Sound And Silences:

Images, Improvisations, Sound, and Silence from 1000 to 1800 - Degree Zero Babette Hellemans, Alissa Jones Nelson, 2025-10-01 The act of drawing a line or uttering a word is often seen as integral to the process of making art This is especially obvious in music and the visual arts but applies to literature performance and other arts as well These collected essays written by scholars from diverse fields take a historical view of the richness of creation out of nothing creatio ex nihilo in order to draw out debates sometimes implicit and sometimes formally stated about the production and reproduction of cultural meaning in a period of great change and novelty between the beginnings of the medieval intellectual tradition and the imprint of the Enlightenment The authors pose the following questions Do tradition and creativity conflict with one another or are they complementary What are the tensions between composition and live performance What is the role of the audience in perceiving the object of art Are such objects fixed or flexible What about the status of the event Is the event part of creation in the sense that it disturbs the still waters of historical continuity These and other questions build on the foundation of Roland Barthes concept of Degree Zero offering new insights into what it means to create **The Routledge Companion to Creativities in Music Education** Clint Randles, Pamela Burnard, 2022-12-30 Viewing the plurality of creativity in music as being of paramount importance to the field of music education The Routledge Companion to Creativities in Music Education provides a wide ranging survey of practice and research perspectives Bringing together philosophical and applied foundations this volume draws together an array of international contributors including leading and emerging scholars to illuminate the multiple forms creativity can take in the music classroom and how new insights from research can inform pedagogical approaches In over 50 chapters it addresses theory practice research change initiatives community and broadening perspectives A vital resource for music education researchers practitioners and students this volume helps advance the discourse on creativities in music education **Adoor Gopalakrishnan** Gautaman Bhaskaran, 2010 On the life and works of Adoor Gopalakrishnan b 1941 Malayalam film director **Minds on Music** Michele Kaschub, Janice P. Smith, 2009-06-15 This textbook enhances preservice and practicing music educators understanding of ways to successfully engage children in music composition It offers both a rationale for the presence of composition in the music education program and a thorough review of what we know of children s compositional practices to date Minds On Music offers a solid foundation for planning and implementing composition lessons with students in grades PreK 12 *A Text-book of Human Physiology* Leonard Landois, 1892 *Silence, Sounds, Music* Florian Freitag, Laura Katharina Mücke, Peter Niedermüller, 2025-02-20 This book examines the intersections of silence with immersive arts and experiences Silence and immersion may seem antithetical while immersion is supposedly induced by acoustic and other stimuli silence is commonly understood as the absence or opposite of sound Since the eighteenth century however silence has been established as a multifarious and polyvalent cultural concept Immersion in turn though often used as a simple all

inclusive term has old and complex ontological and epistemological roots Organized into three parts this book brings critical historical and theoretical debates on silence into dialogue with different notions of immersion The 16 theoretical articles and case studies engage in discovering and questioning the continued prominence of both concepts in aesthetics culture and media Covering music film digital visual and performance art theater video games and theme parks the chapters discuss both highly canonical and rarely examined artifacts Written by scholars from Germany Austria France and Switzerland the interdisciplinary collection includes perspectives from musicology film studies cultural and media studies gender studies art history and philosophy Silence Sounds Music addresses both an academic and a wider audience It will be of interest to anyone interested in music sound immersive experiences the so called experience economy and contemporary art and culture

Decent People Norman S. Care, 2000 In this book Norman S Care addresses the question of what it is to be a good or decent person His discussion is centered on motivation issues rather than on the content of moral principles or the imperatives of ethical theory He argues that decent people are constrained by moral emotional nature to take certain things seriously and this is part of what it means to have a moral life The background of the discussion is the world around us The world is no extension of the affluence that shields a few of us it is instead a sea of pain and despair with only small and sometimes temporary islands of stability and prosperity Studies from the Yale Psychological Laboratory Yale Psychological Laboratory, 1902 *Number to Sound* P. Gozza, 2013-03-09 Number 10 Sound The Musical Way 10 the Scientific Revolution is a collection of twelve essays by writers from the fields of musicology and the history of science The essays show the idea of music held by European intellectuals who lived from the second half of the 15 century to the early 17 physicians e g Marsilio Ficino scholars of musical theory e g Gioseffo Zarlino Vincenzo Galilei natural philosophers e g Francis Bacon Isaac Beeckman Marin Mersenne astronomers and mathematicians e g Johannes Kepler Galileo Galilei Together with other people of the time whom the Reader will meet in the course of the book these intellectuals share an idea of music that is far removed from the way it is commonly conceived nowadays it is the idea of music as a science whose object musical sound can be quantified and demonstrated or enquired into experimentally with the methods and instruments of modern scientific enquiry In this conception music to be heard is a complex variable structure based on few simple elements e g musical intervals combined according to rules and criteria which vary along with the different ages However the varieties of music created by men would not exist if they were not based on certain musical models e g the consonances which exist in the mind of God or are hidden in the womb of Nature which man discovers and demonstrates and finally translates into the language of sounds **Ecologies of Resonance in Christian Musicking** Mark Porter, 2020-09-25 Ecologies of Resonance in Christian Musicking explores a diverse range of Christian musical activity through the conceptual lens of resonance a concept rooted in the physical vibrational and sonic realm that carries with it an expansive ability to simultaneously describe personal social and spiritual realities In this book Mark Porter proposes that attention to patterns of

back and forth interaction that exist in and alongside sonic activity can help to understand the dynamics of religious musicking in new ways and at the same time can provide a means for bringing diverse traditions into conversation
