Soul Of A New Machine:

The Soul of A New Machine Tracy Kidder, 2011-08-23 Tracy Kidder's riveting Washington Post story of one company's efforts to bring a new microcomputer to market won both the Pulitzer Prize and the National Book Award and has become essential reading for understanding the history of the American tech industry. Computers have changed since 1981 when *The Soul of a New Machine* first examined the culture of the computer revolution. What has not changed is the feverish pace of the high tech industry the go for broke approach to business that has caused so many computer companies to win big or go belly up and the cult of pursuing mind bending technological innovations. *The Soul of a New Machine* is an essential chapter in the history of the machine that revolutionized the world in the twentieth century. Fascinating. A surprisingly gripping account of people at work. Wall Street Journal

Encyclopedia of New Media Steve Jones, 2002-12-10 Scholars and students finally have a reference work documenting the foundations of the digital revolution. Were it not the only reference book to cover this emergent field Jones's encyclopedia would still likely be the best CHOICE. The articles are interesting, entertaining, well written and reasonably long. Highly recommended as a worthwhile and valuable addition to both science and technology and social science reference collections. REFERENCE USER SERVICES QUARTERLY AMERICAN LIBRARY ASSOCIATION

From Amazon.com to virtual communities this single volume encyclopedia presents more than 250 entries that explain communication technology, multimedia, entertainment and e-commerce within their social context. Edited by Steve Jones, one of the leading scholars and founders of this emerging field and with contributions from an international group of scholars as well as science and technology writers and editors, the *Encyclopedia of New Media* widens the boundaries of today's information society through interdisciplinary historical and international coverage. With such topics as broadband, content filtering, cyberculture, cyberethics, digital divide, freenet, MP3, privacy, telemedicine, viruses and wireless networks, the *Encyclopedia* will be an indispensable resource for anyone interested or working in this field. Unlike many encyclopedias that provide short, fragmented entries, the *Encyclopedia of New Media* examines each subject in depth in a single coherent article. Many articles span several pages and are presented in a large double column format for easy reading. Each article also includes the following: A bibliography, Suggestions for further reading, Links to related topics in the *Encyclopedia*, Selected works where applicable. Entries include: Pioneers such as Marc Andreessen, Marshall McLuhan and Steve Jobs, Terms from Access to Netiquette to Web cam, Technologies including Bluetooth, MP3 and Linux, Businesses such as Amazon.com, Key labs, research centers and foundations, Associations, Laws and much more. The *Encyclopedia of New Media* includes a comprehensive index as well as a reader's guide that facilitates browsing and easy access to information. Recommended Libraries: Public, academic, government, special and private corporate.

Constructing Rhetorical Education Davida Charney, Wilma R. Ebbitt, 1992 In nineteen essays illustrating its many aspects this book offers an argument for what it takes to construct a complete rhetorical education The editors take an approach that is pragmatic and pluralistic based as it is on the assumptions that a rhetorical education is not limited to teaching freshman composition or any specific writing course and that the contexts in which such an education occurs are not limited to classrooms This thought provoking volume stresses that while a rhetorical education results in the growth of writing skills its larger goal is to foster critical thinking
