Accentual Patterns in the Languages of the World Harry van der Hulst, Rob Goedemans, Ellen van Zanten, 2010 This volume contains a wealth of information on the word accentual metrical stress phenomena that we encounter in natural languages Two types of information will be supplied language profiles in tabular form and survey articles Of the total of 10 chapters in Part I 3 are general in nature while the other 7 describe and analyze word accentual systems in all continents The

volume's point of departure is a database called StressTyp StressTyp developed into a database on word prosodic systems of the languages of the world The over 500 languages representing a wide geographical distribution taken from the StressTyp database will be represented in this volume For all these languages information regarding identity sources and stress location's will be included accompanied by some examples in nearly all cases These language data packages will be organized by language family This information constitutes Part II of the volume

Clause Linkage in Cross-Linguistic Perspective Volker Gast, Holger Diessel, 2012-10-01 The volume is a collection of thirteen papers given at the Third Syntax of the World's Languages conference complemented with four additional papers as well as an introduction by the editors All contributions deal with clause combining focusing on one or both of the following two dimensions of analysis properties of the clauses involved types of dependency The studies are data driven and have a cross linguistic or typological orientation In addition to survey papers the volume contains in depth studies of particular languages mostly based on original data collected in recent field work

Number Greville G. Corbett, 2000-12-07 Number is the most underestimated of the grammatical categories It is deceptively simple yet the number system which philosophers logicians and many linguists take as the norm namely the distinction between singular and plural as in cat versus cats is only one of a wide range of possibilities to be found in languages around the world Some languages for instance make more distinctions than English having three four or even five different values Adopting a wide ranging perspective Greville Corbett draws on examples from many languages to analyse the possible systems of number He reveals that the means for signalling number are remarkably varied and are put to a surprising range of special additional uses By surveying some of the riches of the world's linguistic resources this book first published in 2000 makes a major contribution to the typology of categories and demonstrates that languages are much more varied than is generally recognised

Melanesian Pidgin and Tok Pisin John W. M. Verhaar, 1990 The First International Conference on Pidgins and Creoles in Melanesia was planned mainly for Tok Pisin but no predetermined theme's had been proposed to the participants Nevertheless in this collection of papers several principal themes stand out One is that of a revived interest in substratology both for Tok Pisin and for Bislama Another is what in fact amounts to a change in perspective from universalism as supposedly competitive with the substratological orientation towards a generalist approach to typology which reduces the apparent polarity from a theoretical point of view A third is the pervasive interest of contributors in wider language issues in the social and political life of Papua New Guinea These interests go back to the linguistic and social experience of the participants most of whom have a long record of living among the people whose languages they have studied on a day to day basis and to the relative remoteness of their inspiration from the more theoretical and perhaps ultimately untestable issues which surround the universalist approach and its claims for a bioprogram foundation for language

A Grammar of Kilmeri Claudia Gerstner-Link, 2018-09-24 This book is a description of Kilmeri a language of Papua New Guinea based on the author's fieldwork The volume is dedicated to the detailed

description of form and meaning and their interface which is supported through extensive illustration by examples The narrative structure of entire texts is accessible via a small collection of fully glossed personal and traditional stories included in the Online Supplement The typological evaluation of selected properties of Kilmeri rounds out the description of the language
