Stroke Treatment And Prevention An Evidence Based Approach:

Stroke Treatment and Prevention Graeme Hankey, 2005-11-10 This invaluable reference provides clinicians caring for stroke patients with evidence for best practice in stroke treatment and secondary prevention. It describes all available treatments and where available the highest level of evidence for their safety and effectiveness. The evidence for each treatment is followed by the author's interpretations and the implications of the evidence in the care of stroke patients. The volume is therefore an essential resource for clinicians translating into practice advances that have been made in the treatment and prevention of stroke and suggesting the most appropriate interventions.

Geriatric Medicine: an evidence-based approach Frank Lally, Christine Roffe, 2014-10-02 People are living longer and the population over the age of 60 is burgeoning with repercussions for health services and healthcare expenditure in developed countries. Crucially, disease aetiology, diagnosis and treatment in older people differ from the general adult population. Older people often have complicated co-morbidities and respond to treatment in different ways compared to younger people. Evidence of efficacy of different treatments is often lacking because older people are under-represented in clinical trials and the specific needs of older people are rarely discussed specifically in more general texts. Geriatric medicine: an evidence-based approach is a clinical reference for health care professionals who manage older patients and summarizes up-to-date research literature in a style that can be directly applied by busy healthcare professionals and provide a useful resource for reference.

Stroke Prevention and Treatment Jeffrey L. Saver, Graeme J. Hankey, 2020-12-10 Stroke is the second leading cause of death and a leading cause of disability worldwide. This invaluable reference provides clinicians caring for stroke patients with ready access to the optimal evidence for best practice in stroke prevention, acute stroke treatment and stroke recovery. Now an edited volume, the editors and authors, many of whom are members of the Cochrane Stroke Review Group, describe all available medical, endovascular and surgical treatments, the rationale for using them and the strength of the evidence for their safety and effectiveness. New chapters cover key rapidly advancing therapeutic topics including prehospital stroke care and regionalized stroke systems, endovascular reperfusion therapy and electrical and magnetic brain stimulation to enhance recovery. This is an essential resource for clinicians translating into practice the many dramatic advances that have been made in the treatment and prevention of stroke and suggesting the most appropriate interventions.

Handbook of Clinical Neuroepidemiology Valery L. Feigin, 2007 In recent years there have been significant advances in the knowledge of risk factors, gene-environment interactions, incidence, prevalence, outcomes and prevention strategies of many neurological disorders. These advances have been accompanied by developments in study design, methodologies and statistical analysis. This handbook bridges the gap between current neuroepidemiological knowledge and its evidence-based application in everyday practice.

Encyclopedia of Health Services Research Ross M. Mullner, 2009-05-15 Today as never before healthcare has the ability to enhance the quality and duration of life. At the same time, healthcare has become so costly that it

can easily bankrupt governments and impoverish individuals and families Health services research is a highly multidisciplinary field including such areas as health administration health economics medical sociology medicine political science public health and public policy The Encyclopedia of Health Services Research is the first single reference source to capture the diversity and complexity of the field With more than 400 entries these two volumes investigate the relationship between the factors of cost quality and access to healthcare and their impact upon medical outcomes such as death disability disease discomfort and dissatisfaction with care Key Features Examines the growing healthcare crisis facing the United States Encompasses the structure process and outcomes of healthcare Aims to improve the equity efficiency effectiveness and safety of healthcare by influencing and developing public policies Describes healthcare systems and issues from around the globe Key Themes Access to Care Accreditation Associations Foundations and Research Organizations Biographies of Current and Past Leaders Cost of Care Economics Finance and Payment Mechanisms Disease Disability Health and Health Behavior Government and International Healthcare Organizations Health Insurance Health Professionals and Healthcare Organizations Health Services Research Laws Regulations and Ethics Measurement Data Sources and Coding and Research Methods Outcomes of Care Policy Issues Healthcare Reform and International Comparisons Public Health Quality and Safety of Care Special and Vulnerable Groups The Encyclopedia is designed to be an introduction to the various topics of health services research for an audience including undergraduate students graduate students and general readers seeking non technical descriptions of the field and its practices It is also useful for healthcare practitioners wishing to stay abreast of the changes and updates in the field Cerebrovascular Disease Ji Y. An Evidence-based Approach to the Treatment and Care of the Older Adult with Cancer Diane G. Cope, Anne M. Reb, 2006 Description The book offers a comprehensive overview of the treatment and care of the older adult with cancer The evidence based practice approach is timely and provides the foundation for nursing practice that is the expected standard of care The use of the case study at the end of each chapter assists the reader in the synthesis and application of the information The book addresses every aspect of the care and treatment of not only the cancer patient but also the family The chapter on complementary therapy is a bonus Purpose The purpose is to focus on the unique aspects of treatment and care that the older adult with cancer requires Addressing the older adult with cancer is of paramount importance to not only the health of the individual but of the family community and society The book meets the author's objectives Audience This is written for all healthcare providers The authors have written a book that can be used by gerontology nurses but it is appropriate for the multidisciplinary team that provides care to the older adult with cancer The authors have the professional background with applicable experience to edit this book Features This book covers more than the care and treatment of cancer in the older adult It provides necessary background information that demonstrates the impact of cancer on the older patient and their significant others The assessment information is useful for both experienced and novice nurses The use of chapter case studies enables healthcare providers to apply the chapter content The use of an evidence based practice approach to delivering healthcare is essential The information allows nurses to use the findings from reviewed research literature in providing the best care for their patients in an efficient manner that also considers patient preferences the risks and the benefits of treatment or lack thereof Assessment This book provides guidance to novice to expert nurses in the treatment and care of the older adult cancer patient using a holistic approach The chapters are well written by authors who are experts in their field The Cochrane Guidelines are considered the gold standard for evaluating

research that impacts treatment selection and care of all patients Their use in the reference materials lends credibility to the information that is presented in the book Publisher *Adapted Physical Education and Sport* Joseph P. Winnick, 2011 This new edition is updated to keep you current with today's trends in adapted physical education and sport and new chapters major chapters revisions and an increased emphasis on best practise

Rational Basis for Clinical Translation in Stroke Therapy Giuseppe Micieli, Diana Amantea, 2014-08-27 Stroke remains one of the major causes of death and long term disability worldwide Currently the only approved therapy for the acute treatment of this disease is thrombolysis a strategy that can only be applied to a small percentage of patients due to its narrow therapeutic window Unfortunately during the last years numerous promising drugs that showed neuroprotection in the experimental setting failed to translate into the clinic because of their toxicity or lack of efficacy Researchers in the field now face the crucial need to develop effective stroke therapies and successfully translate novel strategies into the clinical setting *Rational Basis for Clinical Translation in Stroke Therapy* presents the most recent promising preclinical approaches and the most updated clinical evidence for treating stroke patients By bringing together the experience of accomplished stroke researchers and clinicians the book is a useful tool for improving the treatment and management of stroke patients The book describes current approaches for the management of stroke patients including thrombolysis and mechanical recanalization procedures as well as other clinically relevant topics such as diagnosis imaging risk factors and prevention Also described are emerging interventions based on the use of stem cells botulinum toxin and antidepressants which complement emergency stroke treatment and conventional rehabilitation procedures Clinical approaches are integrated with the most promising therapeutic opportunities based on targeting the immune system hypothermia and postconditioning The book also covers issues related to the improvement of R D strategies in stroke therapeutics aimed at the implementation of preclinical approaches with stroke model guidelines and at the optimization of clinical trial design This volume is a reference for all those interested in the rational development of novel stroke therapeutics
