Structural Change In Japan Macroeconomic Impact And Policy Challenges:

Structural Change in Japan Mr.Tamim Bayoumi,Mr.Guy Meredith,Bijan B. Aghevli,1998-06-09 This volume by Bijan B Aghevli Tamim Bayoumi and Guy Meredith is based on a seminar on structural change in Japan held in early 1997 and chaired by the IMF's First Deputy Managing Director Stanley Fischer Discussion of the day to day management of the standard levers of fiscal and monetary policy is interlinked with consideration for the more deep seated structural issues By shifting and destabilizing the underlying economic relationships and creating uncertainty structural change complicates the task of policy analysis This volume describes how the IMF is responding to these challenges and how outside experts assess this effect *Japan* International Monetary Fund,1998-11-04 This Selected Issues paper analyzes macroeconomic developments and prospects for Japan during the 1990s Following a surge in activity during 1996 and early 1997 the economy fell into recession in the second quarter of 1997 Real GDP fell by 3.4 percent during the four quarters ended March 1998 the unemployment rate reached historical highs and deflationary pressures reemerged The downturn was largely unexpected and most forecasters had projected growth of about 2 percent in 1997 This paper also examines fiscal policy issues for Japan **IMF Staff Papers, Volume 47, No. 2** International Monetary Fund. Research Dept.,2000-01-01 This paper analyzes portfolio diversification leverage and financial contagion It studies the extent to which basic principles of portfolio diversification explain contagious selling of financial assets when there are purely local shocks The paper demonstrates that the elementary portfolio theory offers key insights into contagion Most important portfolio diversification and leverage are sufficient to explain why an investor will find it optimal to significantly reduce all risky asset positions when an adverse shock impacts just one asset *Structural Impediments to Growth in Japan* Magnus Blomstrom,Jennifer Corbett,Fumio Hayashi,Anil Kashyap,2007-11-01 As Japan's decade long economic stagnation continues there has been much analysis of the immediate macroeconomic problems that confront the Japanese economy This book looks past the short run challenges to the future of Japan and highlights the intermediate and longer term issues that country faces In this the first book length academic treatment of this important issue a team of notable contributors present nine papers offering a comprehensive assessment of those economic difficulties and addressing a range of specific issues from financial restructuring and the impact of the aging Japanese population to corporate behavior public lending employment practices and innovative capacity In each paper contributors clearly identify and outline problems and concerns carefully pose provocative questions and in many instances present concrete suggestions for improvement The resulting volume is a timely and important examination of critical issues for Japan's stalling economy packed with both telling data and expert analysis and offering valuable perspectives on Japan's current obstacles *Research Activities of the IMF, January 1991-December 1999* International Monetary Fund,2000-01-01 Research activity in the IMF emphasizes the links between the organization's policy and operational concerns The main objectives of research is IMF staff understanding of policy and operational issues

relevant to the institution and to improve the analytical quality of the work prepared for management and the Executive Board and the advice provided to member countries The scope of research in the IMF is defined by the purposes and functions of the institution In order to foster innovation and ensure quality control the IMF makes much of its research available outside the institution and encourages staff to interact with academia and other research organizations through conferences seminars and occasional joint research projects The visiting scholar s program has also enhanced the quality of research done in the IMF This program brings in leading members of the economics profession from around the world to assist in the preparation of papers for the Executive Board and to conduct research on IMF related issues Research Activities of the IMF, January 1991-December 1998 International Monetary Fund,1999-09-24 A selective index of major research papers prepared by IMF staff in 1991 98

Regional Strategies in a Global Economy René Haak,Dennis S. Tachiki,2004 Both proponents and opponents of globalization assume it is a process that sweeps across national borders Indeed over the last twenty years the key features of globalization provide prima facie evidence for this conventional wisdom Dramatic developments in information and communications technology the rise of global companies and production networks the unstoppable internationalization of financial markets and the deregulation and privatization of service sectors are all important examples of how this process unfolds in its raw form Nevertheless the increase in regional economic activity is another striking feature of this process As multinational corporations extend their global reach regional networks also emerge in the global trading system Globalization therefore does not only mean a global convulsion of economies but could also lead to a spatial concentration of economic activity All through the 1990s and at the beginning of the new century East Asia experienced numerous structural changes leading to interesting market developments South Korea s rise to developed country status the integration of the Southeast Asian economies and the rise of China have made this region the manufacturing center of the global economy Considering the economic importance of Japan and the other East Asian nations in the world the crucial questions that arise include What are the linkages between the global strategies of multinational corporations and their regional business operations Why do subregional strategies emerge especially recently to take advantage of China as a production base and market Are the modern business practices in a multinational corporation s home country easily transferred to their overseas operations and are they readily absorbed by local employees Finally which strategic directions are Japanese American East Asian and European enterprises going in this important business area of the world To answer these questions this book takes a closer look at several structural features of the East Asian economy and the corporate and business strategies of multinational corporations The volume assembles up to date research by a number of European Australian and Japanese scholars and presents analysis of various business aspects of regional strategies in a global economy

Post-Bubble Blues Mr.Tamim Bayoumi,Mr.Charles Collyns,2000-03-09 What caused Asia s largest economy once the envy of the world to lag behind many of the other industrial countries And why did it take so long for Japan

to recover from the bursting of its asset price bubble of the late 1980s In this volume a team from the International Monetary Fund examines the causes of the lingering economic problems of Japan the crisis in its banking system the reasons for weak business investment and the government's efforts to kick start the economy through a series of stimulus packages This book presents a compelling story about Japan's economy Its message that banking reform and corporate restructuring are central to any sustained revival of the economy is backed up through detailed background research This research provided the analytical framework for the IMF's policy advice during a period of rapid change a period during which macroeconomic policymaking moved into uncharted territory The research papers were prepared by members of the Japan team in the IMF during 1998 and the first half of 1999

Policies and Prospects in Japan and the Implications for the Asia-Pacific Region Tim Callen, Warwick J. McKibbin, 2001 *Japan's Stagnant Nineties* Mr. Ramana Ramaswamy, Christel

Rendu, 1999-04-01 This paper uses a vector autoregression VAR approach to identify the driving forces of the growth slowdown in Japan during the 1990s Negative shocks to both residential and nonresidential investment are shown to have been important determinants of the slowdown Despite the collapse in asset prices negative shocks to private consumption were relatively small A surprising conclusion is that trends in public consumption had a dampening impact on activity in the 1990s The VAR estimations do not support the counterfactual conjecture that activity in Japan would have been significantly weaker in the absence of the expansionary shift in fiscal policy
