Structural Economic Dynamics:

Structural Economic Dynamics Luigi L. Pasinetti, 1993-02-26 This book is a theoretical investigation of the influence of human learning on the development through time of a pure labour economy The theory proposed is a simple one but aims to grasp the essential features of all industrial economies Economists have long known that two basic phenomena lie at the root of long term economic movements in industrial societies capital accumulation and technical progress Attention has been concentrated on the former In this book by contrast technical progress is assigned the central role Within a multi sector framework the author examines the structural dynamics of prices production and employment implied by differentiated rates of productivity growth and expansion of demand against a background of natural relations He also considers a number of institutional problems Institutional and social learning know how and the diffusion of knowledge emerge as the decisive factors accounting for the success and failure of industrial societies *Structural Dynamics and Economic Growth* Richard

Arena, Pier Luigi Porta, 2012-05-03 Ever since Adam Smith economists have been preoccupied with the puzzle of economic growth The standard mainstream models of economic growth were and often still are based either on assumptions of diminishing returns on capital with technological innovation or on endogenous dynamics combined with a corresponding technological and institutional setting An alternative model of economic growth emerged from the Cambridge School of Keynesian economists in the 1950s and 1960s This model developed mainly by Luigi Pasinetti emphasizes the importance of demand human learning and the growth dynamics of industrial systems Finally in the past decade new mainstream models have emerged incorporating technology or demand based structural change and extending the notion of balanced growth This collection of essays reassesses Pasinetti's theory of structural dynamics in the context of these recent developments with contributions from economists writing in both the mainstream and the Cambridge Keynesian traditions and including Luigi Pasinetti William Baumol Geoffrey Harcourt and Nobel laureate Robert Solow **Resources, Production and Structural**

Baranzini, Claudia Rotondi, Roberto Scazzieri, 2015-04-30 New approach to the economic theory of resources showing the positive role that scarcities can play in triggering economic growth *The Economic Theory of Structure and Change* Mauro Baranzini, Roberto Scazzieri, 1990 This wide ranging 1991 inquiry into the general field of structural economic analysis provides a thorough appraisal of the method of economic dynamics **Diversification and**

Structural Economic Dynamics Clovis Freire, 2017 *Pattern Analysis Applied to Structural Economic Dynamics with a Choice of Technique* Robert L. Vienneau, 2019 This article illustrates the application of pattern analysis to structural economic dynamics with a choice of technique A numerical example is presented in which technical progress is introduced Examples of temporal paths through the parameter space illustrate variations of the wage frontier A single technique is initially uniquely cost minimizing for all feasible rates of profits Eventually the technique for which coefficients of production decrease at the fastest rate is always cost minimizing This example illustrates possible variations in the existence of Sraffa

effects which arise during the transition between these positions **Structural Economic Dynamics with a Choice of Technique** Robert L. Vienneau, 2017 This article illustrates the application of bifurcation analysis to structural economic dynamics with a choice of technique A numerical example of the Samuelson Garegnani model is presented in which technical change is introduced Examples of temporal paths through the parameter space illustrate variations of the wage frontier A single technique is initially uniquely cost minimizing for all feasible rates of profits Eventually the technique for which coefficients of production decrease at the fastest rates is always cost minimizing During the transition between these positions reswitching the recurrence of techniques and capital reversing can arise This example emphasizes the importance of fluke switch points and illustrates possible variations in the existence of Sraffa effects **Handbook on Entropy, Complexity and Spatial Dynamics** Reggiani, Aura, Schintler, Laurie A., Czamanski, Danny, Patuelli, Roberto, 2021-12-14 This ground breaking Handbook presents a state of the art exploration of entropy complexity and spatial dynamics from fundamental theoretical empirical and methodological perspectives It considers how foundational theories can contribute to new advances including novel modeling and empirical insights at different sectoral spatial and temporal scales Structural Change and Exchange Rate Dynamics Paul J.J. Welfens, Anna Wziatek-Kubiak, 2005-12-06 Structural change economic growth and adequate exchange rate adjustment are key challenges in the context of EU eastern enlargement as are consistent macroeconomic policies The authors focus on sectoral adjustment across industries in catching up countries and explain changes in the composition of output this includes new aspects of the Chenery model They describe and analyze the spatial pattern of specialization and adjustment in many countries Theoretical and empirical analysis of foreign direct investment innovation and structural change shed new light on economic dynamics in Old Europe and New Europe As regards exchange rate dynamics both traditional aspects such as the Balassa Samuelson effect and new approaches to understanding exchange rate developments are presented Links between exchange rate changes and innovation are particularly emphasized *The Social Science Encyclopedia* Adam Kuper, 2003-12-16 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on the key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society
