Structure Of International Society

Barbara Allen Roberson

Structure Of International Society:

The Structure of International Society Geoffrey Stern, 1995-01 An introduction to the field of international relations for students new to the subject with theoretical and historical background in addition to discussion of modern issues It outlines theories such as realism rationalism and revolutionism and the evolution of international society and discusses legal and political sovereignty inter state behavior imperialism non state actors the international political economy and prospects for world peace Annotation copyright by Book News Inc Portland OR

Structure of International Society Geoffrey Stern, 2000-02-01 This second edition of this textbook places in context key world events since 1945 While not neglecting the significant developments of the last 50 years this book has a broad historical and conceptual range It provides students with a historical analysis of the origins development and early networks of IR and an exposition of the diverse ways in which modern international society has been defined and interpreted Tackling a range on international concerns Geoffrey Stern explores and clarifies such concepts as sovereignty the balance of power national interest and interdependence illustrating his text with reference to both historical and contemporary world events

Saving Strangers Nicholas J. Wheeler, 2000-09-08 The extent to which humanitarian intervention has become a legitimate practice in post cold war international society is the subject of this book It maps the changing legitimacy of humanitarian intervention by comparing the international response to cases of humanitarian intervention in the cold war and post cold war periods Crucially the book examines how far international society has recognised humanitarian intervention as a legitimate exception to the rules of sovereignty and non intervention and non use of force While there are studies of each case of intervention in East Pakistan Cambodia Uganda Iraq Somalia Rwanda Bosnia and Kosovo there is no single work that examines them comprehensively in a comparative framework Each chapter tells a story of intervention that weaves together a study of motives justifications and outcomes The legitimacy of humanitarian intervention is contested by the pluralist and solidarist wings of the English school and the book charts the stamp of these conceptions on state practice Solidarism lacks a full blown theory of humanitarian intervention and the book supplies one This theory is employed to assess the humanitarian qualifications of the cases of intervention analysed in the book and this normative assessment is then compared to the moral practices of states A key focus is to examine how far humanitarian intervention as a legitimate practice is present in the diplomatic dialogue of states In exploring how far there has been a change of norm in the society of states in the 1990s the book defends the broad based constructivist claim that state actions will be constrained if they cannot be legitimated and that new norms enable new practices but do not determine these The book concludes by considering how far contemporary practices of humanitarian intervention support a new solidarism and how far this resolves the traditional conflict between order and justice in international society

International Society and the Making of International Order Günther Auth, 2005 Theorising within the American discipline of International Relations has been plagued by a rather severe intellectual crisis Theorists have

meant that they need to emulate the natural sciences of the eighteenth and nineteenth centuries in outlook and argumentative style But this has destroyed much awareness for the nature of modern international relations as a dynamically evolving historical process This book seeks to overcome the vicissitudes of mainstream theorising by abandoning the discipline's scientism and by adopting a stance that is more in tune with the standards of modern social science

International Society Evan Luard, 2016-07-27 This study of international society deals with social theory the structure of society ideology conflicts and the authority within International Society and the Development of International Relations

Theory Barbara Allen Roberson, 1998-01-01 This collection of essays has been written by major international relations theorists and it sets out a critical appreciation of the development of the international society idea and its influence on international relations theory National Interests in International Society Martha Finnemore, 1996-10-15 How do states know what they want Asking how interests are defined and how changes in them are accommodated Martha Finnemore shows the fruitfulness of a constructivist approach to international politics She draws on insights from sociological institutionalism to develop a systemic approach to state interests and state behavior by investigating an international structure not of power but of meaning and social value An understanding of what states want she argues requires insight into the international social structure of which they are a part States are embedded in dense networks of transnational and international social relations that shape their perceptions and their preferences in consistent ways Finnemore focuses on international organizations as one important component of social structure and investigates the ways in which they redefine state preferences She details three examples in different issue areas In state structure she discusses UNESCO and the changing international organization of science In security she analyzes the role of the Red Cross and the acceptance of the Geneva Convention rules of war Finally she focuses on the World Bank and explores the changing definitions of development in the Third World Each case shows how international organizations socialize states to accept new political goals and new social values in ways that have lasting impact on the conduct of war the workings of the international political economy and the structure of states themselves *International Society and Its Critics* Alex J. Bellamy, 2005 In recent years the English School or international society approach to International Relations has risen to prominence because its theories and concepts seem able to help us explain some of the most complex and seemingly paradoxical features of contemporary world politics In doing so the approach has attracted a variety of criticisms from both ends of the political spectrum Some argue that the claim that states form an international society is premature in an era of terror where power politics and the use of force have returned to the fore Others insist that international society's state centrism make it an inherently conservative approach unable to address many of the world's most pressing problems *International Society and Its Critics* provides the first in depth study of the English School approach to International Relations from a variety of different theoretical and practical perspectives Sixteen leading scholars from three continents critically evaluate the School's contribution to the study of

international theory and history consider its relationship with a variety of alternative perspectives including international political economy feminism environmentalism and critical security studies and assess how the approach can help us to make sense of the big issues of the day such as terrorism the management of cultural difference global governance the ethics of coercion and the role of international law They find that whilst the concept of international society helps to shed light on many of the important tensions in world politics much work still needs to be done In particular the approach needs to broaden its empirical scope to incorporate more of the issues and actors that shape global politics draw upon other theoretical traditions to improve its explanations of change in world politics and recognize the complex and multi layered nature of the contemporary world **The International Society as a Legal Community** Hermann Mosler, 1980-01-01

Global International Society Barry Buzan, Laust Schouenborg, 2018-08-23 This ambitious book provides a new framework for analysing global international society GIS In doing so it also links the English School's approach more closely to classical sociology constructivism liberal institutionalism realism and postcolonialism It retells the expansion of international society story to explain why the differences among states are as important as their similarities in understanding the structure and dynamics of contemporary GIS Drawing on differentiation theory it sets out four ideal type models for international society These cover the like units of the classical English School as well as differentiation by geography hierarchy privilege and function These models offer a systematic way to integrate international and world society and to understand the relationship between the deep structure of primary institutions and the vast array of intergovernmental and international non governmental organisations In this pioneering book Buzan and Schouenborg present the reader with the first systematic attempt to define criteria for assessing whether international society is becoming stronger or weaker
