Sound Sentiment Integrity In The Emotions:

Sound Sentiments David Pugmire, 2005-04-21 Sound Sentiments seeks to open a new path in the philosophy of emotion. The focus of most recent work on the philosophy of emotion has been on the nature of emotion with some attention also to the relation of emotion to ethics. This book explores the idea that emotions admit of valuation of degrees of adequacy. We cannot just decide what to think or to desire or to feel as we can decide to act and these attitudes are integral to emotions. Nonetheless emotions can have normative characteristics that resemble virtues. Philosophers are familiar with the notion that emotions are valuational. But how well they serve that function determines the value they themselves have. The book opens with an account of the theory of emotion reflecting recent work on that and considers the way in which emotions are valuational with reference to the contributions of writers such as de Sousa Gibbard and McDowell. The worth of an emotional experience depends on the quality of the valuation it itself achieves. Most of the book is then devoted to a set of interconnected themes. Some of these concern properties that emotions can have which can variously enhance or detract from them: profundity, social leverage, narcissism and sentimentality. Others are attitudes with characteristic emotional loadings and sometimes motivations that raise similar questions: cynicism, ambivalence and sophistication. David Pugmire's general approach is indirect and negative to analyse emotional foibles which tend to elude us as we succumb to them and thereby to point to what soundness in emotion would be. He also elicits connections amongst these aspects of the emotional life. The most pervasive is the dimension of profundity which opens the discussion; each of the subsequent problems amounts to a way in which emotion can be shallow and slight and so amount to less than it seems and accordingly each identifies a form of integrity in the emotions.

The ^AEmotions in Early Chinese Philosophy Curie Virág, 2017-02-13 In China the debate over the moral status of emotions began around the fourth century BCE when early philosophers first began to invoke psychological categories such as the mind xin human nature xing and emotions qing to explain the sources of ethical authority and the foundations of knowledge about the world Although some thinkers during this period proposed that human emotions and desires were temporary physiological disturbances in the mind caused by the impact of things in the world this was not the account that would eventually gain currency The consensus among those thinkers who would come to be recognized as the foundational figures of the Confucian and Daoist philosophical traditions was that the emotions represented the underlying dispositional constitution of a person and that they embodied the patterned workings of the cosmos itself Curie Vir g sets out to explain why the emotions were such a central preoccupation among early thinkers situating the entire debate within developments in conceptions of the self the cosmos and the political order She shows that the mainstream account of emotions as patterned reality emerged as part of a major conceptual shift towards the recognition of natural reality as intelligible orderly and coherent The mainstream account of emotions helped to summon the very idea of the human being as a universal category and to establish the cognitive and practical agency of human beings This book the first intensive study of the subject traces the genealogy of these early Chinese philosophical conceptions and examines their crucial role in the formation of ethical political and cultural values in China
