Strongly Coupled Coulomb Systems Gabor J. Kalman, J. Martin Rommel, Krastan Blagoev, 1998 The proceedings from the International Conference on Strongly Coupled Coulomb Systems represent the interdisciplinary character of the field with topics such as Density Functional Theory Ionic Liquids Multicomponent and Astrophysical Plasmas Dusty Plasmas White Dwarfs Electron Liquid and Dense Plasmas Included is a review of Density Functional Theory by Walter Cohen a 1998 Nobel Prize winner in chemistry for his development of Density Functional Theory Strongly Coupled Coulomb Systems Gabor J. Kalman, J. Martin Rommel, Krastan Blagoev, 2006-03-11 The International Conference on Strongly Coupled Coulomb Systems was held on the campus of Boston College in Newton Massachusetts August 3 10 1997 Although this conference was the first under a new name it was the continuation of a series of international meetings on strongly coupled plasmas and other Coulomb systems that started with the NATO Summer Institute on Strongly Coupled Plasmas almost exactly twenty years prior to this conference in July of 1977 in Orleans la Source France Over the intervening period the field of strongly coupled plasmas has developed vigorously In the 1977 meeting the emphasis was on computer Monte Carlo and molecular dynamics simulations which provided for the first time insight into the rich and new physics of strongly coupled fully ionized plasmas While theorists scrambled to provide a theoretical underpinning for these results there was also a dearth of real experimental input to reinforce the computer simulations Over the past few years this situation has changed drastically and a variety of direct experiments on classical pure strongly correlated plasma systems charged particle traps dusty plasmas electrons on the surface of liquid helium etc have become available Even more importantly entire new area of experimental interest in condensed matter physics have opened up through developments in nano technology and the fabrication of low dimensional systems where the physical behavior in many ways is similar to that in classical plasmas Strongly coupled plasma physics has always been an interdisciplinary activity *New developments in strongly coupled Coulomb systems : papers dedicated to the subject of the SCCS 2008 International Conference (29 July - 2 August 2008, Camerino, Italy)* International Conference on Strongly Coupled Coulomb Systems, 2009 **International Conference on Strongly Coupled Coulomb Systems** J.
