*The Making of Religion* Andrew Lang, 2020-09-28 By the nature of things this book falls under two divisions The first eight chapters criticise the current anthropological theory of the origins of the belief in spirits Chapters ix xvii again criticise the current anthropological theory as to how the notion of spirit once attained man arrived at the idea of a Supreme Being These two branches of the topic are treated in most modern works concerned with the Origins of Religion such as Mr Tyler s *Primitive Culture* Mr Herbert Spencer s *Principles of Sociology* Mr Jevons s *Introduction to the History of Religion* the late Mr Grant Allen s *Evolution of the Idea of God* and many others Yet I have been censured for combining in this work the two branches of my subject and the second part has been regarded as but faintly connected with the first The reason for this criticism seems to be that while one

small set of students is interested in and familiar with the themes examined in the first part namely the psychological characteristics of certain mental states from which in part the doctrine of spirits is said to have arisen that set of students neither knows nor cares anything about the matter handled in the second part This group of students is busied with Psychical Research and the obscure human faculties implied in alleged cases of hallucination telepathy double personality human automatism clairvoyance and so on Meanwhile anthropological readers are equally indifferent as to that branch of psychology which examines the conditions of hysteria hypnotic trance double personality and the like Anthropologists have not hitherto applied to the savage mental conditions out of which in part the doctrine of spirits arose the recent researches of French German and English psychologists of the new school As to whether these researches into abnormal psychological conditions do or do not indicate the existence of a transcendental region of human faculty anthropologists appear to be unconcerned The only English exception known to me is Mr Tylor and his great work Primitive Culture was written thirty years ago before the modern psychological studies of Professor William James Dr Romaine Newbold M Richet Dr Janet Professor Sidgwick Mr Myers Mr Gurney Dr Parish and many others had commenced Anthropologists have gone on discussing the trances and visions and so called demoniacal possession of savages as if no new researches into similar facts in the psychology of civilised mankind existed or if they existed threw any glimmer of light on the abnormal psychology of savages I have on the other hand thought it desirable to sketch out a study of savage psychology in the light of recent psychological research Thanks to this daring novelty the book has been virtually taken as two books anthropologists have criticised the second part and one or two Psychical Researchers have criticised the first part each school leaving one part severely alone Such are the natural results of a too restricted specialism Even to Psychical Researchers the earlier division is of scant interest because witnesses to successful abnormal or supernormal faculty in savages cannot be brought into court and cross examined But I do not give anecdotes of such savage successes as evidence to facts they are only illustrations and evidence to beliefs and methods as of crystal gazing and automatic utterances of secondary personality which among the savages correspond to the supposed facts examined by Psychical Research among the civilised I only point out as Bastian had already pointed out the existence of a field that deserves closer study by anthropologists who can observe savages in their homes We need persons trained in the psychological laboratories of Europe and America as members of anthropological expeditions It may be noted that in his Letters from the South Seas Mr Louis Stevenson makes some curious observations especially on a singular form of hypnotism applied to himself with fortunate results The method used in native medicine was novel and the results were entirely inexplicable to Mr Stevenson who had not been amenable to European hypnotic practice But he was not a trained expert Anthropology must remain incomplete while it neglects this field whether among wild or civilised men In the course of time this will come to be acknowledged It will be seen that we cannot really account for the origin of the belief in spirits while we neglect the scientific study of those psychical conditions as of hallucination and the

hypnotic trance in which that belief must probably have had some at least of its origins

**The Emergence of Whitehead's Metaphysics, 1925-1929** Lewis S. Ford, 1984-01-01 A breathtaking detective story this book charts the adventure of Whitehead's ideas in a remarkably detailed and careful reconstruction of his metaphysical views Incorporating heretofore unpublished material from students notes and correspondence Professor Ford analyzes the order of composition of various portions of Whitehead's books principally Science and the Modern World Religion in the Making and Process and Reality Ford's reconstructive method is perfectly tailored to his subject for Whitehead revised by inserting new material rather than altering or deleting the old Thus Ford is able to date the sequence of the composition of many passages In distinguishing these layers of articulation he has pushed the techniques of higher criticism beyond anything the French structuralists and deconstructionists have dreamed of and chronicled an extraordinary intellectual biography

Kaplan, 1991 Describes the life of Jewish middle class women in Wilhelmine Germany Pp 148 152 Anti Semitism in the University state that until about 1905 women students discriminated against because of their sex tended to show solidarity by forming organizations open to all in contrast to the segregated male students organizations Russian Jewish women were especially despised even by German Jewish male students Pp 182 185 describe discrimination against Jewish teachers noting that their chances of employment were highly limited See also the index under Anti Semitism      **The Oxford Handbook of the Sociology of Religion** Peter Clarke, 2011-02-04 The Oxford Handbook of the Sociology of Religion draws on the expertise of an international team of scholars providing both an entry point into the sociological study and understanding of religion and an in depth survey into its changing forms and content in the contemporary world The role and impact of religion and spirituality on the politics culture education and health in the modern world is rigorously discussed and debated The study of the sociology of religion forges interdisciplinary links to explore aspects of continuity and change in the contemporary interface between society and religion Using a combination of theoretical methodological and content led approaches the fifty seven contributors collectively emphasise the complex relationships between religion and aspects of life from scientific research to law ecology to art music to cognitive science crime to institutional health care and more The developing character of religion irreligion and atheism and the impact of religious diversity on social cohesion are explored An overview of current scholarship in the field is provided in each themed chapter with an emphasis on encouraging new thinking and reflection on familiar and emergent themes to stimulate further debate and scholarship The resulting essay collection provides an invaluable resource for research and teaching in this diverse discipline      *The Making of Religion* Andrew
