Structural Semantics An Attempt At A Method:

Structural Semantics Algirdas Julien Greimas,1983 Structural Semantics: an Attempt at an Method; Translated by Daniele McDowell and Others A J. Greimas,1983 **Methods of Text and Discourse Analysis** Stefan Titscher,2000-09-22

This volume is the most comprehensive overview to date of sociologically orientated approaches to text and discourse analysis and is worth reading even for those who are interested only in purely linguistic approaches to text and discourse Its main merit I think is that it introduces approaches which up to now have hardly been admitted into the universe of scientific discourse *Discourse Studies Methods of Text and Discourse Analysis* provides the most comprehensive overview currently available of linguistic and sociological approaches to text and discourse analysis Among the 10 linguistic and sociological models surveyed in this book some of the more important are Grounded Theory Content Analysis Conversation Analysis and Critical Discourse Analysis The book presents each approach according to a standardised format which allows for direct systematic comparisons The fully annotated lists of sources provide readers with an additional means of evaluation of the competing analytical methods Interdisciplinary and international in its aims *Methods of Text and Discourse Analysis* suggests the benefits both linguists and sociologists will derive from a more intimate knowledge of each others methods and procedures

Discourse and Psychology Saumya Sharma,2019-09-06 This book presents a unique understanding of the interdependence between language and psychology and how one's speech is shaped by and in turn shapes one's thoughts beliefs and emotions Drawing on the tenets of discourse analysis and psychology it presents a comprehensive guide to a new and burgeoning area in linguistics and critical theory The volume focusses on individual and group behaviour to show how identity formation is as much dependent on the psychological state as on social surroundings and context It introduces various concepts from the sociocognitive framework discursive and critical psychology highlighting the myriad ways of approaching the complex interface between text sociocultural factors and cognitive processes An indispensable guide to the complex world of language and the unconscious the volume will be of interest to students and scholars of linguistics applied linguistics sociolinguistics psychology and behavioural science language and critical theory It is also a must read for the general reader interested in language communication and social intelligence **Reading Second Peter with New Eyes**

Robert L. Webb,Duane F. Watson,2010-04-08 The letters of James 1 and 2 Peter and Jude are among the most neglected letters of the NT Thus methodological advances in NT study tend to arise among the Gospels or Pauline letters But these letters are beginning to receive increased attention in the scholarly community *Reading Second Peter With New Eyes* is the third of four volumes that incorporate research in this area The essays collected here examine the impact of recent methodological developments in New Testament studies to Second Peter including for example rhetorical social scientific socio rhetorical ideological and hermeneutical methods as they contribute to understanding this letter and its social context

Interpretive Approaches to Policy Analysis Raul P. Lejano,Wing Shan Kan,2025-03-19 This Brief provides researchers

with an introduction to interpretive approaches for analyzing public policies It introduces several real world policy situations where the lack of an interpretive focus limits the analysis and precludes better policy responses It takes an integrative point of view with an openness to combining the insights from interpretive and positivist approaches in policy analysis noting the ability of the interpretive approach to make sense of data while uncovering the otherwise hidden ideological and normative bases of other types of analyses While not a how to methods book this Brief provides sufficient discussion of different ways to find meaning in texts such as narrative and discourse analysis or cultural ethnographic readings of the social and material artifacts found in a place as well as uncovering meaning from direct engagement with subjects through interviews action research and other strategies The main intent of the book is to convince policy scholars of the usefulness of interpretive thinking which entails answering the questions what does it mean to interpret and what do we gain from interpreting As such this Brief will be of interest to scholars in public policy public administration and political science as well as researchers in applied fields e g environmental studies race and gender studies urban planning sociology engaged in policy analysis **A.**

J. Greimas and the Nature of Meaning Ronald Schleifer, 2016-08-19 In this book first published in 1987 Professor Schleifer sets Greimas work in its intellectual context and sets forth the development of his distinctive style of interpretation Moreover the author goes on to consider Greimas work against the latest examinations of discourse in philosophy depth psychology and literary criticism He tests Greimas semiotic square against Derridean deconstruction Lacanian psychoanalysis and the literary analyses of Paul de Man This book will constitute an important and lucid survey of an often inaccessible critic and will be of interest to students of literature **The Samaritan Mission in Acts** V. J.

Samkutty, 2006-10-24 A review of the socio ethnic and religious contexts of the Samaritans points to the conclusion that they struggled to establish the legitimacy of their identity and status as a people **Subject Access to Scandinavian Fiction**
