The Male Response:

The Male Response Brian Wilson Aldiss, 1966 The Transmission of Arbitrary Environmental Information Between Bottle-nose Dolphins Jarvis Bastian, 1967 An investigation was made of the capacity of a pair of bottle nose dolphins to perform a cooperative task which required the acoustical transmission of information about an arbitrary visual event in the environment of one of the animals Each animal was first trained to press one of two paddles depending upon the state of a light signal Next while housed in adjacent enclosures they were required to coordinate their actions in a fixed sequence and within fixed time limits Then the light signal to the animal required to respond first was removed and visual contact with the other animal and its light was eliminated The pair continued to perform successfully as long as they were in acoustical contact and the light signal to the one animal was provided Their performance success was found to depend directly upon the emission of pulse trains by the animal receiving the light signal although it was also found to be indirectly connected with that animal's emission of whistle signals The specific nature of this dependency could not be determined Author **The Transmisssion of Arbitrary Environmental Information Between Bottle-nose Dolphins** Jarvis Rulon Bastian, 1967

The Male Dancer Ramsay Burt, 2003-09-02 In this challenging and lively book Ramsay Burt examines the representation of masculinity in twentieth century dance Taking issue with formalist and modernist accounts of dance which dismiss gender and sexuality as irrelevant he argues that prejudices against male dancers are rooted in our ideas about the male body and male behaviour Building upon ideas about the gendered gaze developed by film and feminist theorists Ramsay Burt provides a provocative theory of spectatorship in dance He uses this to examine the work of choreographers like Nijinsky Graham Bausch while relating their dances to the social political and artistic contexts in which they were produced Within these readings he identifies a distinction between institutionalised modernist dance which evokes an essentialist heroic hypermasculinity one which is valorised with reference to nature heterosexuality and religion and radical avant garde choreography which challenges and disrupts dominant ways of representing masculinity The Male Dancer will be essential reading for anyone interested in dance and the cultural construction of gender **Recent Advances in Acarology** J. G.

Rodriguez, 2013-10-22 Recent Advances in Acarology Volume II had its inception in the V International Congress of Acarology held at Michigan State University in August 1978 This two volume work includes the contents of the symposia and a selection of contributions to the workshops and submitted paper sessions These volumes examine subjects such as strategies in pest management of mites and ticks topics encompassing pheromone communication resistance of mites and ticks to acaricides nonchemical control of ticks new acaricides nutritional ecology control and biological control This book is devoted primarily

to medical and veterinary acarology biology ecology management disease transmission and pheromonal communication It also contains a section covering systematics morphology and evolution and a section on the evolution of hosts and their parasites Management strategies for medical and veterinary acari are dependent on sound investigations of biology and ecology Such investigations beginning with contributions on the biology of spotted fever ticks are discussed It sets forth appropriate methodology for ecological studies describes the zoogeography and biological adaptations of one species and reviews the ecological associations of the two

Emotions of Normal People William Moulton Marston,1928 *Partners in Wonder* Eric Leif Davin,2005-12-07 Partners in Wonder revolutionizes our knowledge of women and early science fiction Contrary to accepted interpretations women fans and writers were a welcome and influential part of pulp science fiction from the birth of the genre Davin finds that at least 203 female authors under their own female names published over a thousand stories in science fiction magazines between 1926 and 1965 This work explores the distinctly different form of science fiction that females produced one that was both more utopian and more empathetic than that of their male counterparts Partners in Wonder presents for the first time a complete bibliography of every story published by women writers in science fiction magazines from 1926 to 1965 and brief biographies on 133 of these women writers It is thus the most comprehensive source of information on early women science fiction writers yet available and of great importance to scholars of women s studies popular culture and English literature as well as science fiction

Collected papers Gladwyn Kingsley Noble,1925 *The Evolution of Parental Care* Mathias Kölliker,2012-08-09 Parental care includes a wide variety of traits that enhance offspring development and survival It is taxonomically widespread and is central to the maintenance of biodiversity through its close association with other phenomena such as sexual selection life history evolution sex allocation sociality cooperation and conflict growth and development genetic architecture and phenotypic plasticity This novel book provides a fresh perspective on the study of the evolution of parental care based on contributions from some of the top researchers in the field It provides evidence that the dynamic nature of family interactions and particularly the potential for co evolution among family members has contributed to the great diversity of forms of parental care and life histories across as well as within taxa The Evolution of Parental Care aims to stimulate students and researchers alike to pursue exciting new directions in this fascinating and important area of behavioural and evolutionary biology It will be of relevance and use to those working in the fields of animal behaviour ecology evolution and genetics as well as related disciplines such as psychology and sociology

