Jonathan S. Golan

Structure Sheaves Over A Noncommutative Ring:

Structure Sheaves Over a Noncommutative Ring Jonathan S. Golan, 1980 **Localization and Sheaves** Jara Pascual, Conchi Vidal, A Verschoren, 1995-11-30 This book completely solves the problem of representing rings and modules over them which are locally noetherian over subsets of their prime spectrum by structure sheaves over this subset In order to realise this one has to develop the necessary localization theory as well as to study local equivalents of familiar concepts like the Artin Rees property Ore sets and the second layer condition The first part of the book is introductory and self contained and might serve as a starting course at graduate level on localization theory within Grothendieck categories The second part is more specialised and provides the basic machinery needed to effectively these structure sheaves as well as to study their functorial behaviour In this way the book should be viewed as a first introduction to what should be called relative noncommutative algebraic geometry Linear Systems over Commutative Rings James W. Brewer, John W. Bunce, Fred S. Van Vleck, 1986-04-22 **Virtual Topology and Functor Geometry** Fred Van Oystaeyen, 2007-11-15 Intrinsically noncommutative spaces today are considered from the perspective of several branches of modern physics including quantum gravity string theory and statistical physics From this point of view it is ideal to devise a concept of space and its geometry that is fundamentally noncommutative Providing a clear introduction to noncommutat Differential Equations with Applications in Biology, Physics, and Engineering Jerome A. Goldstein, Franz Keppel, Wilhelm Schappacher, 2017-10-05 Suitable as a textbook for a graduate seminar in mathematical modelling and as a resource for scientists in a wide range of disciplines Presents 22 lectures from an international conference in Leibnitz Austria no date mentioned explaining recent developments and results in differential equatio *Nonlinear and Convex Analysis* Bor-Luh Lin, Stephen Simone, 2023-05-31 This book contains expanded versions of the talks given at the conference held in honour of professor Ky Fan in California in 1985 as well as papers on nonlinear and convex analysis as contributions to Ky Fan It also includes a list of publications by Ky Fan **Combinatorial Designs and Applications** W.D. Wallis, 2020-12-22 An advanced reference containing 21 selected or consolidated papers presented at an international conference in April 1988 at Tunxi now Hunangshan China Contains recent previously unavailable findings of Chinese mathematicians discusses problems results and proving methods of combinatorial d **Mathematical Logic and Formal Systems** Alcantara, 1985-04-25 This unique collection of research papers provides an important contribution to the area of Mathematical Logic and Formal Systems Exploring interesting practical applications as well as problems for further investigation this single source reference discusses the interpretations of the concept of probability and their relationship to statistical methods illustrates the problem of set theoretical foundations and category theory treats the various aspects of the theory of large cardinals including combinatorial properties of some sets naturally related to them resolves an open problem in the theory of relations and characterizes interpretations of elementary theories as functors between categories whose objects are structures Written by world renowned authorities in
