Structural Rigidities And Policy Inertia In Interwar Belgium:

Alien Policy in Belgium, 1840-1940 Frank Caestecker, 2000 Belgium has a unique place in the history of migration in that it was the first among industrialized nations in Continental Europe to develop into an immigrant society In the nineteenth century Italians Jews Poles Czechs and North Africans settled in Belgium to work in industry and commerce They were followed by Russians in the 1920s and Germans in the 1930s who were seeking a safe haven from persecution by totalitarian regimes In the nineteenth century immigrants were to a larger extent integrated into Belgian society they were denied political rights but participated on equal terms with Belgians in social life This changed radically in the twentieth century by 1940 the rights of aliens were severely curtailed while those of Belgian citizens in particular in the social domain were extended While the state evolved into a welfare state for its citizens it became more of a police state for immigrants The state only tolerated immigrants who were prepared to carry out those jobs that were shunned by the Belgians Under the pressure of public opinion an exception was made in the cases of thousands of Jewish refugees that had fled from Nazi Germany However other immigrants were subjected to harsh regulations and in fact became the outcasts of twentieth century Belgian liberal society This remarkable study examines in depth and over a long time span how anti alien policies were transformed resulting in an illiberal exclusion of foreigners at the same time as democratization and the welfare state expanded In this respect Belgium is certainly not unique but offers an interesting case study of developments that are characteristic for Europe as a whole

Belgium's Dilemma Jonathan A. Epstein, 2014-03-27 In Belgium's Dilemma The Formation of Belgian Defense Policy 1932-1940 Jonathan Andrew Epstein presents for the first time in English a detailed examination of the formation of Belgian defense policy in the eight years leading up to the crucial World War II Blitzkrieg campaign in Western Europe Belgium's decision to renounce military ties with France in 1936 has been widely criticized as a fatal mistake but it was in fact a reasonable response to Belgium's situation and was not a significant factor in the Allied defeat Drawing on Belgian documents Jonathan Andrew Epstein looks at the leaders and issues that shaped the Belgian army of 1940 and demonstrates that while mistakes were made most of the decisions were sound

Structural Rigidities and Policy Inertia in Inter-war Belgium Robin L. Hogg, 1986

Capital Formation in Belgium, 1900-1995 Michelangelo van Meerten, 2003 Based on the analysis of more than 35 000 company balance sheets annual series of gross private investment have been constructed for 15 different sectors in Belgium between 1900 and 1995 The resulting data clearly show that the level of gross investment in the Belgian economy expressed as a percentage of national income was generally much lower than during the post world war two period An international comparison demonstrates that Belgium usually invested far less than its major competitors Moreover the traditional coal and metal industries benefitted most of the investment effort instead of newer sectors like the chemical industry Thus the present study contributes to explaining for the relatively poor growth performances of the Belgian economy prior to the 1960s

Political History of Belgium Els

Witte, Jan Craeybeckx, Alain Meynen, 2009 The political history of Belgium is a fascinating story that should not be kept from speakers of English in Belgium and abroad *Architectures of Bureaucracy* Jens van de Maele, 2025-01-27 This monograph examines the interrelationship between politics and modernist architecture in interwar Belgium focusing on political architectural and administrative elites as propagators of new ideas of governance While Belgium was strongly influenced by neighbouring France and Germany it also developed its own avant garde approaches to socio political problems In the second half of the 1930s the country was the scene of a remarkable political and architectural experiment involving an ambitious plan for the large scale construction of modernist government office buildings These buildings were seen as essential to the development of a technocratic model of governance aimed at strengthening the role of the executive and minimising the influence of parliament More specifically the efficient new office architecture was supposed to create a new type of perfect civil servant whose loyalties would no longer lie with political parties but with scientists and management experts Such experts and scientists constituted a rising elite of homines novi with strong though often veiled political ambitions As such this book contributes to our understanding of political culture in the age of extremes **How Can One Not be Interested in Belgian History** Benno Barnard, 2005 As Belgian history addresses questions of identity and security of a sense of cohesion and common purpose or the lack thereof this volume tells you why Belgium does matter *The European Economy Since 1914* Derek Aldcroft, Steven Morewood, 2012-12-07 The fifth edition of *The European Economy* provides a succinct and lucid account of the development and problems of the European economy since the first world war It covers the whole of Europe including Russia and Turkey The text divides into several clearly defined sub periods the impact and aftermath of the first world war and recovery and reconstruction during the 1920s the depression and the recovery of the 1930s the impact of the second world war and the new political division in Europe the post war boom of the 1950s and 1960s and then into the growth slowdown of the 1970s and the persistent problems of inflation and unemployment It then analyses the demise of the centrally planned economies of eastern Europe and the move to a more united Europe and then discusses the financial and economic problems that have emerged in the early twenty first century This new edition has been extensively revised new chapters have been added and the reading lists updated Though the volume is designed as a basic introductory text the authors elicit some of the lessons that can be learnt from a study of past development one of which is the limited power of governments to influence the course of events and to combat the operation of market forces **The European Economy 1914-2000** Derek Aldcroft, 2002-01-10 As in earlier editions of this work Professor Aldcroft presents a succinct and lucid account of the development and problems of the European economy throughout the twentieth century The text divides into several clearly defined sub periods the aftermath of the First World War and reconstruction in the 1920s the depression and recovery of the 1930s the impact of the Second World War and the new division of Europe the postwar boom of the 1950s and 1960s the growth slowdown of the 1970s and the pervasive problems of inflation and unemployment This new edition

incorporates extensive revisions including wide range coverage of the impact of economics union and the demise of the centrally planned economies revised bibliographies and topics for discussion The European Economy 1914 2000 provides an invaluable guide to the major economic changes in both Western and Eastern Europe during the twentieth century The European Economy Since 1914 Derek Howard Aldcroft, Steven Morewood, 2013 The European Economy Since 1914 provides an invaluable guide to the major economic changes in both Western and Eastern Europe during the twentieth century
