Structural Adjustment In Japan 1970 8:

Structural Adjustment in Japan, 1970-82 Ronald Dore, Koji Taira, 1986 **Japanese Manufacturing Investment in Europe** Roger Strange, 2002-09-11 Japanese manufacturing investment in the European Community has grown dramatically over the last twenty years At first instances of investment were few concentrated in a small number of industrial sectors But since the mid 1980 s there has been a surge of investment in a much wider range of industries This volume details the growth of Japanese manufacturing investment in Europe in fourteen industrial sectors The impact of Japanese competition and direct investment on European industries is considered in the context of the emergence of the three major trading blocs the United States Japan and the EC Roger Strange concludes by making important policy recommendations and arguing for the need for a new theoretical framework for assessing the political economy of foreign direct investment Japan's Asia Policy Wolf Mendl, 2002-09-11 This volume provides a timely and expert analysis of Japan s Asia policy as the country continues to address the future through trying to cope with the burden of a chequered past Dr Mendl locates his exposition of Japan s policy towards both North East and South East Asia in a full historical and cultural context and importantly takes due account of the underlying and potent factor of national identity in shaping international outlook He begins his study with a discussion of the enigma of Japanese policy expressed in debate over whether or not that policy expresses a calculated grand design A corresponding enigma emerges in Dr Mendl s exposition of Japan s policy towards a part of the world with which it shares a geographical location and a measure of identity but one which he maintains cannot be separated from its engagement at the global level In exploring the theme of how Japan is confronted by the problem of reconciling its relations with Asia with pursuing a global role in uncharted post Cold War waters Dr Mendl makes a lucid and scholarly contribution to the debate about Japan s place in a world which it has helped to shape through its economic performance and example

The Japanese Industrial System Charles J. McMillan, 2012-10-25 No detailed description available for The Japanese Industrial System Manufacturing, Technology, and Economic Growth Carlos Sabillon, 2019-07-25 This book analyzes the development of economic events in Japan China the NICs Russia Germany Britain and the United States of America during the second half of the twentieth century in an effort to uncover the variables that were determinant for the generation of economic growth After analyzing numerous economic and non economic variables the author manages to identify a common denominator that was always present when there was growth and absent when there was stagnation A strong causality linkage is established between this common denominator and growth The book also demonstrates how this common set of variables can be easily manipulated by government policy in order to deliver fast and sustained economic growth The book concludes with a clear set of macroeconomic policies for the attainment of fast non inflationary growth in developing countries middle income nations transition economies and developed countries Despite its unorthodox position the book endorses free trade privatization liberalization fiscal rectitude low inflation central bank independence proper governance

protection of the environment and better income distribution With this approach the book offers a fresh new look on the problem of growth and offers hope that economic science will finally provide governments with an effective policy tool for the elimination of poverty and unemployment

The Internationalization of Japan Glenn D. Hook, Michael Weiner, 2013-03-07 The Internationalization of Japan provides the English speaking reader with the opportunity to hear what some of Japan's leading social scientists and other commentators have to say about the internationalization of their country as well as their country's impact overseas The topic is of extreme importance now as the international community demands a greater Japanese contribution to international society as well as changes in Japan to facilitate foreign access The book discusses the internationalization of politics economy and society Topics of special interest include the internationalization of Japanese capital the response of Japanese society to foreign workers local level initiatives for internationalization and the internationalization of education To place the internationalization of Japan in comparative perspective there are chapters on Britain and the United States from a leading British and a leading American political scientist respectively These two and the editors aside all the contributors are highly regarded Japanese scholars or commentators
