A Theory of Music Analysis Dora A. Hanninen, 2012 This book introduces a theory of music analysis that one can use to explore aspects of segmentation and associative organization in a wide range of repertoire including Western classical music from the Baroque to the present with potential applications to jazz and popular music and some non Western musics. Rather than a methodology the theory provides analysts with precise language and a broad flexible conceptual framework through which they can formulate and investigate questions of interest and develop their own interpretations of individual pieces and passages. The theory begins with a basic distinction among three domains of musical experience and discourse about it: the sonic, psychoacoustic, the contextual or associative, sparked by varying degrees of repetition and the structural, guided by a specific theory of musical structure or syntax invoked by the analyst. A comprehensive presentation of the theory with copious musical illustrations is balanced with close analyses of works by Beethoven, Debussy, Nancarrow, Riley, Feldman and Morris. Dora A. Hanninen is professor of music theory at the University of Maryland. She received the 2010 Outstanding Publication Award from the Society for Music Theory.
