The Maps And Prints Of Paolo Forlani:

The Maps and Prints of Paolo Forlani David Woodward,1990 Canada before Confederation: Maps at the Exhibition Chet Van Duzer,Lauren Beck,2018-01-15 Each of the maps featured in this book was showcased in the exhibition Canada before Confederation Early Exploration and Mapping which took place in several locations both in Canada and abroad in Fall of 2017 The authors provide a scholarly study highlighting the importance and unique features of each of these jewels of cartographic history with particular attention paid to how they demonstrate the development of Canadian identity at the same time that they reveal Indigenous knowledge of the lands now known as Canada Copyright in the Renaissance: Prints and the Privilegio in Sixteenth-Century Venice and Rome Christopher Witcombe,2004-06-01 This study examines the emergence and early history of copyright in Venice and Rome focusing in particular on the privilegio and the use made of it by printers publishers engravers painters architects mapmakers and others in the sixteenth century to protect their commercial interests in various types of printed images These include separately sold engravings woodcuts and etchings as well as illustrations in books The first part of the book surveys printmaking and the privilegio in sixteenth century Venice and Rome together with the related issues of licensing and censorship The second part documents many of the recipients who were granted the privilegio The book introduces the reader to the richly competitive world of printmaking and print publishing in Renaissance Italy Worldly Consumers Genevieve Carlton,2015-06-22 Though the practical value of maps during the sixteenth century is well documented their personal and cultural importance has been relatively underexamined In Worldly Consumers Genevieve Carlton explores the growing availability of maps to private consumers during the Italian Renaissance and shows how map acquisition and display became central tools for constructing personal identity and impressing one's peers Drawing on a variety of sixteenth century sources including household inventories epigrams dedications catalogs travel books and advice manuals Worldly Consumers studies how individuals displayed different maps in their homes as deliberate acts of self fashioning One citizen decorated with maps of Bruges Holland Flanders and Amsterdam to remind visitors of his military prowess for example while another hung maps of cities where his ancestors fought or governed in homage to his auspicious family history Renaissance Italians turned domestic spaces into a microcosm of larger geographical places to craft cosmopolitan erudite identities for themselves creating a new class of consumers who drew cultural capital from maps of the time The Venetian Discovery of America Elizabeth Horodowich,2018-09-06 Few Renaissance Venetians saw the New World with their own eyes As the print capital of early modern Europe however Venice developed a unique relationship to the Americas Venetian editors mapmakers translators writers and cosmographers represented the New World at times as a place that the city's mariners had discovered before the Spanish a world linked to Marco Polo's China or another version of Venice especially in the case of Tenochtitlan Elizabeth Horodowich explores these various and distinctive modes of imagining the New World including Venetian rhetorics of firstness similitude othering

comparison and simultaneity generated through forms of textual and visual pastiche that linked the wider world to the Venetian lagoon. These wide ranging stances allowed Venetians to argue for their different but equivalent participation in the Age of Encounters. Whereas historians have traditionally focused on the Spanish conquest and colonization of the New World and the Dutch and English mapping of it, they have ignored the wide circulation of Venetian Americana. Horodowich demonstrates how with their printed texts and maps Venetian newsmongers embraced a fertile tension between the distant and the close. In doing so they played a crucial yet heretofore unrecognized role in the invention of America. Mapping the Ottomans Palmira Brummett, 2015-05-19 Simple paradigms of Muslim-Christian confrontation and the rise of Europe in the seventeenth century do not suffice to explain the ways in which European mapping envisioned the Turks in image and narrative. Rather, maps, travel accounts, compendia of knowledge and other texts created a picture of the Ottoman Empire through a complex layering of history, ethnography and eyewitness testimony which juxtaposed current events to classical and biblical history. Counted space in terms of peoples, routes and fortresses and used the land and seascapes of the map to assert ownership, declare victory and embody imperial power's reach. Enriched throughout by examples of Ottoman self-mapping, this book examines how Ottomans and their empire were mapped in the narrative and visual imagination of early modern Europe's Christian kingdoms. The maps serve as centerpieces for discussions of early modern space-time borders, stages of travel, information flows, invocations of authority and cross-cultural relations. Maps as Prints in the Italian Renaissance David Woodward, 1996 From the late 15th century to the mid 16th century, maps moved from being a specialised tool of the navigator or scholar to becoming part of everyday life. Woodward traces the trade in maps that grew up in Florence, Rome and Venice. *Shedding The Veil: Mapping The European Discovery Of America And The World* Thomas Suarez, 1994-04-29 *Shedding the Veil* is a highly original overview of Europe's exploration and discovery beyond her own confines. It tackles the subject via an analysis of maps dating from circa 1434 to 1865 with an emphasis on the period before 1600. The book begins with an appraisal of the peculiar circumstances which led late medieval Europe to pursue long distance travel both overland and by sea, introduces cosmographic traditions inherited from classical times and investigates pre-Columbian excursions into the western ocean. Finally, the great voyages and mappamundi of the early sixteenth century are described in depth. After 1600 the focus begins to narrow to North America and particularly to the colonization of the American Northeast. All maps discussed in detail are illustrated: 40 full-page b/w plates, 25 full-page color plates. **Cities of the Mediterranean** Meltem Toksoz, Biray Kolluoglu, 2014-08-25 The Eastern Mediterranean is one of the world's most vibrant and vital commercial centres and for centuries the region's cities and ports have been at the heart of East-West trade. Taking a full and comprehensive look at the region as a whole rather than isolating individual cities or distinct cultures, *Cities of the Mediterranean* offers a fresh and original portrait of the entire region from the 16th century to the present. In this ambitious interdisciplinary study the authors examine the relationships between the Eastern Mediterranean port cities and

