the monograph. The problems of economic migration and working conditions have been the subject of interest for many years in the strongly developing trend of labor market research. The research results contained in the study

relate primarily to the issues of occupational safety of Ukrainians employed in Poland These issues are gaining importance especially when the number of people migrating from Ukraine to Poland in search of work has been growing for several years In the face of such a large scale of Ukrainian immigrants employed in Polish enterprises there is still a lack of regulations protecting or securing the interests of employees and employers The next research presentation highlights the problems of the circular economy which according to the author is developing too slowly in Poland The research is valuable for systematizing the idea of a circular economy based on the theoretical and practical aspects of this phenomenon The results of the analysis are also of practical importance for the process of modeling and implementing this idea in Poland Further the innovation paradigm of economic health and the prosperity of society is the subject of the research carried out based on a review of the health economy considering innovation and its impact on population growth and prosperity in the world The research particularly highlights the consequences of socio demographic environmental and business changes in the field of consumer goods The socio technical as well as the environmental aspects of the organization are also included in the last study presented The purpose of this study was to identify the attitudes of IT employees in the Polish ITC sector towards remote work Since the effective and efficient collaboration of distributed employees performing remote work has become even more necessary for the success of projects numerous research works are being conducted focusing on the consequences of remote work The presented research results are an important contribution to the discussion of researchers and management practitioners By publishing this monograph which covers a wide spectrum of research problems in contemporary commercial and non profit organizations the editors and authors presenting the results of their research express a hope that they are contributing to the widespread dissemination and enrichment of knowledge and consequently socio economic development

Complex Systems: Innovation and Sustainability in the Digital Age Aleksei V.

Bogoviz,2021-06-01 This book provides a coherent framework for understanding the essence of complex systems and the nature of digital transformations analyzes challenges of and patterns in innovative development and shares a wealth of insights and best practices resulting in the most extensive coverage of the topic available In particular the book s cutting edge contributions prepared by scientists engineers and field experts focus on the design implementation and evaluation of practical interventions that promote the innovative and sustainable development of complex systems In addition to sharing a rich collection of cases from around the world they provide a broad interdisciplinary analysis of collaboration mechanisms theories and approaches to support and accelerate the development of complex systems

Work Time Cynthia L. Negrey, 2013-04-23 Work Time is a sociological overview of a complex web of relations that shapes much of our experience of work and life yet often goes without critical examination

Cynthia Negrey examines work time past and present exploring structural economic change and the gender division of labor to ask what are the historical cultural public policy and business sources of current work time practices Topics addressed include work time reduction in the US culminating in the 40 hour statute of 1938 recent trends in annual and weekly hours overtime part time work temporary employment work family integration and international comparisons She focuses on the US in a global context and explores how a new political economy of work time is taking shape This book brings together existing knowledge from sociology anthropology history labor economics and family studies to answer its central question and will change the way upper level students think about the time we devote to work

The Fabric of Interface Stephen Monteiro, 2017-11-10 Tracing the genealogy of our physical interaction with mobile devices back to textile and needlecraft culture For many of our interactions with digital media we do not sit at a keyboard but hold a mobile device in our hands We turn and tilt and stroke and tap and through these physical interactions with an object we make things images links sites networks In *The Fabric of Interface* Stephen Monteiro argues that our everyday digital practice has taken on traits common to textile and needlecraft culture Our smart phones and tablets use some of the same skills manual dexterity pattern making and linking required by the handloom the needlepoint hoop and the lap sized quilting frame Monteiro goes on to argue that the capacity of textile metaphors to describe computing weaving code threaded discussions zipped files software patches switch fabrics represents deeper connections between digital communication and what has been called homecraft or women's work Connecting networked media to practices that seem alien to media technologies Monteiro identifies handicraft and textile techniques in the production of software and hardware and cites the punched cards that were read by a loom's rods as a primitive form of computer memory examines textual and visual discourses that position the digital image as a malleable fabric across its production access and use compares the digital labor of liking linking and tagging to such earlier forms of collective production as quilting bees and piecework and describes how the convergence of intimacy and handiwork at the screen interface combined with needlecraft aesthetics genders networked culture and activities in unexpected ways

