run in 2004 but would wait until 2008 The book goes into depth concerning the dangers to the Country of electing Hillary My first three books There Are No Bad Kids Never Underestimate the Arrogance or Stupidity of Government and High On Life were all published by 1st Books Library The first was written as a result of a traumatic experience in our lives and the second describes what I believe created that trauma High On Life creates a completely different atmosphere The title came as the result of one of my children becoming hooked on cocaine I faithfully believe that no one needs a narcotic to get high Life is the only high necessary America 2.0, Inc. - Take Stock In America! Ersatz America Rebecca Mark,2014-12-02 From the popular legend of Pocahontas to the Civil War soap opera *Gone with the Wind* to countless sculpted heads of George Washington that adorn homes and museums whole industries have emerged to feed America s addiction to imaginary histories that cover up the often violent acts of building a homogeneous nation In *Ersatz America* Rebecca Mark shows how this four hundred year old obsession with false history has wounded democracy by creating language that is severed from material reality Without the mediating touchstones of body and nature creative representations of our history have been allowed to spin into dangerous abstraction Other scholars have addressed the artificial qualities of the collective American memory but what distinguishes *Ersatz America* is that it does more than simply deconstruct it provides a map for regeneration Mark contends that throughout American history citizen artists have responded to the deadly memorialization of the past with artistic expressions and visual artifacts that exist outside the realm of official language creating a counter narrative These examples of what she calls visceral graphism are embodied in and connected to the human experience of indigenous peoples enslaved Africans and silenced women giving form to the unspeakable We must learn Mark suggests to read the markings of these works against the iconic national myths In doing so we can shift from being mesmerized by the monumentalism of this national mirage to embracing the regeneration and recovery of our human history **America**

Dinesh D'Souza,2014-06-02 1 New York Times Bestseller Is America a source of pride as Americans have long held or shame as Progressives allege Beneath an innocent exterior are our lives complicit in a national project of theft expropriation oppression and murder or is America still the hope of the world Dinesh D Souza says these questions are no mere academic exercise It is the Progressive view that is taught in our schools that is preached by Hollywood and that shapes the policies of the Obama administration If America is a force for inequality and injustice in the world its power deserves to be diminished if traditional America is based on oppression and theft then traditional America must be reformed and the federal government can do the reforming In *America Imagine a World without Her* D Souza offers a passionate and sharply reasoned defense of America knocking down every important accusation made by Progressives against our country Provocative in its analysis stunning in its conclusions Dinesh D Souza s *America* is a new classic **United States of America V. [The Future in America](#) Herbert George Wells,1906 **Why Korean Education is Leaving America in the DUST** William D. Hedges,2011-07-26 This author not only identifies the major shortcomings of the American Public Elementary School but makes thirty three specific recommendations as to how to improve them He does this because he fears America is falling behind other nations particularly the Asian countries such as South Korea Japan and China He decries the short teaching day and teaching year of the United States in comparison with those nations that are leaving us behind such as

South Korea He pulls no punches in taking on the politicians In the process parents are not spared as they have exempted their children from walking to neighborhood schools and losing the exercise children experienced in walking by driving them Our drop out rate of one third is a disgrace when other nations graduate over 93% from high school says Hedges After describing Korean education and making recommendations in the first three chapters the author then sets forth how modern elementary schools should be and can be organized and operated in contrast with the way so many of them are organized and operated today This development would help them in contrast with Korean Schools which are more lockstep He points out that one reason for so many home study children is that parents are not pleased with what the elementary public schools are providing They want an education tailor made for their children and they set about doing it when the public schools come up short Too many of our schools proceed in lock step tracking children into dumb average above average and bright groups when with modern computers this is no longer necessary Hedges an author of two books on testing and one on early childhood education maintains that the testing going on is for all of the wrong reasons i e 1 to evaluate teachers 2 to compare students with one another 3 to compare schools with one another In his view tests should be used as the medical profession uses tests i e to diagnose individual needs and thus to serve as a basis for how to help the student not just give him an A or an F As he says What if when you go to the doctor he hands you a card which gives you a C on your health What the devil does that mean Instead the doctor reviews the test data analyzes it and gives you a prescription So why aren't our schools doing that in education The book is not only a clarion call to arms but a practical How To How to provide for individual differences How to make sure your child will succeed in primary school How to organize other than by grades How to enable more independent study and encourage creativity in your youngster How can parents tell if their school is any good How to be clear on the objectives of the school How should young children be graded and evaluated This book is for superintendents and principals as they are the leaders for elementary teachers as they are the doers for school board member as they are the policy makers and for those parents who want to know what an excellent elementary school should be like It is not pie in the school dreaming but a down to earth description of how things are versus how they might be in the modern up to date school Consider just one of his practical tips for some parents What can the parent of a slightly immature child do to increase the probability his or her child will be a smash hit Here is how Let us say that he can enter first grade at age six Well age six is 365 days If this child was born January 1 he is 364 days younger than the child born on December 31 A whole year Think what that means in terms of his growth development and readiness for first grade So throw in that many of the children will be more mature than his child The result His or her child is a failure in the eyes of the other kids who are doing so much better than he because America grades on the curve
