Sound Paintings:

Sound Art Revisited Alan Licht, 2019-08-22 The first edition of *Sound Art Revisited* published as *Sound Art Beyond Music Between Categories* served as a groundbreaking work toward defining this emerging field and this fully updated volume significantly expands the story to include current research since the book's initial release. Viewed through a lens of music and art histories rather than philosophical theory, it covers dozens of artists and works not found in any other book on the subject. Locating sound art's roots across the centuries from spatialized church music to the technological developments of radio sound recording and the telephone, the book traces the evolution of sound installations and sound sculpture, the rise of sound art exhibitions and galleries, and finally looks at the critical cross-pollination that marks some of the most important and challenging art with and about sound being produced today.

The ^AOxford Handbook of Sound Art Jane Grant, John Matthias, David Prior, 2021-09-27 The *Oxford Handbook of Sound Art* surveys the practices, politics, and emerging frameworks of thought that now define the artistic practice of sound art.

Sound Art Thom Holmes, 2022-04-27 *Sound Art* offers the first comprehensive introduction to sound art written for undergraduate students. Bridging and blending aspects of the visual and sonic arts, modern sound art first emerged in the early 20th century and has grown into a thriving and varied field. In 13 thematic chapters, this book enables students to clearly grasp both the concepts behind this unique area of art and its history and practice. Each chapter begins with an exploration of key ideas and theories, followed by an in-depth discussion of selected relevant works, both classic and current. Drawing on a broad, diverse range of examples and firmly interdisciplinary, this book will be essential reading for anyone studying or teaching the theory, history, appreciation, or practice of sound art.

The Oxford Handbook of Sound and Image in Western Art Yael Kaduri, 2016-06-15 The *Oxford Handbook of Sound and Image in Western Art* examines under one umbrella different kinds of analogies, mutual influences, integrations, and collaborations of audio and visual in different art forms. The book represents state-of-the-art case studies with key figures of modern thinking, constituting a foundation for discussion. It thus emphasizes avant-garde and experimental tendencies while analyzing them in historical, theoretical, and critical frameworks. The book is organized around three core thematic sections. The first, *Sights and Sounds*, concentrates on the interaction between the experience of seeing and the experience of hearing. Examples of painting, classic and digital animation, video art, choreography, and music performance are examined in this section. *Sound Space and Matter* explores experimental forms emanating from the expansion of the concepts of music and space to include environmental sounds, vibrating frequencies, silence, language, human habitats, the human body, and more. The reader will find here an analysis of different manifestations of this aesthetic shift in sound art, fine art, contemporary dance, multimedia, theatre, and cinema. The last section, *Performance, Performativity, and Text*, shows how new light shed by modernism and the avant-garde on the performative aspect of music have led it together with sound, voice, and text to become active in new ways in postmodern and contemporary art creation. In addition to examples of real time

performing arts such as music theatre experimental theatre and dance it includes case studies that demonstrate performativity in fine art visual poetry short film and cinema Sitting at the cutting edge of the field of music and visual arts the book offers a unique at times controversial view of this rapidly evolving area of study Artists curators students and scholars will find here a panoramic view of cutting edge discourse in the field by an international roster of scholars and practitioners

Sound, Image, Silence Michael Gaudio, 2019-11-26 A visionary new approach to the Americas during the age of colonization made by engaging with the aural aspects of supposedly silent images Colonial depictions of the North and South American landscape and its indigenous inhabitants fundamentally transformed the European imagination but how did those images reach Europe and how did they make their impact In Sound Image Silence noted art historian Michael Gaudio provides a groundbreaking examination of the colonial Americas by exploring the special role that aural imagination played in visible representations of the New World Considering a diverse body of images that cover four hundred years of Atlantic history Sound Image Silence addresses an important need within art history to give hearing its due as a sense that can inform our understanding of images Gaudio locates the noise of the pagan dance the discord of battle the din of revivalist religion and the sublime sounds of nature in the Americas such as lightning thunder and the waterfall He invites readers to listen to visual media that seem deceptively couched in silence offering bold new ideas on how art historians can engage with sound in inherently mute media Sound Image Silence includes readings of Brazilian landscapes by the Dutch painter Frans Post a London portrait of Benjamin Franklin Thomas Edison's early Kinetoscope film Sioux Ghost Dance and the work of Thomas Cole founder of the Hudson River School of American landscape painting It masterfully fuses a diversity of work across vast social cultural and spatial distances giving us both a new way of understanding sound in art and a powerful new vision of the New World

