**The Scientific World of Copernicus** B. Biéowska, 1973-09-30 On February 19 1973 five centuries have elapsed since the birth of Nicolaus Copernicus the greatest astronomer of the Renaissance period who rediscovered for us the heliocentric model of the solar system and documented it by his life's work in such a manner as to make its concept a permanent property of mankind The life of Copernicus extending from 19 February 1473 to his death on 24 May 1543 was not too rich in adventures or biographical facts Born in Toruń from a family of Polish burghers he received his first university training in Cracow between 1491 1494 From Cracow he proceeded to Italy to spend the years between 1496 1503 at the Universities of Bologna Padua and Ferrara with occasional visits to Rome in preparation for an ecclesiastical career When Bishop Watzenrode his patron and maternal uncle could no longer extend his leave Copernicus returned to Poland in 1503 to enter the service of the church establishment which soon led to a canonry at the Frombork Frauenburg Cathedral in Warmia And there in the northern mists not far from the Baltic shores in a land so different in climate from the sunny Italy of his youth he was destined to spend the rest of his life     The Word , 1908     **Official Report of the ...