Communication Yearbook 30 Christina S. Beck, 2012-12-06 *Communication Yearbook 30* continues the tradition of publishing rich state of the discipline literature reviews This volume offers insightful descriptions of research as well as reflections on the implications of those findings for other areas of the discipline Editor Christina S Beck presents a diverse international selection of articles that highlight empirical and theoretical intersections in the communication discipline Chapters in this volume include reviews of literature on gain framed and loss framed messages conversational topic organizational rhetoric work life research collaboration bullying forgiveness language revitalization Latina/o representation in the media and television viewing patterns of older adults This volume will be valuable to scholars across the communication discipline *Communication Yearbook 30* will be particularly beneficial to scholars in the areas of interpersonal health organizational family and intercultural communication language and social interaction and media studies

All Edge

Clay Spinuzzi,2015-03-17 Work is changing Speed and flexibility are more in demand than ever before thanks to an accelerating knowledge economy and sophisticated communication networks These changes have forced a mass rethinking of the way we coordinate collaborate and communicate Instead of projects coming to established teams teams are increasingly converging around projects These all edge adhocracies are highly collaborative and mostly temporary their edge coming from the ability to form links both inside and outside an organization These nimble groups come together around a specific task recruiting personnel assigning roles and establishing objectives When the work is done they disband their members and take their skills to the next project Spinuzzi offers for the first time a comprehensive framework for understanding how these new groups function and thrive His rigorous analysis tackles both the pros and cons of this evolving workflow and is based in case studies of real all edge adhocracies at work His provocative results will challenge our long held assumptions about how we should be doing work

Teletechnologies, Place, and Community Rowan Wilken,2014-02-07 Teletechnologies or technologies of distance cannot be ignored Indeed the present electronic age is said to have wrought profound changes to how we think about and experience who we are where we are and how we relate with one another Place and community have traditionally formed key concepts for thinking about these issues but what relevance do these concepts now hold for us In this wide ranging study Wilken re evaluates how ideas of place and community intersect with and help us make sense of a world transformed by information and communication technologies This interdisciplinary investigation ranges across diverse textual and contextual terrain exploring approaches from media and communications architectural history and theory philosophy sociology geography literature and urban design The rich analysis of these myriad texts reveals the complex and at times contradictory ways in which notions of place and community circulate in relation to these technologies of distance Wilken s examination underscores both the enduring importance of ideas of place and community in the present age and the urgent need to continue to engage with think about and reconfigure these twin ideas

The Way We Work Regina Fazio Maruca,2007-12-30 From corner office to 24 7 the world of work has permeated every facet of our culture The Way We Work explores in over 150 A Z entries the origins and impact of the concepts ideas fads and themes have become part of the business vernacular shedding light on the dynamic ways in which business and society both influence and reflect each other Assessing the evolving business environment in the context of technology development globalization and workplace diversity The Way We Work covers the gamut of business related topics including Crisis Management Outsourcing and Whistleblowing as well as popular subjects such as Casual Friday Feng Shui and Napster

News in Their Pockets Ran Wei,Ven-hwei Lo,2021 Since the debut of the iPhone in 2007 the mobile phone has become a quick convenient and immensely popular gateway for accessing and consuming news With three billion mobile phone subscribers Asian countries have led this seismic shift in news consumption They provide a wide range of opportunities to study how as mobile technology matures and becomes routinized mobile news is increasingly subject to societal constraints and impositions of political power that reduce

the democratic benefits of such news and call into question the application of these technological innovations within governments and societies News in Their Pockets explores the societal technological and user related factors behind why and how digital savvy college students seek news via the mobile phone across Asia s most mobile cities Shanghai Hong Kong Singapore and Taipei Situating cross societal comparative analyses of mobile news consumption in Asia within a digital and global context this volume outlines the evolution of the mobile phone to its prominence in disseminating news offers predictors of patterns in mobile news consumption investigates user needs and expectations and illustrates future impacts on civic engagement from mobile news consumption By examining the interplay between game changing and empowering communication technology and constraining social systems News in Their Pockets provides the framework necessary for constructive continuing debates over the promise and peril of digital news and exposes our underlying reasoning behind the adoption of the mobile phone as the all in one media of choice to stay socialized entertained and informed in the modern digital age

Globalization and Its Counter-forces in Southeast Asia Terence Chong, 2003-08-01 This volume is a collection of essays from a diverse group of scholars Collectively they present a multidimensional perspective of globalization in Southeast Asia They delve into the political economic security social and cultural dimensions of globalization and local responses offering evidence of complex interfacing between the global and the local thus championing the need for a multidisciplinary approach to globalization studies This volume depicts globalization as an uneven and sometimes undesired process and resists the temptation for easy conclusions to the challenges facing the region today
