In India over 30 per cent of the total population lives below the poverty line. Such a high degree of poverty highlights a serious dimension of the country's urban scenario also. The insufficient employment opportunities and poor income levels add to the miseries of the urban poor. They live in sub standard settlements like slums, unauthorized colonies, squatters' pavements, resettlement colonies etc. These settlements are considered to be the most filthy in the world. Taking a serious note of the growing urban poverty, the Government of India spent hundreds of crores of rupees on implementing various schemes and programmes with no significant result. Urban poverty continues to be an area of major concern and unbeatable challenge. It was against this backdrop experts working on different aspects of urban poverty were approached to contribute articles expressing their views and giving their first hand experiences. The reading of this volume can be immensely useful to professionals, government officials, activists etc. who are involved in poverty alleviation programmes.

The Fabric of Space

Matthew Gandy, 2014-11-07. A study of water at the intersection of landscape and infrastructure in Paris, Berlin, Lagos, Mumbai, Los Angeles and London. Water lies at the intersection of landscape and infrastructure, crossing between visible and invisible domains of urban space in the tanks and buckets of the global South and the vast subterranean technological networks of the global North. In this book, Matthew Gandy considers the cultural and material significance of water through the experiences of six cities: Paris, Berlin, Lagos, Mumbai, Los Angeles and London. Tracing the evolving relationships among modernity, nature and the urban imagination from different vantage points and through different periods, Gandy uses water as a lens through which to observe both the ambiguities and the limits of nature as conventionally understood. Gandy begins with the Parisian sewers of the nineteenth century, captured in the photographs of Nadar and the reconstruction of subterranean Paris. He moves on to the Weimar era, Berlin, and its protection of public access to lakes for swimming; the culmination of efforts to reconnect the city with nature. He considers the threat of malaria in Lagos, where changing geopolitical circumstances led to large scale swamp drainage in the 1940s. He shows how the dysfunctional water infrastructure of Mumbai offers a vivid expression of persistent social inequality in a postcolonial city. He explores the incongruous concrete landscapes of the Los Angeles River. Finally, Gandy uses the fictional scenario of a partially submerged London as the starting point for an investigation of the actual hydrological threats facing that city.

Living on the Margins:

Social Access to Shelter in Urban South Asia Navtej K. Purewal, 2024-11-01. This title was first published in 2000. The privatization of former social state housing through recent public private partnerships is becoming increasingly prevalent in Third World as well as in Western countries. In most Third World countries, this shift has had profound effects upon the patterns of access to shelter. Drawing on studies of South Asian and other Third World contexts as well as original in depth empirical research from Amritsar, a city in North West India, this book offers an analysis of the withdrawal of state housing provision. It develops and applies a unique model based on social status to analyze the new routes of access to housing and land by the urban poor. Its conclusions argue that these new privatization policies largely rely upon already existing informal

and self help settlements which continue to attract the poor and to be the largest housing providers in many cities thus providing a ready made safety net for such policies The inter linkages between the private state and the public market make up a highly diversified and complex picture of shelter arrangements being accessed by the poor which is reflected in the social differentiation and increasingly stratified housing market The book argues that these partnership policies therefore have long term implications upon social patterns of inclusion and exclusion which must be addressed **Emerging Social Science Concerns** Surendra K. Gupta, 2004 With reference to India on how social research depicted Social conditions
