The Man With The Shattered World:

The Man with a Shattered World A. R. Luria, 1987-04-30 Luria presents a compelling portrait of a man's heroic struggle to regain his mental faculties. A soldier named Zasetsky, wounded in the head at the battle of Smolensk in 1943, found himself unable to recall his recent past or speak, read or write without difficulty. Woven throughout his first-person account are interpolations by Luria himself.

The Man with a Shattered World Aleksandr Romanovich Lurii[a], 1976-09-01 A young soldier suffered a severe brain injury resulting in impaired vision, loss of memory, and loss of the ability to speak, read, and write. As though he were a child, he has to relearn. Professor Luria worked with him for over twenty years together building a life for him.

The Man Who Mistook His Wife for a Hat Oliver Sacks, 2021-09-14 THE INSPIRATION FOR THE NBC SERIES BRILLIANT MINDS In his most extraordinary book, the bestselling author of *Awakenings* and poet laureate of medicine, *The New York Times* recounts the case histories of patients inhabiting the compelling world of neurological disorders, from those who are no longer able to recognize common objects to those who gain extraordinary new skills. Oliver Sacks has become the world's best-known neurologist. His case studies of broken minds offer brilliant insight into the mysteries of consciousness. *The Guardian* Featuring a new preface, Oliver Sacks's *The Man Who Mistook His Wife for a Hat* tells the stories of individuals afflicted with perceptual and intellectual disorders: patients who have lost their memories and with them the greater part of their pasts; who are no longer able to recognize people and common objects whose limbs seem alien to them; who lack some skills yet are gifted with uncanny artistic or mathematical talents. In Dr. Sacks's splendid and sympathetic telling, his patients are deeply human, and his tales are studies of struggles against incredible adversity. A great healer, Sacks never loses sight of medicine's ultimate responsibility: the suffering, afflicted, fighting human subject.

The Legacy of Alexander Luria:

Neuropsychology as a Humane Science Bella Kotik-Friedgut, 2025-05-22 This book invites you into the remarkable life and enduring legacy of Alexander Romanovich Luria, whose groundbreaking contributions to understanding of the human mind continue to reverberate through modern neuroscience and clinical practice. Drawing from previously unknown personal diaries, intimate family archives, and firsthand accounts from those who knew him best, this book depicts the man behind the science. Born in revolutionary Russia and navigating the tumultuous political landscape of the Soviet era, Luria emerged as a brilliant mind whose work transcended borders and ideologies. It is not merely a biography; it is an invitation to discover how one exceptional scientist's blend of brilliant observation, methodological innovation, and profound empathy created a legacy that continues to transform how we understand and treat neurological conditions today. The book highlights Luria's revolutionary contributions to neuropsychology, his unique romantic science approach, and the personal insights offered through previously unpublished materials. What made Luria truly exceptional was his refusal to reduce patients to clinical

cases Instead he pioneered what he called romantic science an approach that honored the whole person behind the neurological condition This small book gives the reader in depth analysis of two of Luria s celebrated case studies The Mind of a Mnemonist and The Man with a Shattered World including the afterlife of these books showing that decades later Luria s work remains essential reading for anyone seeking to understand the complex relationship between brain mind and human experience Delving into personal accounts from Luria s students and collaborators highlights his pivotal role in shaping the global neuropsychology community His visionary approach to education established him as a mentor who profoundly influenced generations leaving an enduring legacy through his systemic dynamic method His influence continues to resonate today as his students make his ideas accessible to a new generation of scientists through webinars conferences books and journal publications including the Lurian Journal

An Analysis of Oliver Sacks's The Man Who Mistook His Wife for a Hat and Other Clinical Tales Dario Krpan,Alexander O' Connor,2017-07-05 In The Man Who Mistook His Wife for a Hat neurologist Oliver Sacks looked at the cutting edge work taking place in his field and decided that much of it was not fit for purpose Sacks found it hard to understand why most doctors adopted a mechanical and impersonal approach to their patients and opened his mind to new ways to treat people with neurological disorders He explored the question of deciding what such new ways might be by deploying his formidable creative thinking skills Sacks felt the issues at the heart of patient care needed redefining because the way they were being dealt with hurt not only patients but practitioners too They limited a physician s capacity to understand and then treat a patient s condition To highlight the issue Sacks wrote the stories of 24 patients and their neurological clinical conditions In the process he rebelled against traditional methodology by focusing on his patients subjective experiences Sacks did not only write about his patients in original ways he attempt to come up with creative ways of treating them as well At root his method was to try to help each person individually with the core aim of finding meaning and a sense of identity despite or even thanks to the patients condition Sacks thus redefined the issue of neurological work in a new way and his ideas were so influential that they heralded the arrival of a broader movement narrative medicine that placed stronger emphasis on listening to and incorporating patients experiences and insights into their care