their hinterlands as well as inland and provincial cities from many different perspectives political economic international and ecological without prioritising either Ottoman Anatolia or the Ottoman Balkans or the Arab provinces in order to think of the Eastern Mediterranean world as a coherent whole Wide ranging in scope Cities of the Mediterranean explores diverse topics weaving together history sociology geography cartography politics and economics Early chapters examine the impact of the Little Ice Age the global economy s shift from the Mediterranean to Antwerp and Amsterdam early European perceptions of the Eastern Mediterranean 19th century harbour building practices and their impact on the cities and the connections between Alexandria Izmir and Thessalonica and their vast and diverse hinterlands The book also explores political radicalism in Turkey and elsewhere as well as the illegal trade networks that linked the Balkans and Adriatic with the Mediterranean and the introduction of new technologies that led to the faster transport of people goods and information Through its penetrating analysis of the various networks that connected the ports and towns of the Mediterranean and their inhabitants throughout the Ottoman period Cities of the Mediterranean presents the region as a unified and dynamic community and paves the way for a new understanding of the subject

The Mapping of Power in Renaissance Italy Mark Rosen,2015 This well illustrated study investigates the symbolic dimensions of painted maps as products of ambitious early modern European courts Catalogue of Maps, Prints, Drawings, Etc British Museum. King's Library,1829 *Becoming Neapolitan* John A. Marino,2011-01-03 2011 Winner of the Phyllis Goodhart Gordan Book Prize of the Renaissance Society of America Naples in the sixteenth and seventeenth centuries managed to maintain a distinct social character while under Spanish rule John A Marino s study explores how the population of the city of Naples constructed their identity in the face of Spanish domination As Western Europe s largest city early modern Naples was a world unto itself Its politics were decentralized and its neighborhoods diverse Clergy nobles and commoners struggled to assert political and cultural power Looking at these three groups Marino unravels their complex interplay to show how such civic rituals as parades and festival days fostered a unified Neapolitan identity through the assimilation of Aragonese customs Burgundian models and Spanish governance He discusses why the relationship between mythical and religious representations in ritual practices allowed Naples s inhabitants to identify themselves as citizens of an illustrious and powerful sovereignty and explains how this semblance of stability and harmony hid the city s political cultural and social fissures In the process Marino finds that being and becoming Neapolitan meant manipulating the city s rituals until their original content and meaning were lost The consequent widening of divisions between rich and poor led Naples s

vying castes to turn on one another as the Spanish monarchy weakened Rich in source material and tightly integrated this nuanced synthetic overview of the disciplining of ritual life in early modern Naples digs deep into the construction of Neapolitan identity Scholars of early modern Italy and of Italian and European history in general will find much to ponder in Marino's keen insights and compelling arguments

The Mysteries of the Marco Polo Maps Benjamin B. Olshin, 2014-10-29 What's the truth behind the travels of Marco Polo A fascinating tale about maps history and exploration Times Literary Supplement UK In the thirteenth century Italian merchant and explorer Marco Polo traveled from Venice to the far reaches of Asia a journey he chronicled in a narrative titled *Il Milione* later known as *The Travels of Marco Polo* While Polo's writings would go on to inspire the likes of Christopher Columbus scholars have long debated their veracity Some have argued that Polo never even reached China while others believe that he came as far as the Americas Now there's new evidence for this historical puzzle a very curious collection of fourteen little known maps and related documents said to have belonged to the family of Marco Polo himself Here historian of cartography Benjamin B Olshin offers the first credible book length analysis of these artifacts charting their course from obscure origins in the private collection of Italian American immigrant Marcian Rossi in the 1930s to investigations of their authenticity by the Library of Congress J Edgar Hoover and the FBI to the work of the late cartographic scholar Leo Bagrow to Olshin's own efforts to track down and study the Rossi maps all but one of which are in the possession of Rossi's great grandson Are the maps forgeries facsimiles or modernized copies Did Marco Polo's daughters whose names appear on several of the artifacts preserve in them geographic information about Asia first recorded by their father Or did they inherit maps created by him Did Marco Polo entrust the maps to an admiral with links to Rossi's family line Or if the maps have no connection to Marco Polo who made them when and why Regardless of the maps provenance this tale takes us on a fascinating journey offering insights into Italian history the age of exploration and the wonders of cartography

Olshin's book tugs powerfully at the imagination of anybody interested in the Polo story, medieval history, old maps, geographical ideas, European voyages of discovery, and early Chinese legends. The Wall Street Journal
