Structure/performance Relationships in Surfactants Milton J. Rosen, 1984 Mixed Surfactant Systems Keizo Ogino, Masahiko Abe, 1992-12-22 This work describes the solubility solution properties thermodynamics miscibility solubilization mesomorphic character and other physical properties of mixed surfactant systems presenting both theoretical analysis and a wide range of practical applications Equations clarify complex and abstract constructs The book also treats mixed critical micelle concentrations surface tension flotation and absorption in terms of thermodynamic models explores the miscibility of fluorocarbon and hydrocarbon surfactants in the micelles covering micelle formation liquid liquid solubility and thermodynamics of mixed micellization determines the mean aggregation number by steady state quenching methods and analyzes the composition of mixed micelles discusses the mechanisms and experimental studies of adsorption from mixed surfactant systems examines surface activity of surfactant mixtures mixing phenomena and liquid crystal phase behaviour and reviews means of investigation that use ion specific electrodes light scattering and NMR and fluorescence probing

Charalambous, 1995-02-21 In this book major emphasis is placed on the effects of processing and food components upon the flavor of foods and beverages Topics discussed include roasting of peanuts extrusion of cooking poultry spray drying of natural flavor materials cooking rates of foods gamma radiation of packaging films stir frying of saut d flavors emulsification properties of egg yolk and lupin proteins the interaction of flavor compounds with flour starch and polysaccharides factors affecting development of flavor in whisky wines fermented products alcohol precursors and model food systems applications of enzymes for production of flavor in fish lobster and pork and the development and application of analytical methods for isolation and identification of volatile compounds and flavors from a variety of food products Information presented in this book will be useful to chemists scientists and technologists working in flavor chemistry food product research and development and food quality control **Surfactant Aggregation** J.H. Clint, 2012-12-06 Surface Active Agents surfactants are vital components in biological systems form key ingredients in consumer products and play an important role in many industrial processes For example cell membranes owe their structure to the aggregation of surfactants known as lipids which form a major component of the membrane Other natural surfactants occur in the digestive system in the lungs and even in such substances as crude oil Man made surfactants are used in a wide range of domestic and industrial products and processes In addition to detergents and personal care products surfactants have found uses in almost every branch of the chemical industry as well as in several other industries These include dyestuffs fibres mineral processing oil field chemicals paints pesticides pharmaceuticals and plastics Surfactants are versatile materials which are manufactured in a huge variety of forms to suit all of these applications As a result of their importance the technical literature on all aspects of surfactant behaviour is now very extensive Surprisingly however the treatment in textbooks has been somewhat fragmented often in the form of conference proceedings or edited multi authored works both lacking in continuity

Cationic Surfactants D. Rubingh, 1990-10-23 Focusing on the solution physical chemistry and surface properties of cationic surfactants three major sections examine the properties of cationic surfactants themselves both in solution and at interfaces the interactions of cationic surfactants with other materials and applications of cationic s
