Counseling and the Resolution of Religious and Spiritual Struggles Mentanna Campbell, 2024-12-31 This book delves into the critical question of how counseling can help individuals navigate and resolve these struggles It prioritizes the true experts in this domain the strugglers themselves and provides an in depth examination of their experiences Using the rich methodological approach of hermeneutic phenomenology the author collaborates with participants to explore their lived experiences of the

therapeutic relationship and the therapist's way of being. By incorporating a common factors lens, the book offers insights into how therapists can engage with clients in a way that fosters an alliance capable of addressing religious and spiritual struggles and promoting growth. The book provides readers with a deep understanding of the struggle resolution process, identifies how these findings advance the field, and encourages practitioners to adopt the common factors meta model to work competently in this area. It also examines how counseling can help individuals resolve their struggles, identifying how and when faith-related questions emerge due to the failure of religious coping strategies. It introduces to the religious coping literature the pathway toward decline, delineates the process of how participants experience disconnection from God, self, and others, and puts forward three movements of the resolving process. Offering a new attempt to dissect this complex issue through the lens of common factors research, it will appeal to researchers, counselor educators, and postgraduate students with interests in religion and spirituality. This book is a significant contribution to the discourse on spiritual struggle and the role of counseling in addressing it.

Working with Spiritual Struggles in Psychotherapy Kenneth I. Pargament, Julie J. Exline, 2021-10-04

Does my life have any deeper meaning? Does God really care about me? How can I find and follow my moral compass? What do I do when my faith is shaken to the core? Spiritual trials, doubts, or conflicts are often intertwined with mental health concerns, yet many psychotherapists feel ill-equipped to discuss questions of faith. From pioneers in the psychology of religion and spirituality, this book combines state-of-the-art research, clinical insights, and vivid case illustrations. It guides clinicians to understand spiritual struggles as critical crossroads in life that can lead to brokenness and decline or to greater wholeness and growth. Clinicians learn sensitive, culturally responsive ways to assess different types of spiritual struggles and help clients use them as springboards to change.

Measures of Spirituality/Religiosity—Description of Concepts and Validation of Instruments Arndt Büssing, 2019-04-23

Why do we need more questionnaires to measure aspects of spirituality/religiosity when we already have so many well-tried instruments in use? One answer is that research in this field is growing, and that new research questions continuously do arise. Several of these new questions cannot be easily answered with the instruments designed for previous questions. The field is expanding, and consequently the research topics. Meanwhile, several multidimensional instruments were developed which cover existential, prosocial, religious, and non-religious forms of spirituality, hope, peace, and trust, and several more. The disadvantage of these instruments is the fact that some are conceptually broad and often rather unspecific, but they might be suited quite well for culturally and spiritually diverse populations when the intention is to compare such diverse groups. This is the reason why more research on new instruments is needed, as can be found in this Special Issue, and to stimulate a critical debate about their pros and cons.