Out of Earshot Asma Naeem, 2020-01-07 Out of Earshot offers a reconfiguration of three of the nineteenth century's most prolific painters Winslow Homer 1836 1910 Thomas Eakins 1844 1916 and Thomas Dewing 1851 1939 Asma Naeem considers how these painters turned in ways significant for their individual artistic ventures to themes of sound and listening throughout their careers She shows how the aural dimension of these artists' pictures was an ideological product of period class gender

cultural racial and technological discourses Equally important by looking at such materials as the artists papers scientific illustrations and technological brochures Naeem argues that the work of these painters has complex and previously unconsidered connections to developments in sound and listening during a period when unprecedented innovation in the United States led to such inventions as the telegraph and phonograph and forged a technological narrative that continues to have force in the twenty first century Naeem s unusual approach to the work of these three well known American artists offers a transformative account of artistic response during their own era and beyond Sound Art Peter Weibel, 2019-11-05 Essays and images that map art s new sonic cosmos illustrated in color throughout This milestone volume maps fifty years of artists engagement with sound Since the beginning of the new millennium numerous historical and critical works have established sound art as an artistic genre in its own right with an accepted genealogy that begins with Futurism Dada and Fluxus as well as disciplinary classifications that effectively restrict artistic practice to particular tools and venues This book companion volume to a massive exhibition at ZKM Karlsruhe goes beyond these established disciplinary divides to chart the evolution and the full potential of sound as a medium of art The book begins with an extensive overview by volume editor Peter Weibel that considers the history of sound as media art examining work by visual artists composers musicians and architects alike Subsequent essays examine sound experiments in antiquity sonification of art and science and internet based sound art Contributors then survey the global field of sound art research and practice in essays that describe the past present and future of sound art in Germany Japan China the United States the United Kingdom Russia Canada Turkey Australia and Scandinavia The texts are accompanied by an extensive photographic documentation of the ZKM exhibition Texts by Achille Bonito Oliva Dmitry Bulatov Germano Celant Seth Cluett Christoph Cox Julia Gerlach Ryo Ikeshiro und and Atau Tanaka Caleb Kelly Brandon LaBelle Christof Migone L szl Moholy Nagy Daniel Muzyczuk Tony Myatt Irene Noy Giuliano Obici Carsten Seiffarth und and Bernd Schulz Ba ak enova Linnea Semmerling Morten S ndergaard Alexandra Supper David Toop und and Adam Parkinson Peter Weibel Dajuin Yao Siegfried Zielinski Listening to Noise and Silence Salome Voegelin, 2010-03-31 A fresh bold study of the emerging field of Sound Art informed by the ideas of Adorno Merleau Ponty and others Practices of Abstract Art Wiebke Gronemeyer, Isabel Wünsche, 2016-12-14 Recent decades have seen a renewed interest in the phenomenon of abstract art particularly regarding its ability to speak to the political social and cultural conditions of our times This collection of essays which looks at historical examples of artistic practice from the early pioneers of abstraction to late modernism investigates the ambivalent role that abstraction has played in the visual arts and cultures of the last hundred years In addition it explores various theoretical and critical narratives that seek to articulate new perspectives on its legacy in the visual arts From metaphysical considerations and philosophical reflections to debates on interculturality and global perspectives the contributors examine and reconsider abstraction in the visual arts from a contemporary point of view that acknowledges the many social economic cultural and political aspects of artistic practice As

such the volume progressively expands the boundaries of thinking about abstract art by engaging it in its increasingly diverse cultural environment