Why the Universe Bothers to Exist David V. McCorkle,2014-02 A Striking Breakthrough in the Origins Controversy Steinhardt and Turok s proposed ekpyrotic universe model fits the Genesis account The implications are profound The book *Why the Universe Bothers to Exist* Theistic Determinism Evidences and Implications by David V McCorkle PhD is based upon this observation It explains the likely location and physics of heaven It proposes that we have heavenly avatars biblical spirit bodies close by but through a fourth spatial dimension Baby Brady with simulated spirit body This book proposes answers to

many other questions that theists have pondered What happened to the Garden of Eden Might it still exist If so where How could information of our personal identity be preserved after our physical death Why will redeemed humans need to be resurrected if they are already in heaven Why will a new heaven eventually be needed Numerous other concepts are also dealt with such as the following In consideration of Heisenberg uncertainty what maintains order in the universe Do natural laws determine outcomes or does the consistency of outcomes determine the laws What factor determines the decoherence outcome of probability waves so that consistent orderly eigenstates result Cannot this factor be recognized as God thereby actualizing his intentions theistic determinism Natural law is thus the outcome of God holding all things together Col 1 17 It is then natural for God to work through natural process In this perspective how is it that new species of organisms originate Can the process be observed And what of Adam and Eve as the first sentient humans In addition to the significance of a message from ancient Babylon and an account of how what is termed socionics relates to the tragedy of the commons principle a near miraculous adventure in Idaho s Lemi Mountains near Sacajawea s birthplace is described and credited to divine providence All of this and more thought provoking issues are presented in this book with the intent of resolving the origins controversy but also of planting ideas for further consideration in biblical context David V McCorkle Publisher s website <http://sbpra.com/DavidVMcCorkle>

Configurations of Rape in the Hebrew Bible Frank M. Yamada, 2008 In *Configurations of Rape in the Hebrew Bible* Frank M Yamada explores the compelling similarity among three rape narratives found in the Hebrew Scriptures These three stories the rape of Dinah Genesis 34 the rape of an unnamed concubine Judges 19 and the rape of Tamar daughter of David 2 Samuel 13 move through the same plot progression an initial sexual violation of a woman leads to escalating violence among men resulting in some form of social fragmentation In this intriguing study Yamada draws from the disciplines of literary and narrative criticism feminist biblical interpretation and cultural anthropology to argue for a family resemblance among these three stories about rape

Insect Chemoreception M.F. Ryan, 2007-05-08 In this time of edited volumes when the list of individual contributors may reach double figures it is appropriate to question the usefulness of a volume with such a broad scope by a single author The answer is simple For years he has believed that the rather sharp distinction between fundamental and applied aspects of this discipline has ill served the significance of each and has diminished the incidence of fruitful synergies Yet the need for these was never greater and this case may be developed by a single author with experience of each aspect The inclusion of a Chapter on Genetic Engineering may raise some doubts but it is enabled by the chosen title Chemoreception as distinct from Chemoperception the latter implies detection of a chemical followed by a behavioural response But the former broader category subsumes Chemoperception and allows for the reception of a chemical toxin so potent as to prelude a behavioural or physiological response other than death Accordingly chemical toxins are a legitimate inclusion In which event their delivery through a GM plant is as appropriate for study as their application in a spray

Genes on the Couch Paul Gilbert, Kent G.

Bailey,2014-07-10 Philosophers and therapists have long theorised about how psychological mechanisms for love jealousy anxiety depression and many other human characteristics may have evolved over millions of years In the dawn of the new insights on evolution provided by Darwin s theories of natural selection Freud Jung and Klein sought to identify and understand human motives emotions and information processing as functions deeply rooted in our evolved history Despite this promising start and major developments in modern evolutionary psychology anthropology and sociobiology the last fifty years has seen little in the way of therapies derived from an evolutionary understanding of human psychology The contributors to this timely book illuminate how an evolution focused approach to psychopathology can offer new insights for different schools of therapy and provide a rationale for therapeutic integration Genes on the Couch brings together respected clinicians who have integrated evolutionary insights into their case conceptualisations and therapeutic interventions Various psychotherapy schools are represented and each author provides illustrative examples of the interventions used Specific topics addressed include the nature of evolved mental mechanisms regulation dysregulation of internal processes attachment and kinship in therapy the importance of internalising warmth as a therapeutic goal kin selection and incest avoidance co operation and deception in social relations difficulties in working with certain male clients gender differences in therapy and the roles of shame and guilt in treatment Providing up to date summaries of recent thinking in this increasing important but diverse area Genes on the Couch will be of interest to psychotherapists psychiatrists and a wide range of mental health professionals

Observed Confidence Levels Alan M. Polansky,2007-10-26 Illustrating a simple novel method for solving an array of statistical problems Observed Confidence Levels Theory and Application describes the basic development of observed confidence levels a methodology that can be applied to a variety of common multiple testing problems in statistical inference It focuses on the modern nonparametric framework of bootstrap based estimates allowing for substantial theoretical development and for relatively simple solutions to numerous interesting problems After an introduction the book develops the theory and application of observed confidence levels for general scalar parameters vector parameters and linear models It then examines nonparametric problems often associated with smoothing methods including nonparametric density estimation and regression The author also describes applications in generalized linear models classical nonparametric statistics multivariate analysis and survival analysis as well as compares the method of observed confidence levels to hypothesis testing multiple comparisons and Bayesian posterior probabilities In addition the appendix presents some background material on the asymptotic expansion theory used in the book Helping you choose the most reliable method for a variety of problems this book shows how observed confidence levels provide useful information on the relative truth of hypotheses in multiple testing problems
