Mastering Public Administration Jos C. N. Raadschelders, Brian R. Fry, 2022-07-13 Raadschelders and Fry provide a singular investigation into the influence of 10 scholars on contemporary public administration as well as how significant their work continues to be on contemporary research. In a field that is eclectic and pragmatic, it is only fitting that the diversity of the following scholars reflects the diversity of the field of public administration: Max Weber, Frederick W. Taylor, Luther H. Gulick, Mary Parker Follett, Elton Mayo, Chester Barnard, Herbert A. Simon, Charles E. Lindblom, Elinor Ostrom, and Dwight Waldo. The impacts of their personal life experiences on scholarly thought and their ideas about science and a science of public administration are used to enhance an examination of their ideas, concepts, and theories. The writings of such a wide-ranging group of scholars are also connected by a recognition of the growth and organizational independence of the field of public administration. For the Fourth Edition, a new perspective has been included: a review of Elinor Ostrom's work provides valuable new material on organization and decision making that is applicable in many disciplines and across many fields. In addition, substantive updates to the scholarship and analysis found in each of the chapters in the book encourage new avenues for questions, insight, and exploration in the field of public administration.

Advances in Developmental Biology Paul Wassarman, 1996-06-25 Volume 4 of *Advances in Developmental Biology and Biochemistry* consists of five chapters that review specific aspects of fly and mammalian development. In Chapter 1, Y. Mishina and R. Behringer discuss various aspects of Müllerian-inhibiting substance (MIS) in mammals, from a brief history of its discovery to recent studies of the MIS gene in transgenic and knock-out animals. In Chapter 2, C. Rushlow and S. Roth discuss the role of the *dpp* group genes in dorsoventral patterning of the *Drosophila* embryo. In Chapter 3, M. Yip and H. Lipshitz discuss the terminal/asegmental terminus gene hierarchy of *Drosophila* and the genetic control of tissue specification and morphogenesis. In Chapter 4, R. Bachvarova discusses induction of mesoderm and the origin of anterior-posterior polarity in the mouse embryo using the frog embryo as a paradigm. In Chapter 5, P. Vogt discusses human Y-chromosome function in male germ cell development.

Image Analysis, Classification and Change Detection in Remote Sensing Morton J. Canty, 2014-06-06 *Image Analysis, Classification and Change Detection in Remote Sensing: With Algorithms for ENVI, IDL and Python*, Third Edition, introduces techniques used in the processing of remote sensing digital imagery. It emphasizes the development and implementation of statistically motivated data-driven techniques. The author achieves this by tightly interweaving theory, algorithms, and computer codes. See What's New in the Third Edition: Inclusion of extensive code in Python with a cloud computing example; New material on synthetic aperture

radar SAR data analysis New illustrations in all chapters Extended theoretical development The material is self contained and illustrated with many programming examples in IDL The illustrations and applications in the text can be plugged in to the ENVI system in a completely transparent fashion and used immediately both for study and for processing of real imagery The inclusion of Python coded versions of the main image analysis algorithms discussed make it accessible to students and teachers without expensive ENVI IDL licenses Furthermore Python platforms can take advantage of new cloud services that essentially provide unlimited computational power The book covers both multispectral and polarimetric radar image analysis techniques in a way that makes both the differences and parallels clear and emphasizes the importance of choosing appropriate statistical methods Each chapter concludes with exercises some of which are small programming projects intended to illustrate or justify the foregoing development making this self contained text ideal for self study or classroom use

The Sanity Inspectors Friedrich Deich, Robert Kee, 2023-05-31 Who can tell exactly where the difference lies between those of us who imagine ourselves sane and those we call insane As Robert Vossmenge tries to practice psychiatry in Germany in the early 1930s he finds himself at odds with his profession as it increasingly falls under the influence of the Nazi regime with its aim to rid German society of those it considers undesirables Vossmenge tries to stay out of trouble by keeping a low profile Through his friendship with a Lutheran pastor he begins to question his assumptions about what constitutes sanity in a world where the people in charge seem to be insane Though he quietly wages a one man campaign against the cruelty of the military mindset while serving as a Luftwaffe doctor Vossmenge is ultimately forced to choose between survival and standing for his beliefs The Sanity Inspectors is a gripping account of the challenge of trying to be a good man in the midst of evil

The Rise of Nuclear Fear Spencer R. Weart, 2012-04-02 After a tsunami destroyed the cooling system at Japan's Fukushima Nuclear Power Plant triggering a meltdown protesters around the world challenged the use of nuclear power Germany announced it would close its plants by 2022 Although the ills of fossil fuels are better understood than ever the threat of climate change has never aroused the same visceral dread or swift action Spencer Weart dissects this paradox demonstrating that a powerful web of images surrounding nuclear energy holds us captive allowing fear rather than facts to drive our thinking and public policy Building on his classic Nuclear Fear Weart follows nuclear imagery from its origins in the symbolism of medieval alchemy to its appearance in film and fiction Long before nuclear fission was discovered fantasies of the destroyed planet the transforming ray and the white city of the future took root in the popular imagination At the turn of the twentieth century when limited facts about radioactivity became known they produced a blurred picture upon which scientists and the public projected their hopes and fears These fears were magnified during the Cold War when mushroom clouds no longer needed to be imagined they appeared on the
