Beginning with Edgar Allan Poe's 1845 short story *The System of Dr Tarr and Prof Fether* Rondinone surveys how American novelists poets memoirists reporters and filmmakers have portrayed the asylum and how those representations reflect larger social trends in the United States Asylums he argues darkly reflect cultural anxieties and the shortcomings of democracy as well as the ongoing mistreatment of people suffering from mental illness *Nightmare Factories* traces the story of the asylum as the masses have witnessed it Rondinone shows how works ranging from *Moby Dick* and *Dracula* to *One Flew Over the Cuckoo's Nest* *Halloween* and *American Horror Story* have all conversed with the asylum Drawing from fictional and real accounts movies personal interviews and tours of mental hospitals both active and defunct Rondinone uncovers a story at once familiar and bizarre where reality meets fantasy in the foggy landscape of celluloid and pulp *The Oxford Handbook of the History of Medicine* Mark Jackson, 2011-08-25 In three sections the Oxford Handbook of the History of Medicine celebrates the richness and variety of medical history around the world It explores medical developments and trends in writing history according to period place and theme **Independent Mental Health Advocacy - The Right to Be Heard** Julie Ridley, Karen Newbigging, Mick McKeown, June Sadd, Karen Machin, Kaaren Cruse, Stephanie De La Haye, Laura Able, Konstantina Poursanidou, 2015-07-21 This research based book tells you everything you need to know about independent mental health advocacy IMHA including the role that IMHAs play within mental health services their relationship with service users and with other mental health professionals **The Letters of a Victorian Madwoman** John S. examining the myriad ways that architects urban planners medical practitioners and everyday people have applied modern ideas about health and the body to the spaces in which they live work and heal The book s contributors explore North American and European understandings of the relationship between physical movement bodily health technological innovation medical concepts natural environments and architectural settings from the nineteenth century through the heyday of modernist architectural experimentation in the 1920s and 1930s and onward into the 1970s Not only does the book focus on how professionals have engaged with the architecture of healing and the body it also explores how urban dwellers have strategized and modified their living environments themselves to create a kind of vernacular modernist architecture of health in their homes gardens and backyards This new work builds upon a growing interdisciplinary field incorporating the urban humanities geography architectural history the history of medicine and critical visual studies that reflects our current preoccupation with the body and its corresponding therapeutic culture *R.D. Laing and the Paths of Anti-Psychiatry*

Zbigniew Kotowicz,2005-07-25 In the 1960s and 1970s the radical and visionary ideas of R D Laing revolutionized thinking about psychiatric practice and the meaning of madness His work from *The Divided Self* to *Knots* and his therapeutic community at Kingsley Hall made him a household name But after little more than a decade he faded from prominence as quickly as he had attained it *R D Laing and the Paths of Anti Psychiatry* re examines Laing s work in the context of the anti psychiatry movement Concentrating on his most productive decade the author provides a reasoned critique of Laing s theoretical writings investigates the influences on his thinking such as phenomenology existentialism and American family interaction research and considers the experimental Kingsley Hall therapeutic community in comparison with anti psychiatry experiments in Germany and Italy The book provides a much needed reassessment and re evaluation of Laing s work and its significance for psychotherapy and psychiatry today **Social Medicine and Medical Sociology in the Twentieth**

Century ,2020-01-29 Little attention has been paid to the history of the influence of the social sciences upon medical thinking and practice in the twentieth century The essays in this volume explore the consequences of the interaction between medicine and social science by evaluating its significance for the moral and aterial role of medicine in modern societies Some of the essays examine the ideas of both clinicians and social scientists who believed that highly technologized medicine could be made more humanistic by understanding the social relations of health and illness Other authors interrogate the critical assault which social science has made upon medicine as a system of knowledge organisation and power The volume discusses therefore the relationship between social scientific knowledge both in and of medicine in the twentieth century Collectively the essays illustrate that the respective power of biology and culture in determining human behaviour and social transition continues to be an unresolved paradox **The Palgrave Handbook of the History of Human Sciences** David McCallum,2022-08-27 The Palgrave Handbook of the History of Human Sciences offers a uniquely comprehensive and global overview of the evolution of ideas concepts and policies within the human sciences Drawn from histories of the social and

psychological sciences anthropology the history and philosophy of science and the history of ideas this collection analyses the health and welfare of populations evidence of the changing nature of our local communities cities societies or global movements and studies the way our humanness or human nature undergoes shifts because of broader technological shifts or patterns of living This Handbook serves as an authoritative reference to a vast source of representative scholarly work in interdisciplinary fields a means of understanding patterns of social change and the conduct of institutions as well as the histories of these ways of knowing probe the contexts circumstances and conditions which underpin continuity and change in the way we count analyse and understand ourselves in our different social worlds It reflects a critical scholarly interest in both traditional and emerging concerns on the relations between the biological and social sciences and between these and changes and continuities in societies and conducts as 21st century research moves into new intellectual and geographic territories more diverse fields and global problematics
