The Magic of Self-Directed Work Teams Paul C. Palmes, 2005-06-07

Northern Pipe Products is today experiencing unprecedented efficiencies, employee involvement, a vibrant and desired training program, record output per man-hour, and lowest overall waste in company history. What it did and learned over five years is the story of this book. The science of Self-Directed Work Teams resides in the realization that chance and stewardship are different sides of the same coin. Admitting to the obvious truth of infinite human variation dismantles the notion of truly controlling people. If not in their actions, surely in their minds and reflected in their attitudes, people resent being told what to do. They much prefer to be told why something must be done and then allowed to apply their unique talents and strengths to manage the assignment. Leaders who understand and therefore respect individual differences use diversity to create value, allowing the insights of others to create often superior approaches. This story could have taken place in a hospital, school, supermarket, or any other organization that requires people to work together for the greater good. Regardless of the setting, be it computer service, healthcare, education, manufacturing, or child care, what follows

The Magic of Momentum Stephen

Guise,2022-04-10 It only takes one moment to create life changing momentum In *The Magic of Momentum* international bestselling author Stephen Guise reveals how momentum works more powerfully in our behavior and lives than it does in other areas In physics momentum is a predictable and simple equation $p = mv$ And sports momentum is defined by team

scoring streaks or players making game changing plays Behavioral momentum however is exponential It isn't the mere string of successes we often perceive it to be Every action you take changes how your brain interprets that behavior creating an exponential feedback loop In exponential systems the end results seem incongruent with their small beginnings due to explosive growth For example if you doubled a penny every day for 50 days you'd have over 5.6 trillion That's more than the annual GDP of Japan the third biggest economy in the world And despite the straightforward math involved it's astonishing that such a large number could come from a single penny What Momentum Can Do for You Momentum is the hidden difference between success and failure It is always active Though unheralded momentum affects every single moment of our lives After reading this book you can use momentum to Eliminate self doubt and procrastination Momentum transforms the dynamics of action When you are in motion your momentum makes it easier to continue in the same direction Doubt and procrastination can only thrive in a pre action state Leverage success into exponential success Leverage financial momentum into more money by investing compound growth Leverage fitness into more frequent and more intense exercise exponential mastery curve Leverage a musical instrument skill into new financial social or business networking opportunities adjacent area compounding Any success can become exponentially greater if you know how to sustain and grow its momentum Change your brain Short term and long term momentum alter the way your brain interprets behaviors They work through different mechanisms but the end result is the same decreased resistance to action Momentum can make work feel like play or at least closer to it Momentum is not merely powerful it's magical Nobody can fully calculate the result of even a single action's momentum The smallest action can bring someone out of a seemingly insurmountable struggle if it triggers a reversal in momentum Read The Magic of Momentum today and discover your true potential with life's most powerful force
