The Management Of Ignorance A Political Theory Of The Curriculum:

The Management of Ignorance Fred Inglis, 1985-01 *The Politics of the Textbook* Michael Apple, Linda

Christian-Smith, 2017-09-08 The Politics of the Textbook analyzes the factors that shape production distribution and reception of school texts through original essays which emphasize the double edged quality of textbooks Textbooks are viewed as systems of moral regulation in the struggle of powerful groups to build political and cultural accord They are also regarded as the site of popular resistance around disclosing the interest underlying school knowledge and incorporating alternative traditions *Primary Understanding* Kieran Egan, 2012-04-27 Beginning with descriptions of the ways in which children

make sense of their experience and the world such as fantasy stories and games Egan constructs his argument that constituting this foundational layer are sets of cultural sense making capacities reflected in oral cultures throughout the world Egan sees education as the acquisition of these sets of sense making capacities available in our culture and his goal is to conceptualize primary education in a way that over comes the dichotomy between progressivism and traditionalism attending both the needs of the individual child and the accumulation of knowledge *EBOOK: FOR EDUCATION* Wilfred Carr, 1995-02-16 A recent review of his work describes Wilfred Carr as one of the most brilliant philosophers now working in the rich British tradition of educational philosophy His work is rigorous refreshing and original and examines a number of fundamental issues with clarity and penetration In For Education Wilfred Carr provides a comprehensive justification for reconstructing educational theory and research as a form of critical inquiry In doing this he confronts a number of important philosophical questions What is educational theory What is an educational practice How are theory and practice related What is the role of values in educational research Is a genuinely educational science possible By appealing to developments in critical theory the philosophy of science and the philosophy of the social sciences Wilfred Carr provides answers to these questions which vindicate the idea of an educational science that is not on or about education but for education a science genuinely committed to promoting educational values and ideals

Conducting Educational Research R. Murray Thomas, 1998-09-30 Emphasizing the comparative aspects of research this introduction to educational research traces the process through five stages choosing what to study including specifying the research problem collecting information organizing and summarizing information interpreting results and
